

A MARVELOUS RECOVERY.

How a Chronic Invalid Regained Perfect Health.

Mrs. Ray Truener, 39 West Third St., New Albany, Ind., says: "Kidney disease had rendered me a chronic invalid. I lay in bed unable to move, my back and feet were swollen to twice normal size. I looked the picture of death and my case puzzled the doctors. The kidney specialists were highly colored and exalted over my case. Marked improvement followed the use of Doan's Kidney Pills. In six weeks I was a well woman, and my husband and relatives marveled at my recovery. Remember the name—Doan's. For sale by all druggists. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y."

THE WAY HE FIGURED IT.

Mr. Wise—It's a fine machine, but I have to employ a man who does nothing else but keep it in the repair. Auto Agent—Well, if it furnishes steady employment for one man, it's a great deal better auto than those that don't.

Talking to the Child. "Mrs. X— talks to little Madge just as Mr. X— talks to his dog," said a little girl of a neighboring family. And it was indeed true. Mrs. X— is a very well-meaning woman and would be greatly surprised if she should hear the foregoing statement, she has simply unconsciously acquired a harsh tone of voice in dealing with her children. This is altogether unnecessary and is not, as many mothers seem to think, a mark of good discipline. The mother whose manner is quiet but firm is generally a much more successful disciplinarian than the harsh-tongued mother who issues her commands in a dictatorial manner. Kindness never spoils children. It is babyish indecision, sometimes mistaken for kindness, which spoils them.

When the Fish Exploded. Somebody discovered that fish are fond of gasoline and so led to the idea of soaking worms in gasoline in order to make them more alluring when used for bait.

Mark the result. Two of those gasoline-tempted fish exploded in the frying-pan, and broke the kitchen window, and blew the cook's face full of mashed potato, and buried the teakettle into the flour barrel, and painted the kitchen ceiling with stewed tomatoes.

Call it a lying world and let it go at that.

Even the Children. Ex-Governor Penneycker, condemning in his witty way a Philadelphia divorce edict, told, at a Philadelphia luncheon, an appropriate story. "Then our children," he said, "are becoming infected. A kindergarten school teacher, examining a little girl in grammar, said: "What is the child of a lover?" "A divorce," the child answered promptly.

Where Size Counts. Edna thoughtfully considered a cow that was calmly grazing in a meadow across the way. "Mamma, how old is that cow?" she finally inquired. "It is four years old," answered Edna's mother. Edna considered the answer from time to time appeared to be comparing herself with the cow. "Well," was her parting comment on the question, "I'd give five and that cow is big enough to be fifty."

"NO FRILLS." Just Sensible Food Cured Him.

Sometimes a good, healthy commercial traveler suffers from poorly selected food and is lucky if he hears that Grape-Nuts food will put him right. A Cincinnati traveler says: "About a year ago my stomach got in a bad way. I had a headache most of the time and suffered misery. For several months I ran down until I lost about 40 pounds in weight and finally had to give up a good position and move to any food that I might use seemed to nauseate me. "My wife, hardly knowing what to do, one day brought home a package of Grape-Nuts food and coaxed me to try it. I told her it was no use but she insisted I should try it. I tried it and they just struck my taste. It was the first food I had eaten in nearly a year that did not cause any suffering. "Well, to make a long story short, I began to improve and stuck to Grape-Nuts. I went up about 40 pounds in weight in December to 134 pounds the following October. "My brain is clear, my blood is right and appetite good much for a man's pocketbook. In fact, I am thoroughly made over, and so I am all Grape-Nuts. I talk much about what Grape-Nuts will do to some of the men on the road have nicknamed me 'Grape-Nuts,' but I stand there as healthy, ruddy-cheeked, and a pretty good example of what the right kind of food will do. "You can publish this if you want to. It is a true statement without any fluff."

"Read the little book, 'The Road to Wealth,' in plain 'There's a Reason.' You read the above letter to the editor. Now read the little book. It is a true statement without any fluff."

"Read the little book, 'The Road to Wealth,' in plain 'There's a Reason.' You read the above letter to the editor. Now read the little book. It is a true statement without any fluff."

THE COLLEGE TO THE FUTURE

Established by an Act of State Legislature in 1885.

PROF. W. F. MCNAIR HEARD

There is been in Attendance at the College Every Year an Increase in Number of Students Enrolled.

