Maine Blueberries. Washington county's blueberry crop has netted this year a revenue of more than \$1,000,000, according to State Horticulturist Albert K. Gardner of Rockland. This industry was started a few years ago in that county. It is stated that fabulous prices are paid for rental of blueberry lands and blueberry factories and the canning factories are still running—Kennebec Journal.

Modern Motels. William Dean Howells, at a tea at his apartment in Half Moon street, said a magazine editor who had just returned from London, "amused us with reminiscences of New York celebrities."

Mr. Howells hit off rather neatly a notorious celebrity of Wall street. "What that man came in New York in 49," he said, "everything he possessed was tied up in a bandana handkerchief. Today—"

Mr. H. smiled and stroked his close-cropped mustache. "Today everything he possesses is tied up in his wife's name."

Chirograph. "Ethelinda writes a very peculiar hand," said Maude. "It is just a lot of straight lines and angles. When you read it, you have to guess at the spelling, the same as she does."

It takes an optimist to rejoice in the fact that after a woman tries a few cases he can eat all the onions he wants.

FREE HELP. PORTLAND CEMENT. UNIVERSAL BRAND CEMENT.

Cement Talk No. 9. If you want to build something of concrete and need help and instructions, write to us. Our Information Bureau is one of our departments for the purpose of assisting our friends in using cement in concrete work so as to produce the best results.

No Man is Stronger Than His Stomach. A strong man is strong all over. No man can be strong who is suffering from weak stomach with its consequent indigestion, or from some other disease of the stomach and its associated organs, which deprive the body of its proper nutrition.

Dr. Pierce's Golden Medical Discovery. It cures diseases of the stomach and its associated organs, which deprive the body of its proper nutrition. It cures indigestion, flatulence, and all the ailments that result from a weak stomach.

DELIVERING THE HALLOWEEN PUMPKIN

ROBABLY very few of the younger generation who, as did their fathers and mothers before them, derive so much enjoyment from the mischievous and mythical Halloween season ever stop to consider in their frolicking how much they are dependent upon the prosaic pumpkin, the principal ammunition for the fun-making. Nature's golden globe, so symbolic of the gloom of autumn, is not only the ammunition, but it is likewise the emblem of the mysterious holiday as the end of October. Furthermore, the pumpkin, as it lies in the field or reposes in the market stalls, is so suggestive of a hundred pranks that it might almost be denominated the inspiration of much of the Halloween revel.

LOADING PUMPKINS FOR MARKET

the boy who has not in the halcyon days of his youth openly or surreptitiously grinning the teeth, starting over strong men and expansive cars that vested the placid pumpkin with a sudden ferocity worthy of the most desperate cause. Perhaps it were not well in all cases either to inquire too closely as to just how the pumpkin was acquired. But whatever be the means whereby it was appropiated to its present purpose, it is a safe guess that its selection represents much more than the casual whim of the moment.

MAKING READY FOR HALLOWEEN

It is all very well to talk about the advantages of the modern quiet and decorous Halloween, in contrast to the rather more boisterous ones that were formerly the rule—and are yet in some localities—but whatever the form of celebration it would be scarcely too true to say that the American without the grinning jack-o'-lanterns made possible by the pumpkin. Moreover, without the vivid hues of the Halloween bonanza would be at a loss for decorative effects at dinner and party. And finally, without the wealth of the pumpkin's mellow interior we should one and all be deprived of that supreme delicacy—the pumpkin pie—which is our boudoir right on Halloween, even if some crabbed old doctor does deny it to us all the rest of the year.

THE ULTIMATE FATE OF THE "INSIDES" OF A HALLOWEEN PUMPKIN

long before the first white man set foot on the continent (if tradition is to be believed), and we have followed much the same custom to this day. Of course, pumpkins are raised in other environments than in our field, but no other surroundings seem so appropriate for the heralds of the fall festival.

