

CANADA GETS \$1,500 TROPHY.

NATIONAL CORN EXPOSITION, AT COLUMBUS, OHIO, AWARDS TROPHY FOR OATS GROWN IN SASKATCHEWAN.

Again Canada is to the fore, and has secured at the National Corn Exposition just closed at Columbus, Ohio, the magnificent Colorado silver trophy valued at \$1,500, for the best pick of oats. These oats were grown by Messrs. Hill & Son, of Lloydminster, Saskatchewan, and, as may readily be understood, were of splendid quality to have been so successful in a contest open to the world, and in which competition was keen. At the same Exposition there were exhibits of wheat and barley, and in all these competitions, the grain shown by Canada secured a wonderful amount of attention, and also a number of awards. During recent exhibitions at which grain from Western Canada was given permission for entry, it always took first place. At the Spokane International Fair, last fall, where the entries were very large, and the competition keen, the Province of Alberta carried off the silver cup, given by Governor Hay, for the best state of excellence display, and a score of prizes was awarded Canadian exhibitors for different exhibits of wheat, oats and barley threshed and in the sheaves. Vegetable also received high awards. A pleasing feature of these exhibits was they were mostly made by farmers who had at one time been American citizens and were now in Canada. The Department of the Interior is just in receipt of a magnificent diploma given by the Tri-State Board of Examiners of the Fair held at Cincinnati last fall for agricultural display by Canada.

The Surveyor-General of Canada has just completed a map showing that a large area of land was surveyed last year in the northern portion of Saskatchewan and Alberta in order to be ready for the rush of homesteaders to that district during the coming spring and summer. It is understood surveys covering several hundreds of thousands of acres will be made in addition to these during the coming summer.

A return just issued by the Dominion Lands Branch shows that 42,317 homestead entries were made last year as compared with 37,061 in 1909; of this 48,257, 14,704 were made by Americans. North Dakota has the largest area on the list with 4,810, Minnesota gives 2,528, South Dakota 1,133, Wisconsin 745, Washington 730, Michigan 706, Iowa 645, while Ontario has the least, but with the exception of Delaware District of Columbia and the Indian Territory, every state and territory contributed.

The prospects for an abundant crop in all parts of Western Canada for 1911 are said to be excellent. In the districts that required it there was a ample rainfall last autumn, and the snowfall during the present winter is greater than in many previous years. Both are essential factors to the farmers, who look upon the moisture that these will produce as being of the greatest importance.

A large immigration from the United States is expected, and the demand for literature and information from the various Government Agencies located at different points in the States is the greatest it has ever been.

Since the above was written word has been received that in addition to honors won at Columbus, Ohio, Canada won first and second prizes in first and second on oats, as well as diplomas.

Norman Cherry of Davis, Saskatchewan, who was the exhibitor of the first on wheat, secured the award, with G. H. Huton of Lacombe, Alberta, second. C. J. Hill & Sons got first on oats before the silver trophy. G. H. Huton took second in oats.

His Wish Granted.—M. Jean Robie, the celebrated Belgian artist, died at Brussels the other week aged 89. He was the son of a blacksmith who worked at his father's forge early in life, and afterwards developed a taste for painting. M. Robie was also famous as a horticulturist, and was an authority on roses. He used to say: "I wish to die among my roses," and his wish was fulfilled.

The brotherhood of man does mean better wages, but it also means better work.

Washington's Diary

O. W. A long lost diary in Washington's own hand, has at last come to light. This unique journal, which runs from October 1, 1789, to March 10, 1790, is coupled with the first political tract made by the first president. It is a coach drawn by two horses Washington, accompanied by three friends and attended by six servants, went through Connecticut, Massachusetts, Maine and parts of New Hampshire. He thus sets the example of "swinging around the circle," a practice now common in the United States.

"Exercised in my carriage in the forenoon," begins the diary. Then follows a list of the company "that dined with us today."
Here is a peep at his home life: "Am going sitting to John Range, who is drawing a miniature of me for Mrs. Washington." Range had a great vogue in the revolutionary era. He was fashionable and pampered artist. Born in Ireland, he early died.

