

WITCHAMONDS

Of the Wretchedness Constitution

Can quickly be removed by
CARTER'S LITTLE LIVER PILLS.

His Pet.
Harker—Think I'll try to sell old
Stuffed some poor dogs.
Barker—Useless job. All he thinks
about is eating.
Harker—Hain't any four-legged
friends, eh?
Barker—Only one, and that's the
dining room table.

Lemon Cure Malaria.
Lemons are said to be an infallible
cure for malaria. This is the method
of preparation: Take one lemon, wash
thoroughly with a brush and hot wa-
ter till all germs are gone, cut it
in very small pieces, using skin, seeds
and all; cook in three glasses of wa-
ter till reduced to pulp; add sugar
while fasting. A cure is generally
effected within a week.

A Wise Old Owl.
In her trim little bathing suit she
sat on the white sand.
"I adore intelligence," she cried.
"So do I," said he. "All the same
though, beauty and intellect never go
together."
"And do you think me intellectual?"
she faltered.
"No," he confessed, frankly.
With a faint blush she murmured,
"Flatterer!"

Nothing Doing.
"Why," shouted one of the guests,
"where's Mr. Harriman?"
"Do you mean that little chap that
stood at the end?" asked the photog-
rapher. "Why, I cut him off."

rapher. "Why, I cut him off."

Lack of Money.
Was a Goodness in This Case.
It is not always that a lack of
money is a blessing.
A lady of Green Forest, Ark., owes
her health to the fact that she could
not pay in advance the fee demanded
by a specialist to treat her for
stomach trouble, in telling her her
case she says:

I have been treated by four different
physicians during 10 years of
stomach trouble. I was cured by one
of them, but he could not cure me in
four months but would have to have
money down. I could not raise the
necessary sum and in my extremity I
was led to quit college and try Postum.
"So I stopped coffee and gave Postum
a thorough trial and the results
were magnificent. I now sleep well
at night, something I had not done
for a long time; the pain in my stomach
is gone and I am a different
person."

I dreamed to quit coffee, because it
wasn't me I had tried to stop it I
suffered from nervousness, so I con-
tinued to drink it although I was con-
vinced to believe it was injurious to me
and was the cause of my stomach
trouble and extreme nervousness. But
when I had Postum to shift to it was
different.
To my surprise I did not miss coffee
when I began to drink Postum.
"Coffee had been steadily and sur-
prisingly killing me and I didn't fully realize
that was doing it until I quit
drinking it and changed to Postum."

GOVERNOR'S FATHER DEAD

Had Been Ill for the Last Three or
Four Years.
P. Dean Warner, speaker of the
house of representatives in 1867 and
father of the late Governor, died
at his home in Farmington at the
age of 88 years, from ill incident to
the age. Mr. Warner was present when
the end came.

Although not forced to take to his
bed, Mr. Warner had been in poor
health for several weeks and his
death at this time was not entirely
unexpected. He was recovered from
an illness in 1906.

During the past week when his con-
dition was confining, the govern-
or's considerable attention, the
governor spent much time with his father,
coming almost daily to his home
at Cass Lake, near Pontiac.
P. Dean Warner was born in New
York state and came to Michigan
with his parents when he was 2 years
old. The trip from the west was made
by boat from Detroit, and thence over-
land, via Dearborn, to Farmington.
The latter part of the trip took three
days, and Mr. Warner was then
known as the Warner boy, who was
later merged with the institu-
tion of the state. He was born in
Farmington. He was president of the
bank at the time of his death. In 1867,
he was elected speaker of the house
of the Michigan house of representa-
tives, being elected speaker his last
term. He was a member of the con-
stitutional convention the same year.
In 1869 he was elected senator from
the first district.

Among those arrested were several
members of the Pennsylvania rail-
road crew, who, officials of the
railroad, were simply passing through
the troubled district, going to their
department. New crews for these
trains had to be secured.

President Mahon and Chairman
of the Pennsylvania railroad, who
were in for a conference with state
labor leaders. The union officials
were in for a conference with the
Gov. Harmon to call upon the
company in a formal public state-
ment to arbitrate the strike differ-
ences.

Leprosy Cure Is Near.
Experiments being made on Molokai,
the leper island, are likely to lead
to the discovery of a serum which
will cure the disease.

Three surgeons of the United States
public health and marine hospi-
tal service, at Honolulu, are now
conducting experiments on the island
of Molokai, which has been a leprosy
island since 1866. The experiments
are being conducted on the island of
Molokai, which has been a leprosy
island since 1866. The experiments
are being conducted on the island of

island since 1866.

Major Gaylor Is Out Again.
Major Gaylor, who was taken from
St. Mary's hospital in Honolulu, shortly
after breakfast Sunday morning, to
Deweyville, his country home in St.
Joseph, Mo., where he has been since
the afternoon sitting on the plaza
of his home, receiving neighbors
and telling his favorite stories.

The mayor's insisted plea to be
allowed to walk resulted in three
attempts to walk, but each time he
was refused. Once he sank to his knees as
he tried to enter an automobile, and
in declining the story of his home, he
fell on all fours from over-exertion.
Despite his weakness, however, he
maintained his cheerful mood, and
once more at Deweyville spent the
afternoon reclining on a chair on the
porch.

ODD FISH FROM THE DEPTHS

Strange Marine Forms Brought Up
With Deep Sea Cable Gun
For Ten Years.

Strange monsters the like of which
have seldom been seen by man, were
dragged from a depth of 5,500 feet
by the crew of the cable ship *Burnside*
when they repaired the Alaska cable
off St. Elias last month.

The *Burnside* is moored at its buoy
in Elliott bay after two months of re-
pairing and relaying the cables of the
Alaskan system.

During the past week when his con-
dition was confining, the govern-
or's considerable attention, the

U. S. Army Signal Corps System

On board were a score of huge fish
filled with alcohol. In them floated
strange shapes which it was hard to
believe were the creatures of the deep.

Balls of red hair which looked
like tumbled human heads proved upon
close inspection to be a mass of deep
water crab. Fish, including round
masses were found clinging to the
cable by minute tentacles. One crea-
ture was shaped like the double bay
narrow in the middle with big con-
cave white disks at either end by
which it catches hold of any object.