Lansing.—The twenty-fifth term of the Michigan College of Mines in Houghton will open on September 5. The year is divided into four terms as follows: Fall term, September 5 to December 2; winter term, January 15 to March 15; spring term, March 15 to June 10; summer term, June 15 to September 2.

There is seen in attendance at the college every year an increase in number of students enrolled. Last year the total enrollment was 243. The college was established here by an act of the Michigan state legislature passed in 1885.

It is governed by a board of control appointed by the governor, with the assistance of the faculty. The board consists of M. M. Duncan of Ishpeming, L. Hubbard and W. D. Calverly of Houghton, James M. Calkins of Calumet, M. F. Calkins of Marquette and William Kelly of Vassar. William Kelly is president of the board.

Prof. Frederick Walter McNair, who received a degree of bachelor of science at the University of Wisconsin, and a degree of doctor of science from Lafayette college, for years has been president of the college and is still at the head. There are 38 members of the staff of instruction.

The college is the only state educational institution in this section of the state. It is in the heart of the great copper mining camp and offers to students unparalleled practical demonstrations of the workings of mines, mining, milling and smelting.

A most thorough course in mining engineering is given and is undoubtedly accounted for the fact that of the 522 graduates only 13 have left the field of mining engineering.

Investigation to Be Thorough. Lansing.—Railroad Commissioner James Scully arrived at his office and took up the matter of resigning the Durand wreck. The attempt of Grand Jurors officials to prevent the commission ascertaining all the facts by refusing to furnish information at a hearing has but heightened the determination of state officers to probe the wreck to the bottom, and already they are in the thick of it.

The commission has been informed that witnesses may be secured who will swear that there were no tall tales in the kitchen window, and that the cook's face full of mashed potato, and buried the teakettle into the flour barrel, and painted the kitchen ceiling with stewed tomatoes.

It is expected the commission will formulate definite plans for a hearing. Transmitter Acker may be given an opportunity to explain why he treated the commissioners in such a shabby manner when the case of Battle Creek to attend the railroad investigation.

As far as possible the commission is obtaining the names of all witnesses of the wreck, as well as of all trainmen who were on board either train. Investigation has not been so far advanced which would lead to sensational before the inquiry is completed, and the commission members announce that it will require a large share of their attention until any phase of the wreck has been investigated and the people of the state are satisfied that everything possible has been done to bring home the responsibility to the loss of lives.

Big Band at Fair. The band of Sig. A. Liberti will appear at the state fair. The work of the band has been heard of hundreds of crowds at fairs, exhibitions and in the big parks in the country, has been generally approved.

In addition to the attractive band, self there will be a double quartet of grand opera stars who are being featured in all Liberti's entertainments this year. Grand opera selections with full band accompaniment, solo duets and trios of the more popular works and sacred songs will be mixed with the feature of grand opera stars.

Special Aviation Program for Fair. Secretary J. E. Hanson of the Michigan state fair has received a letter from Wilbur Wright regarding the coming aeroplane exhibitions to be given at the state fair. Four flights daily have been arranged for, and according to Wright, the Michigan fair will receive more of an aeroplane feature than any other state fair in the Union. He says:

"We are furnishing you very much more than any other state fair for which we have a contract."

"Pass the Cream," or No Effect. The twelfth annual inspection made by four state dairy inspectors, who appeared suddenly among the various restaurants of the state for the purpose of ascertaining the quality of the cream, was able to serve their guests with cream.

The cream, according to the inspectors, was of the highest quality and even as much fat and other value as the best of common cream. It was not, however, as good as the cream sold at the restaurants, which is known to the proprietors.

Will Put Blame Where It Belongs.

Determined that the person or persons responsible for the wreck at Durand shall be brought to justice, the state railroad commission has asked the attorney general to assist in the investigation.

If it can be proven that the train men were unqualified for the positions they held, the blame for the wreck will rest to a large extent upon the officials, and under the statute they could be charged with manslaughter.

The commission has already stated that the Grand Jurors is attempting to fasten the blame on one of the competent men in order that the officials may be relieved of any responsibility, and in this case, it is the engineer, generally recognized as one of the best men in the employ of the road.

There is a law relative to the operation of trains on every railroad in the state under which it is set forth that it is the duty of train officials, when a passenger or freight is delayed, to place a torpedo on the road 500 yards from the rear end of the last car, and that a member of the train crew shall be stationed at that point with a lantern or flag to stop any oncoming train.

