

# LAYMAN FINDS STOMACH CURE

Good Christian and Family Man, But Had Poor Digestive Organs—What Cured Him You Can Get Free.

It is a generally admitted fact that among ministers and their families Dr. Caldwell's Stomach Cure is the favorite laxative. It is not often that the layman has a chance to "speak up in earnest" and hence these words from Dr. Joseph Murphy of Indianapolis, Ind., whose picture we present herewith:

"All my life I had needed a laxative to cure my constipation and stomach trouble. I could eat nothing; I could not get what I did eat out of my system. I tried everything, because my work, as engineer on a railroad train, made it necessary for me to get up well. Finally I got free from my trouble to meet up with Dr. Caldwell's Stomach Cure, through the recommendation of a friend. I took it and was cured. From that time on, but I am still cured."

Dr. Joseph Murphy makes it necessary for me to get up well. Finally I got free from my trouble to meet up with Dr. Caldwell's Stomach Cure, through the recommendation of a friend. I took it and was cured. From that time on, but I am still cured.

No man should buy practical jokes unless he is a good loser.

# THE HUNTERS

BY RANDALL PARSONS

**SYNOPSIS.**

The story opens with the introduction of John Stephens, an American, to Valparaiso, Chile. He is interested in mining operations in Chile. He is met by a man named Tattle, who is a Chilean. Tattle is a man of many talents, and he is a man of many secrets. He is a man of many secrets, and he is a man of many secrets.

CHAPTER XVIII.—Continued.

He promised with an eager earnestness that went far toward convincing me I had not only conquered the man, but won his friendship as well. "Then," said McKnight, "we can pass back alone through the engine room. In ten minutes you slip through, and let this end it. Shake hands with McKnight. He will be here."

"We have attained the spot!" I exclaimed, as I glanced up, and saw her gaining in light through the open door. "Now we will ascertain the truth of Tattle's vision."

"The spot? Do you mean this is the point of sea we have been seeking?"

"Ay" and now, thank God, we can head the other way."

"I sprang eagerly past her, clinging to a lifeline so as to keep my feet on the deck, too thoroughly excited by my discovery to remain any longer in idleness."

"Johnson, run below, and call Mr. De Nova. Have him turn out at once."

I watched the fellow slide to the companion, and made my own way to the bridge, sweeping my glasses across the water, and starting down to the water's edge.

Within a minute De Nova had joined me, his eyes still heavy with sleep.

"Mr. De Nova," I said, rapidly, my dove had sweeping a semicircle in front of me, "I have taken an observation, and this is latitude 65° 17' north and longitude 110° 30' west. There is a big bear. The shadows look forebodingly dark through these glasses. Then call all hands."

"He went down the bridge stairs as fast as his legs would carry him. A moment later a young seaman named Symes was swiftly footing the rattles, their coating of ice breaking under his tread and rattling on the deck below. The men swarmed out from the forecabin and up the main hatch, ranging themselves about the foot of the foremast, watching me eagerly, and occasionally peering up at Symes, now well above the cross-trees."

"Lads," I cried, bending over the rail of the bridge, and starting down to their untired faces. "I've just figured out our position, and this is the spot we've been hunting after in these seas. I've sent Symes to look out for Tattle's island. If there's any land in sight, well had good news. If not, then we'll call it a wild goose chase, and the Sea Queen points his nose north."

"There was a faint, half-hearted attempt at cheer, which ended in a stamp of feet and a shuffling of the feet on the planks. The glasses of the fellows turned upward toward Symes, now securely posted on the foremast peak, the glasses to the great gun or two among them, including Anderson, clambered to the top of the forecabin, where they could see ahead."

"In the hell," the latter yelled, "I know this is the place, and I've found it! That point of vantage, that you ain't foolin' us just to get back, we'll see it sure."

"The crowd turned their eyes on me, and I heard a gasp of approval."

"I've really become I say so, Anderson. The chart, with our course plotted on it day by day, is ready in the chart-house for this day's reckoning. We've got to get on for this day's run."

"The crowd turned their eyes on me, and I heard a gasp of approval."

# Check Your Mind and Course

This Fact—that in addressing Mrs. Pinkham you are confiding your private life to a woman—a woman whose experience with women's diseases covers twenty-five years.

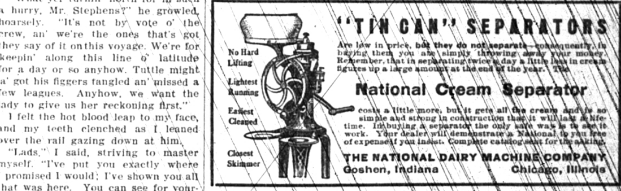

The present Mrs. Pinkham, daughter-in-law of Lydia E. Pinkham, was for years under her direction, and has ever since her decease continued to advise women.

Many women suffer in silence and drift along from bad to worse, knowing well that they ought to have immediate assistance, but a natural modesty causes them to shrink from exposing themselves to the questions and probable examinations of even their family physician. Such questioning and examination is unnecessary. Without cost you can consult a woman whose knowledge from actual experience is great.

**MRS. PINKHAM'S STANDING INVITATION.**

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham at Lynn, Mass. All letters are received, opened, read and answered by women. A woman can freely talk of her private infirmities to a woman; this has been established this confidence between Mrs. Pinkham and the women of America which has never been broken. Never has she published a testimonial or used a letter without the written consent of the writer and never has she published these confidential letters to get out of their possession, as the hundreds of thousands of them in their files will attest.

Out of the vast volume of experience which Mrs. Pinkham has to draw from, it is more than possible that she has gained the very knowledge needed in your case. She asks nothing in return except your good will and her advice has helped thousands. Surely any woman, rich or poor, should be glad to take advantage of this generous offer of assistance. Address Mrs. Pinkham, care of Lydia E. Pinkham Medicine Co., Lynn, Mass.

## 'TIN CAN' SEPARATORS

The National Dairy Machine Company, Goshen, Indiana, Chicago, Illinois.

These separators are simple and strong in construction. They are the best in the world for separating cream from milk. They are the best in the world for separating cream from milk.
