

How to Make Better Cough Syrup Than You Can Buy

A Family Supply, Saving \$2 and Fully Guaranteed.

A full pint of cough syrup is as much as you could use in a year. It is made at home. You will find nothing that tastes better of an effective cough syrup. Excelsior Cough Syrup, for whom, cough, cold, croup, asthma, hoarseness, whooping cough, etc., is the best.

Mix 1 pint of granulated sugar with 1/2 pint of warm water and stir until nearly dissolved. Add 1/2 pint of honey and 1/2 pint of molasses. Boil for 10 minutes. Strain through a cloth. Add 1/2 pint of lemon juice. The sugar syrup is kept separate. Take a teaspoonful every 4 hours.

This is just laxative enough to help a cough. Also stimulates the appetite. It is usually used for 10 days. The effect is quick and sugar syrup on the inflamed membrane is well known. Place in the most valuable medicinal compound of Norway white pine extract, rich in guaiacum and other healing pine elements. Other preparations will not work in the throat.

The Pine and Sugar Syrup recipe is now used by thousands of housewives throughout the United States and Canada. The plan has been introduced in the old successful formula has never been improved.

A guarantee of absolute satisfaction. If money promptly returned, give us this recipe. Your druggist has Pine and Sugar Syrup for sale.

Price 5c. 24 Main St., Ft. Wayne, Ind.

MEALING WITH HIS DRINK.

"See here, my dear sir! Didn't I tell you not to drink with your meals?"

"But, doctor, be reasonable. I have to eat some thing."

CHECK IT IN TIME.

Few people realize the grave danger of neglecting the kidneys. The slightest kidney symptom may be Nature's warning of dropsy, diabetes or dreaded kidney disease. If you have any kidney symptom, begin using Doan's Kidney Pills at once.

W. P. Miller, Pendleton, Neb., says: "I spent over \$1,000.00 trying to get well, but my life was despaired of. The doctor said I had torn the ligaments of the kidneys apart. I began using Doan's Kidney Pills and they were the first remedy that helped me. Now I feel better than I have for years. I don't know if it were not for them, I would have had to give up work."

Remember the name—Doan's. For sale by all druggists. 50 cents a box. Foster-McMillan Co., Buffalo, N. Y.

Back, Then, to the Farm.

Richard Croker, during his visit to New York last month, discussed with a reporter the high cost of living. "The farmers are all right," said Mr. Croker. "It is the people who insist on living in the towns who find everything too dear—in the towns, the cost of living is as high as in the country. If you live where you are all at school."

"A little boy in a tiny fat looked up from his drum one day and said:

"Mother, Adam and Eve lived in Paradise. What was it like there?"

"Like what it is here," his mother answered, "when you fight children are all at school."

Young at the Business.

General Howard had invited guest at a dinner given by a boys' patriotic club. "You eat very well, my boy," said the general to a doughty young trencherman. "If you love your flag as well as your dinner you will make a good patriot."

"Yes, sir," said the boy; "but I've been practicing eating twelve years, and I ain't owned a gun but six months."

IMPORTANT FEATURES OF GOOD VENTILATING SYSTEM

In Order That Our Dairy Products May Rank Highest More Attention Must Be Given to Health and Sanitation—One Plan.

Method of Running Ventilator Flues. Fresh Air Is Admitted at the Bottom and Foul Air Taken Out at A and B.

(By J. H. FRANKLIN.)

Through mistaken ideas of some writers, many of our farmers have developed the idea that to keep cows healthy and comfortable and to produce sanitary milk it is absolutely necessary to have expensive barns. As a matter of fact many of the dairy barns where sanitation is the primary object are quite inexpensive.

On the other hand if it is to be converted into a house the dairy barn must be worked out to suit the most accepted sanitary features. It is very essential that some attention be given to the plans and specifications of the barn that is to house the dairy herd to the best advantage. Every detail of a new barn should be carefully worked out before actual construction takes place.

The illustration here shown will, it is hoped, give the builder some new ideas as to how the barn can be made more sanitary.