This rule, according to the statements of the railroad commissioners, was violated in the Durand wreck, and the commission has already stated that the Grand Jurors is attempting to fasten the blame on one of the competent men in order that the officials may be relieved of any responsibility, and in this case, it is the engineer, generally recognized as one of the best men in the employ of the road.

State Take Charge of Wreck Inquiry. Lansing.—The state railroad commission will go to Durand to the corner's inquest on the Durand wreck victims.

The attorney general has been charged with the investigation, it is stated, with a view to pushing the inquiry in order to avoid necessity for a later date in Lansing. Speaking of the inquiry, the chairman of the railroad commission said:

"It is the inquiry develops information sufficient to satisfy the attorney general and the commission that all facts regarding the wreck have all been brought out, and a complete investigation will not be held. We are concerned only in determining whether negligence or carelessness caused the wreck."

James Rice, mechanical expert of the commission, is in the upper peninsula inspecting railroads, but he has been wired to hurry home to assist in this investigation. James Thompson of this city, state tax commissioner, was in the last sleeper of train No. 14, declared to have been among people removed from the wreck. Another passenger, in a letter to the commission, stated that he prepared to swear that the tall tales in the Durand wreck were left in Durand.

Morrie Mac Not Withdrawn. According to advice received at the office of the secretary of state some one is making a determined effort to withdraw James Mac from the race for the state senatorship. A telegram was received by the state department to the effect that Morrie Mac had been withdrawn, and the message stated that it would not be necessary for the secretary of state to certify to it, as Morrie was about to withdraw.

Before taking any steps Deputy Mills wired Mr. Morrie in an effort to confirm the withdrawal. A message was received stating that Morrie was not intended to withdraw, and that he was not the author of the original withdrawal. It is thought that Morrie is opposed to the candidacy of Mr. Morrie, and the message to the secretary of state, his name has been certified to, but he is not taken from the original ballot.

"Fighting Fifty" Reunion. The forty-first annual reunion of the "Fighting Fifty" Michigan regiment was held at Lapeer and was attended by 30 of the veterans of the regiment who are still living.

The address of welcome which was given by Senator W. Smith of Lapeer. Other speakers of the day were John Loughman of Detroit, A. K. Piet of Detroit, George W. Smith of Port Huron, Rev. Father P. W. Bennigan, chaplain of the Michigan National Guard, and Francis Klory of Detroit, who acted as chairman.

Wants Labor Law. The Pennsylvania secretary and treasurer of the Labor Federation of Labor, and for years chairman of the legislative committee of the Detroit Federation of Labor, says that the most effective way to fight poverty is by the passage of legislation. To this end he urged the election, to the legislature, of men who understand the needs of the union men and manufacturers who suffer from the competition of prison labor. He spoke of the need of a law which would regulate the legislature and compel them to take action in the direction of the needs of the union men.

Relieved of Cash While They Pray. The state camp meeting of the Apostolic Holiness society, at Guts Hill, a grove south of Owosso, was broken up by the action of a clever pickpocket, who, after having stolen two of the stalwarts of the society, who tried to arrest him, succeeded in getting away with his booty. Nearly 6,000 people are in attendance at the camp meeting and it is the custom to hold a sanctified meeting, in which the participants get the "power."

Fire Insurance Agents' Meeting. The twelfth annual convention of the Michigan Association of Local Fire Insurance Agents in the Masonic temple opened. Time was given over to the election of delegates, distribution of badges and the reading of the last convention. The first session consisted of the presentation of the previous session's address and listening to various reports and communications.

All the delegates took a ride on the ferry steamer Conger, finishing up with dinner at the Harrington at 1:35.

TURTLE VERY HARD TO KILL

One Found Alive Embedded in Clay. But Glacial Period Theory Was Disputed.

The weekly meeting of the Naturalists' club of West Hurley, N. Y., was delivered by a debate on the subject, "Resolved, That the turtle is a glacial relic." The speaker, in his conclusion, holding that it is a glacial relic.

The members of the club went to the Ashokan dam. They were ten feet down in a mass of clay when one of them came upon a rock. With difficulty he persuaded the other men to wait long enough to look at it. After they had viewed it, he called to the engineers: "These men made the laborers dig further; then it was seen that the side of the rock was marked like a turtle shell."