...writes Washington in Diary No. 13. He speaks of the stoney country, "immensely stoney he calls it. We find, he adds, their crops of wheat and rye have been abundant though of the first they had sown rather sparingly on account of the destruction which had of late years been made in that grain by what is called the Hessian fly."

Friday, Washington tells that the "meat day 'noon halt'" was made at Norwalk to feed the horses. "Part is very rough road," he goes on. "The superb landscape, however, which is to be seen from the meeting house of the latter, is a rich reality. We found all the farmers busily engaged gathering, grinding and expressing the juice of their apples, the crop of which, they said, is rather above moderate. The average crop of wheat they estimated at about 15 bushels to the acre from their fallow land, often 20, and from the best evidences of the British cruelty are yet visible both in Norwalk and Fairfield, as there are chimneys of many burnt houses standing in them yet. The principal exports from Norwalk are horses and cattle, beef and pork, lumber and Indian corn, and the West Indies, and in a small degree, four and wheat."

Saturday, 17th—At sunrise we left Fairfield and breakfasted at Straford, which is ten miles beyond. "There are two decent-looking churches in this place," says the diarist, "and continues with remarks on wayside churches. Once in a while Washington records the beauties of nature. Here is one of his longest notes: "But one of the prettiest things of this kind is that I saw on my walk in horses and cattle, and for my mills; it is nearly 100 yards in width, and the water now being of the proper height, and the rays of the sun striking on it as we passed, had a pretty effect upon the foaming water. Here is the entry on New Haven: "The city of New-Haven," which Washington writes with a byword and a small "h," "was a good deal of ground, but is thinly though regularly laid out and built. The number of souls in it is said to be about 4,000. There is an Episcopal church and a Congregational meeting house, and a college, in which there are at this time about 120 students, under the auspices of Doctor Styles. The harbour of the place is not good for large vessels—abt. 10 feet below." The linen industry does not appear to be of so much importance as I had been led to believe. In a word, I could have but little to say. The following day, Sunday, the president went to the Episcopal church and in the afternoon to the Congregational meeting houses. He tells of a dinner at Brown's tavern with lieutenant governor, mayor and speaker. "Drank tea at the mayor's (Mr. Sherman). On further inquiry I find that there has been abt. (the diarist leaves a blank) yards of coarse linen manufactured at this place since it was established, and that a glass factory is on foot here for the manufacture of bottles."

The officers of the Continental Army called Washington adds. "This state could, this year, with ease pay an additional 100,000 \$2 over what was paid last year."
Monday, 19th—The notes a traveler records that his coach was "under way at 8 a. m. and breakfast was taken 13 miles up the road, at 8:30." En route he sees extensive haystacks in the marsh lands, sandy roads, rail fences now taking the place of stone. "At Wallingford we saw the white mulberry growing, raised from the seed to feed the silkworm. We also saw samplings of hatching, exceeding good, which had been made in the marsh lands, and had been manufactured from the cocoons raised in this town and silk thread, very fine. This, except for the weaving, is the work of private families, without interference from other businesses, and is likely to turn out a beneficial amusement."

extremely difficult for an artist now to find an ideal model. In my profession we are students of anatomy almost as much as doctors are, and we know how figures are corrupted. I hold that the corset is the reason for the feminine figure being worse than it is. "You scarcely ever see a normal length of neck nowadays in a woman because the shoulders are of necessity held so high. The impure dress created by a corset and has done the modern girl due to the unnatural holding in at the waist by the corset. Young women are growing flat chested and that also I ascribe to the corset. I paint pictures in which the figures are of women of the last century at its beginning, when the women had a high waisted gown and no corset. I have painted several and young women sit to me and I find that they cannot pose in these gowns properly. They are not used to the corset, and with a corset and have lost the natural way to bend."