Every true friend of the pumpkin is forced to admit that the name it bears is a plebeian one for so royal a fruit. Its name has not only proven a disadvantage in some respects, but has resulted in the pumpkin being confused with certain other products of the farm. As every person who goes in quest of a pumpkin for Halloween's pleasure will attest, there is only one form of pumpkin that is worthy the name and occasion—that is the pumpkin that is round as a ball and with its glossy surface tinted a more vivid orange than the orange fruit itself. And yet there are people who confuse the only and original skin-pumpkin with its numerous cousins, none of which have its traditions or claims to distinction.

Just because the pumpkin belongs to the same family as the summer and crookneck squashes and the common, inedible gourds is no reason why anybody should confuse them as one and the same thing. Why, even the squashes that are used for the pumpkin, and the people who are canning the delicacy or stocking the cellar are busy now, as are likewise those housewives who are utilizing the fleshy layer, that is found just beneath the rind of the pumpkin, for "stuffed" for the most famous of pies—the kind, you know, that the little boy objected to because they "mashed up his ears." And, finally, there

ST. SAUL'S MARIAGE

Sault Ste. Marie.—All preparations have been made to celebrate the marriage of Miss Marie, daughter of the American canal. The old gates have served their purpose well but it was necessary to get new ones in position this year to keep up with improvements and changes. The Canadian canal, a huge derrick capable of lifting the massive weight of the gates, has been placed in position to handle the work. Navigation will not be impeded as vessels can use the north side of Bridge island. The work probably will require two days.

Saginaw.—To improve the county roads of Saginaw still more the supervisors adopted another resolution, accepting the offer of several business men of \$27,000, they to be reimbursed as the tax of the city of Saginaw is paid to the county for road work. Nothing is to be left undone by the county this fall to build permanent highways next year, which will feed the city from every direction. With this addition the fund now totals \$76,000.

Niles.—With not a penny in his pocket, but with a railroad ticket to Decatur, and a bottle of pure alcohol in his possession, a man in the form of Joe Menish, a full-blooded Potawatomi Indian, was found on the tracks in front of the Michigan Central depot at Menish, who was when found and tried to crawl back on the track ahead of another train. The man was there cut off and he died six hours later.

Lansing.—The police have been requested to search for Mrs. John Heider, who is alleged to have deserted her husband in Grand Rapids, Michigan, 24 hours after their marriage. The bride was formerly Anna Rasmus of Grand Rapids. Heider, who is a ballplayer, declined to be interviewed at the West Michigan fair, where she was winding through the mystic maze of the "dance of the midnight belles."

Mason.—Mr. and Mrs. Darwin Hemes of Ugham township celebrated their golden wedding anniversary. Seventy-five guests were invited, among them Mr. and Mrs. William Heald of Williamson, who accompanied the couple to Stockbridge. Mr. and Mrs. Hemes took their place before Rev. Mr. Sheets of Grand Rapids and repeated their marriage vows of 50 years ago.

Cheboygan.—John P. Oeh, prominent general merchant and traveling man, was shot in the abdomen while hunting on the banks of a stump with his gun resting on a stick. The gun slipped off the stump, the barrel striking against the stump. A ragged hole was made in his abdomen, but it is thought he will recover, as no shot entered vital parts.

Monroe.—The third attempt to incorporate the village of Carleton was successful. A petition of 100 electors in conformity with the law was filed and the board of supervisors unanimously granted it, fixing December 4 as village election day.

Adrian.—Ara Farwell of Adrian was convicted in the circuit court of the charge of bigamy. Her husband was sold, and is held for sentence on a violation of the local option law. Miss Farwell is the first woman to be convicted of this class of crime in the history of the local option statute.

Grand Rapids.—Anna Rose has committed suicide by hanging herself from a beam in the rear of the William Courtwright for the death of her husband. She alleges Mr. Rose was holding her horse while she was in the yard, and she approached, frightened the animal so that it kicked Rose to death May 14, 1911. The fatality happened in Newago county.

Grand Rapids.—Owing to a wreck on the Pere Marquette at Michigan, the board of supervisors regarding rule violations, which was to have been held between Superintendent J. J. Forrester and the International Railway Clerks' union, and the committee of Michigan clerks, was postponed.