When the caked clay had been removed from the other side of the rock the engineers were enabled to find a petrified turtle. They put it into a pall of hot water. By and by one man said sadly that he guessed "petrified" should begin with "pu" instead of "pe."

The author of this suggestion upon the pall with his foot, and soon the turtle himself settled the question. A seamed and wrinkled head, in which a pair of white eyes blinked, was shoved from the shell, and then a foot appeared. The other feet came into view within a few moments, and the turtle crawled painfully away.

The club eagerly seized upon the discovery as a topic for next meeting. The members were tired of hearing essays on the hydro-bated turtle, which has figured so much in the affairs of the Ashokan dam, and the preceding officer had trouble in keeping the debates in order when the new subject was discussed.

One engineer told the club that the turtle had probably become imbedded in the clay in the glacial period and had been found in a pall in the winter of '04, 34,572 B. C.

The argument that won the debate for the negative, however, was that the turtle had been caught in the mire before work was started on the Ashokan project. Every requirement which had the right of progress on the dam work, the judges found accordingly.

Cause of the Tides. The tides are due wholly to the attractive force of the sun and moon. Every particle of matter on the earth gravitates toward the moon inversely as the square of its distance.

By the law of gravity the attractive force of the sun and moon decreases with the square of the distance. For the sun is 93 million miles from the earth, the attractive force of the sun is 220,000 times as great as that of the moon. The sun is 220,000 times as far from the earth as the moon is, and the sun is 220,000 times as heavy as the moon.

The waters of the ocean are free to yield to this tendency and hence they are drawn into a hump into four tidal waves a day—two high and two low. The lunar tides greatly predominate, the others being observable chiefly by their action in reinforcing or diminishing them.

As the earth turns on its axis these four tidal waves are carried along with the earth. The lunar tides greatly predominate, the others being observable chiefly by their action in reinforcing or diminishing them.

One hundred and twenty-seven acres in the town of West Hurley, N. Y., were sold at auction. The property was sold for \$100,000. The property was sold for \$100,000.

Real Estate Exchange

Exchange Bank Birmingham, Alabama. The following is a partial list of farms, city lots, etc., for sale, and real estate generally which we have for sale. As our list is constantly changing we request that parties will write us if they do not see what they want in this list.

1. 100 acres of land, 10 miles from Birmingham, Ala. Price \$10,000.
2. 50 acres of land, 5 miles from Birmingham, Ala. Price \$5,000.
3. 25 acres of land, 2 miles from Birmingham, Ala. Price \$2,500.
4. 10 acres of land, 1 mile from Birmingham, Ala. Price \$1,000.
5. 5 acres of land, 1/2 mile from Birmingham, Ala. Price \$500.
6. 2 acres of land, 1/4 mile from Birmingham, Ala. Price \$250.
7. 1 acre of land, 1/8 mile from Birmingham, Ala. Price \$125.
8. 1/2 acre of land, 1/16 mile from Birmingham, Ala. Price \$62.50.
9. 1/4 acre of land, 1/32 mile from Birmingham, Ala. Price \$31.25.
10. 1/8 acre of land, 1/64 mile from Birmingham, Ala. Price \$15.62.
11. 1/16 acre of land, 1/128 mile from Birmingham, Ala. Price \$7.81.
12. 1/32 acre of land, 1/256 mile from Birmingham, Ala. Price \$3.90.
13. 1/64 acre of land, 1/512 mile from Birmingham, Ala. Price \$1.95.
14. 1/128 acre of land, 1/1024 mile from Birmingham, Ala. Price \$0.97.
15. 1/256 acre of land, 1/2048 mile from Birmingham, Ala. Price \$0.49.
16. 1/512 acre of land, 1/4096 mile from Birmingham, Ala. Price \$0.24.
17. 1/1024 acre of land, 1/8192 mile from Birmingham, Ala. Price \$0.12.
18. 1/2048 acre of land, 1/16384 mile from Birmingham, Ala. Price \$0.06.
19. 1/4096 acre of land, 1/32768 mile from Birmingham, Ala. Price \$0.03.
20. 1/8192 acre of land, 1/65536 mile from Birmingham, Ala. Price \$0.01.
21. 1/16384 acre of land, 1/131072 mile from Birmingham, Ala. Price \$0.005.