Friday, 20th—The president visited the woolen mills at Westfield. He explains: "(1) it seems to be going well, with the broadcloths, but not of the first quality, as yet; but they are good, as are their cuttings, casimires, serges, and overhauls; the first, that is, broadcloth. Ordered a suit, to be sent to me at New York—and of the latter, a whole piece, to make breeches for my servants. All parts of this business are performed at the manufactory, except the spinning—this is done by the country people, who are paid by the cut."
Hartford is more compactly built than Middletown contains more souls, the computed number of which amount to about double. The number of houses in Middletown are said to be 50 or 60. These reckoning up to the house, would make 2,000 at least. The depth of water, which vessels can make to the last place, is about ten feet, and is a nuisance there is over Saybrook bar.

At Middletown there is one Episcopal church and two Congregational churches. In Hartford there is none of the first and two of the latter. Dined and drank tea at the house, would make about 7 o'clock received from and answered address of the town of Hartford. "There is a great equality in the people of this state. Few are of an opulent rank and no poor, and great similitude in their buildings—the general fashion of which is a chimney always of brick or stone and a door in the middle, with a staircase running up by the side of the latter, two flush outside, with a very good show of sash and glass windows—the size generally is from 30 to 50 feet in length and from 20 to 30 in width—exclusive of a back shed, which is on the east side of the house increases. The farms, by the contiguity of the houses, are small, not averaging more than 100 acres. They are worked chiefly by oxen, which have no other food than hay, with a horse and sometimes two before them, both in plow and cart. In their light lands, and in their alleys they raise horses, but find them much more expensive than ones imported from the east side of Connecticut river; before you come to which a large branch, called Agawam, is crossed by a bridge stands under the hill on the interval land, and has only a connecting house, 25 miles from Hartford.

Set out at 7 and for the first eight miles, ride over almost uninhabited plain, much mixed with sand.
Saturday, 21st—Dressed by 7 and set out by 8—at 10 arrived at Cambridge, according to appointment. Few or no living creatures of any town, were not in the hill after 11. Washington's modest description of the civic honors followed: "We passed through the citizens classed in their different professions to the front of the banners till we came to the state house from which across the street an arch was thrown, in front of which was this inscription: "To All Hearts," and on the other side thereof, next the state house, in a panel decorated with a trophy composed of the arms of the United States, the Commonwealth of Massachusetts and our French allies, crowned with a wreath of laurel, was this inscription: "Boston Recd. March 17th, 1776." This arch was hand-somely decorated with the emblem of a centurion erected 20 feet high with the American eagle perched on the top. After passing through the arch and entering the state house at the south end, and according to the upper floor and returning to a balcony at the north end, three cheers were given by a vast concourse of people who by this time had assembled the arch—then followed the performance of the hymn of the state, and well sung by a band of selected singers—after this three cheers—followed by the different professions and mechanics, in the order they were drawn up, with their colors, through a lane, the people, which had thronged about the arch, under which they passed. The procession being completed, the president, accompanied by a widow Ingersoll's (which is a very decent and good house) by the lieutenant governor, council, accompanied by the vice president, where they took leave of one another.
Next day, being Sunday, Washington went to the Episcopal church in the morning and listened to Dr. Parker, and in the afternoon he visited the Congregational church. The diarist also indulges that dignity with which the name of Washington is ever surrounded. The day before he expected the governor to welcome him to the public reception, had engaged to take dinner with him but as Governor Hancock did not appear at the arch Washington did not care to dine with him.
The president's public reception was conducted to Washington's lodgings and pleaded indisposition as an excuse for absence at the arch. Washington adds, "But as it was expected that he, the president, would be present, and as he was not, the president—Washington in the sarcasm under scores the word 'receive'—he was resolved, at all hazards, to pay his compliments today," adds the diarist. "The president and governor sent a committee to Washington. 'I informed them, in explicit terms,' records the president, 'that I would not see the governor unless it was at my own lodgings.'"
Governor Hancock's conduct was severely censured by public opinion. It was generally held that inordinate dignity, as chief magistrate of Massachusetts, and in public reception, had engaged to take dinner with him but as Governor Hancock did not appear at the arch Washington did not care to dine with him.