Jackson.—While friends and relatives of Frank P. Glazier, former state treasurer, now an inmate of Jackson prison, are working to secure his release, Mr. Glazier is toiling patiently behind the prison walls buying up by the yard the little iron pieces that are used in the manufacture of a free man. Glazier, who is a registered pharmacist, is employed in that department of the prison, his duties being to make a list of the names of the patients in the absence of the prison physician. He is an exemplary prisoner and occupies the position of trusty.

Flint.—The board of county road commissioners will ask the board of supervisors to grant an appropriation now in progress for an appropriation on one and one-half mills on the present valuation to be used for good road purposes next year. If this is granted the commissioners will receive about \$56,000 for road work in comparison with \$25,000 this year. The rate this year was one mill. In their annual report to the board the road commissioners indicated their opposition to the contract system of road building.

DELIVERING THE HALLOWEEN PUMPKIN

It is to be taken into account the demand for pumpkins for Halloween itself, and it is so slight demand, either for it amounts to a consumption of thousands upon thousands of pumpkins every October, even without counting those which are utilized in making pies for Thanksgiving feasts. The procurement of Halloween's use of the pumpkins is, of course, for jack-o'-lanterns. You will agree that it would not be merely superfluous, but little short of an insult, to insert any description of these nocturnal horrors for the timid. Halloween's use of the pumpkins is, of course, for jack-o'-lanterns. You will agree that it would not be merely superfluous, but little short of an insult, to insert any description of these nocturnal horrors for the timid.

Surely the Age of Paper

It is Use Becoming Universal—Hard to Get a Hint at the Possibilities. A report from Lynn, Mass., announces that the police of that city are to be provided with clubs made of paper instead of wood. The new clubs will be harder, longer and more durable than the old. In a new direction, then, paper is to take the place of wood. Some twenty years ago James O.

Impetuous in His Wooing

Ardent Japanese Proved True of Old Saying, "Love at First Sight." It was in Kobe and the big ship was being towed down through the inland sea. The little globe-trotter was permitted to have his steamer towed on the bridge during the coming from which various points she could observe all that was going on.

Blaine struck the fancy of the country

Blaine struck the fancy of the country by saying in an address at a college commencement that the nature of our civilization is fairly represented by the fact that the wheels of the car that brought him to Washington and the napkin given him at the commencement were made of the same material as that upon which he had written his speech. The wheels, the napkin and the stationery were all of paper. But since the time of Blaine

the use of paper has been carried far beyond the limits that excited his admiration.

It is as hard to set the limits to the possibilities of paper as to those of rubber. We have paper wheels and rubber tires. Directly there is talk of paving streets with rubber surfaces and perhaps the foundation may be of paper-maché. We are soon to be required to carry paper drinking cups along with handkerchiefs as a part of the necessary equipment of dress. And by the whole dress may be paper. Fortunately, we can pay for all these things with paper money.

Dangerous.

Mrs. Newbridge—Boo, hoo! Henry threw a cake at me. One that I made myself, too! Mother—The monster! He might have killed you! A Poor Recommendation. "Well," he friend said, "he seems to be able to make a honest living."

"Good morning," interrupted a soft voice with an unmistakable Japanese accent.

The girl opened her eyes to behold a short, wiry, smiling-faced little Japanese dressed in American fashion. "I think you're the nicest lady I ever met," continued the oriental bravely before there was time for a reply. "You speak English very well," remarked the girl irrelevantly with an amused smile at his precocity. "Not so good," was the reply with a depressing shrug of the shoulders, "but you do not understand. I say I think you're the nicest lady I ever met," he persisted, gazing admiringly at her. "Oh, see," he continued, with a low bow, "it's this way—My wife she died—I very happy—will you do me the honor of carrying me home and stay in my Japan?"

DESERVEDLY EJECTED.

There are two ways to tell if you have weak kidneys. The first is through pain in the back. The second is by examining the kidney secretions by the microscope. If you suspect your kidneys, begin using Doan's Kidney Pills at once. Mrs. J. L. Warrick, 406 W. Mulberry St., Lowell, Mass., writes: "No tongue can tell the agonies I suffered. My feet were swollen and there were weeks when I could not put my feet to the floor or stand alone. As a last resort, I began using Doan's Kidney Pills, and in a few weeks I was free from kidney trouble as if I had never had it."