In building a dairy barn, or any other kind of a barn, for that matter, the plan must be worked out to suit different conditions and locations. Hardly any two sites would permit exactly the same plan being used. If wholesome and sanitary milk is to be produced the farmer should realize that the cows must be kept out of the mud and manure as much as possible. Conditions in and around the barn can, in many cases, be greatly improved by installing and grading. Draining is not of itself sufficient, as the drainage of the cattle shows puddles the surface, thus practically preventing the water from reaching the floor below.

The barnyard should have good drainage, such as will insure good surface drainage, and should have a good top layer of gravel or cinders. In many places this may involve a great deal of work, but even if the grading cannot be all done in one year arrangements should be made by which at least part of it is done every year.

Too much stress cannot be laid on the fact that we have no better disinfectant than good, old-fashioned sunlight. For this reason in planning the dairy barn much more attention should be paid to the question of securing sufficient light. It is said by authorities on the subject that four square feet of window light should be allowed for each cow in the barn. Long windows reaching well to the ceiling have been found the most satisfactory for the reason that the light coming through them can reach all parts of the barn better than if the short windows are used. It is also of importance to remember that there is no better way of preventing the spread of tuberculosis in our herds than admitting plenty of sunlight and fresh air into the barn.

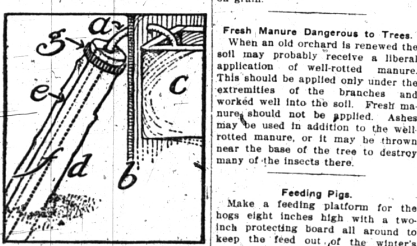

The height to ceiling differs somewhat according to different ideas of the builder, but the height should be sufficient to give ample air space in the structure.

The important features of a good system of ventilation are that it provides a constant supply of pure, fresh air, that the fresh air is admitted near the ceiling and that the impure air is taken out near the floor. The fresh cold air should be admitted near the roof and so that it is not chilled by the warm air, but is tempered before reaching the cows. By forcing the impure air out near the floor less heat is lost and as the temperature of the barn is kept up the cows are comfortable. The major part of the impure air is found near the floor where the cows are constantly depositing manure and soot. The impure air is taken out near the floor by means of a damp stable. A good system of ventilation will carry away all air moisture. No system of ventilation can be successful in a barn where the cracks and crevices in the walls permit cold air to enter in contact with the work of the ventilating flues.

KEEP FROST FROM PIPES

Illustration Shows Excellent Method of Protecting Water Pipes from Frost by Means of Weather-Hose Done.

This diagram illustrates one way of protecting water pipes against frost in the cut at the pipe is a partition through which the pipe runs, the water tank, d the ground, a wooden post and a an iron ring. In operation the post, which may be six to eight inches in diameter, is split in the middle, as shown at c. The center is hollowed out slightly in each half, and

Details of Arrangement.

into this space pipe fits. The iron ring at c holds the halves tight together, says the Orange Juice Farmer. This protection might, and probably would, be made for the purpose of keeping the wall of the building. It could be

Make a feeding platform for the hogs eight inches high with a winter protecting board all around to keep the feed out of the winter mud.

Feeding Pigs.

Look well to the feed of your cow in cold weather. Some cows are subject to inflammation of the udder and must have a dry bed of straw, seaweed, or planer shavings.

Another method of curing skins is to treat them with sulphuric acid. Over two quarts of boiling water. Make an equal quantity of strong brine. Mix the brine and acid together and to each gallon of mixture add one ounce of sulphuric acid. Then immerse the skins, stirring them occasionally until tanned. Rabbit skin will tan in 30 minutes in this solution. When tanned, wash the skins in cold water, and dry them in the sun. The skins are then thoroughly worked up, being moist to the hand, waxy and stretch until they become soft and pliable. The year side should then be thoroughly rubbed with prepared chalk.

Continuous, liberal feeding brings the most profit and the best practical results.

Whelpa Her Legless Fiance.

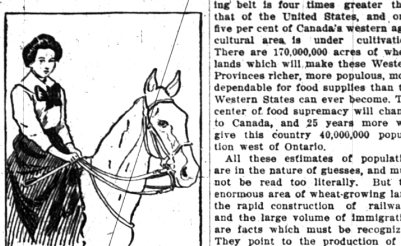

Pittsburg, Pa.—Her love undiminished by the fact that her betrothed is a legless, Anna Reilly, a 20-year-old brunette, wheeled Robert Meyers into the office of Alderman Patrick J. McLaughlin and his fiancée, who were called "Alma" and "Robert" respectively. Calling into his office some workmen from the street, the alderman went through the ceremony with the city-covered workmen as witnesses and attendants. Then the girl wheeled her husband to the altar.

Meyers was a railroad brakeman, and lost both legs in an accident. He had known his wife for two years, and they were not engaged until after the accident.

GIRL RONCHO BUSTER TEN MILLION PEOPLE WON TITLE FROM MEN IN THE CANADIAN WEST BY 1920

THIS OREGON YOUNG WOMAN IS NOW CHAMPION COWGIRL OF THE NORTHWEST.

Pendleton, Ore.—Miss Florence Adams is the champion cowgirl of the Northwest. She won the title by a round-up, a contest which is given annually at Pendleton and in which all the best-known cattle country cowboys participate. At the recent up this fair Miss Adams easily won the cowgirl's pony race. She was not satisfied with the honor of being the northwest's champion woman rider, however. As a result she rode a wild horse that had previously thrown several professional cowboys. The animal bucked for 15

Miss Florence Adams.

minutes and then decided that he was beaten. By breaking the untamed brute, Miss Adams won her title of champion woman "roncho buster." The average fifteen foot, mental picture of a cowgirl or a cowboy as a person dressed in a wide brimmed hat, slicker on the hip, buckskin chaps or skirts and a general dandy expression, mixed in with plenty of nerve. Miss Adams has neither the buckskin skirt nor the six-pointed dresses as does the average woman out for a morning or evening canter.

SCHOOLHOUSE A COYOTE TRAP

Teacher Finds Twenty-Two Animals Is Building When She Comes to Build Fire—Twenty Killed.

Ell, Neb.—The Baine schoolhouse, six miles south of here and in the sandhill section of Cherry county, has placed itself on the map by establishing a record as a wolf catching trap.

The small prairie wolves, better known as coyotes, are unusually numerous in this part of Nebraska, and for the past month or more a pack of thirty or forty has been roaming around in the hills in the vicinity of the Baine schoolhouse.

A few mornings ago, Miss Mattilda French, the Baine teacher, went to the schoolhouse before any of the pupils arrived to build a fire. As she neared the structure from its interior there proceeded a chorus of barks, yelps, howls and yells. Instead of fainting or running away, she sneaked up to one of the windows and standing on her tiptoes, peered into the room. To her surprise, she discovered that it was filled with coyotes.

For ten minutes Miss French watched the coyotes as they drew near the door. The schoolhouse was a trap in which they were caught. The children were beginning to arrive.

"Now that provisions are lower, Mrs. Hasler," said the fussy boarder, "don't you think you ought to reduce your rates?"

"I find it hard to pay my debts as it is."

"But," suggested the fussy boarder, "if you paid in advance as you make others do, you would have no debts."

A Card.

We, the undersigned, do hereby agree to refund the money on a 25-cent bottle of Greene's Warranted Syrup of Cod Liver Oil if it fails to cure your cold. We also guarantee a 25-cent bottle to prove satisfactory or money refunded. Your Druggist or Grocer.

Any Druggist in Michigan.

Wm. Winslow's Coughing Syrup.

For children's coughing, soothes the throat, cures colds, whooping cough, croup, etc. See bottle for full particulars.

Many who think they mean fight are right mean.

Whelpa Her Legless Fiance.

Pittsburg, Pa.—Her love undiminished by the fact that her betrothed is a legless, Anna Reilly, a 20-year-old brunette, wheeled Robert Meyers into the office of Alderman Patrick J. McLaughlin and his fiancée, who were called "Alma" and "Robert" respectively. Calling into his office some workmen from the street, the alderman went through the ceremony with the city-covered workmen as witnesses and attendants. Then the girl wheeled her husband to the altar.

Meyers was a railroad brakeman, and lost both legs in an accident. He had known his wife for two years, and they were not engaged until after the accident.

Dr. Woods' Sarsaparilla

To the brilliant Episcopal Bishop of Tennessee, Dr. Thomas P. DeLoach, a Memphis man of national renown, was complained about charity balls.

"I doubt if it be quite reverent, bishop," said the bishop, "to give a ball for the purpose of charity."

But Bishop DeLoach, with a saving burst of common sense, laughed and replied:

"Why, my dear fellow, I'm sure, it is not to do anybody any good, I'd rather give the length of Memphis in full canonicals."

IT IS A MISTAKE

Many have the idea that anything will sell if advertised enough.

This is a great mistake. True, few sales might be made by advertising an absolutely worthless article, but it is only the article that is bought again and again that pays.

An example of the big success of a worthy article is the enormous sale that has grown up for Cascades Candy Caramel.

This is a great success. It is based on the fact of great merit successfully made known through persistent advertising, and the movement of this article has been made with the aid of the Cascades Candy Caramel.

Like all good things, Cascades Candy Caramel has been the victim of piracy on the part of the unscrupulous public, by marketing fake tablets similar in appearance to Cascades.

It is always to be exercised in purchasing well advertised goods, especially when an article has a national sale like Cascades. Do not allow a substitute to be palmed off on you.

The main difference between a professional man and a tradesman is that a great many times the tradesman can buy and sell the professor.

TO CURE A COLD IN ONE DAY.

Take an Eucalypti Syrup. It cures colds, coughs, and all other ailments. It is a great remedy for all colds. It is a great remedy for all colds. It is a great remedy for all colds.

Many think they are fighting sin when they are having a good time stalling sinners.

Constipation cures, and seriously aggravates many diseases. It is thoroughly cured by Dr. J. D. Kellogg's Cathartic.

It is no use holding up the divine throne if you're treading on the children's toes to do it.

Woman's Danger

Periods Made Safe

By Lydia E. Pinkham's Vegetable Compound

The Change of Life is the most critical period of a woman's existence, and neglect of health at this time invites disease.

Women everywhere should remember that there is no other remedy known to medicine that will so successfully carry women through this trying period as Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs. Here is proof:

Natick, Mass.—"I cannot express what I went through during the Change of Life before I tried Lydia E. Pinkham's Vegetable Compound. I was in such a nervous condition I could not get to sleep. My limbs were cold. I had creepy sensations and could not sleep nights. I was finally told by two physicians that I had a tumor."

By Lydia E. Pinkham's Vegetable Compound and decided to try it, and it has made me a well woman. My neighbors and friends declare it has worked a miracle for me. Lydia E. Pinkham's Vegetable Compound is worth its weight in gold for women of this period of life. If it will help others you may publish this letter."—Mrs. Nathan B. Groaton, 51 No. Main St., Natick, Mass.

ANOTHER SIMILAR CASE.

Cornwallville, N. Y.—"I have been taking Lydia E. Pinkham's Vegetable Compound for some time for Change of Life, nervousness, and a fibroid growth."

"Two doctors advised me to go to the hospital, but one day while I was away visiting I met a woman who told me to take Lydia E. Pinkham's Vegetable Compound. I did so and I know it helped me wonderfully. I am very thankful that I was told to take Lydia E. Pinkham's Vegetable Compound."—Mrs. Wm. Boughton, Cornwallville, N. Y., Greene Co.

The makers of Lydia E. Pinkham's Vegetable Compound have thousands of such letters as those above—they tell the truth, else they could not have been obtained for love or money. This medicine is no stranger—it has stood the test for years.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health by the use of her medicine. Address Mrs. Pinkham, Lynn, Mass.

W. L. DOUGLAS

ESTABLISHED 1863. \$3.50 & \$4 SHOES FOR MEN

IF YOU COULD VISIT W. L. DOUGLAS LARGE FACTORIES AT BOSTON, MASS., and see how carefully W. L. Douglas shoes are made, you would stand your dollar for dollars they are guaranteed to hold their own. But you can't visit Boston and see the factories. So we will send you a pair of \$3.50 or \$4.00 shoes you can buy. Quality counts—It has made W. L. Douglas shoes the standard of the world.