Physique of Modern Woman

Figures of the English, as well as those of the Americans, are deteriorating in recent years, but the condition that this is not due, as in the United States, to violent exercise. "Few Englishmen, however, indulge in athletics sufficiently to change their physique," he says. "Those who do are in such minority as to be neglected by the statisticians."
"Undoubtedly the figures of English women have grown worse, and it is

extremely difficult for an artist now to find an ideal model. In my profession we are students of anatomy almost as much as doctors are, and we know how figures are corrupted. I hold that the corset is the reason for the feminine figure being worse than it is. "You scarcely ever see a normal length of neck nowadays in a woman because the shoulders are of necessity held so high. The impure dress created by a corset and has done the modern girl due to the unnatural holding in at the waist by the corset. Calumet Baking Powder

The wonder of baking powders—Calumet. Wonderful in its raising powers—is its uniformity, its never failing results, its purity. Wonderful in its economy. It costs less than the high price trust brands, but it is worth as much. It costs a trifle more than the cheap and big can kinds—it is worth more. But gives more real economy in the baking. Use CALUMET—the Modern Baking Powder. At all Grocers.

No Need to Be Good. A Little Shaker Heights girl surprised her parents last week by refusing to be scared into being good. "It's no use telling me Santa Claus won't come, or that the angels will write it down in their book if I'm naughty, mamma," she said, "I might as well tell you that they think up in heaven that I'm dead."
"But why should they think that, dear?"
"Because, I haven't said my prayers for two weeks."—Cleveland Plain Dealer.

Famous "Pint of Cough Syrup" Receipt
No Better Remedy at Any Price. Fully Guaranteed.

STRANGE ANGLE OF SIGHT
Happy but Perplexed Father Thought Himself the Possessor of Twins.
"There's nothing like temperance," said Mayor Shank at a temperance dinner in Indianapolis. "Take the case of John Humphreys."
"And the physician led Humphreys upstairs to the nursery, where the nurse proudly exhibited a fine infant."
"But Humphreys, instead of manufacturing Rooseveltian joy, frowned, swore and led the room."
"The next morning, when he again saw the newborn child, he showed an anxious and perplexed countenance."
"But nurse," he said, "where is the other one?"
"None Do."
In Brooklyn a few weeks ago a Sunday school teacher asked his class of hopeful little-rather-doubtful question: "Who will tell me what is the chief end of man?"
From the most attentive pupil came forth with this answer: "To glorify God and annoy his neighbor!"
Drink Garfield Tea at night! It insures normal action of liver, kidneys and bowels.
The salt you say he cannot stand may be a variegated mad, but it is wisest to trust some other man with the funds of the church.

THE ONLY "BROMO-ELIXIR" The name of Dr. Williams' Pink Pills for Pale People is on the wrapper of each bottle. Beware of cheap imitations.
Ample food cakes seldom make boys angelic.
Take Garfield Tea. Made of herbs, it is pure, pleasant and healthful.
Ever hear of a pearl being found in a church fair outfit?

THE BAD EFFECTS OF CONSTIPATION
Impure blood, offensive breath, heavy head, shortness of breath, bilious attacks, fitful sleep, loss of appetite, feverish conditions, all come from one cause—Constipation.

THE GOOD EFFECTS OF BEECHAM'S PILLS
remedy these conditions because they remove the cause. They start the bowels, work the liver, sweeten the breath, cleanse the blood, tone the stomach, clear the head, improve the appetite and bring restful sleep.
The oldest and best corrective medicine before the public is Beecham's Pills.
Sold Everywhere. In boxes 25c and 50c.

PIERSCE'S Favorite Prescription
Is the best of all medicines for the cure of diseases, disorders and weaknesses peculiar to women. It is a scientific preparation of its kind devised by a regularly graduated physician—an experienced and skilled specialist in the diseases of women.
It is a safe medicine in any condition of the system. THE ONE REMEDY which contains no alcohol and no injurious habit-forming drugs and creates no craving for such stimulants.
THE ONE REMEDY so good that its makers are not afraid to print its every ingredient on each outside bottle wrapper and affix to the truthfulness of the same under oath.
It is sold by medicine dealers everywhere, and any dealer who hasn't it can get it. Don't take a substitute of unknown composition for this medicine or know your condition. No counterfeits are so good as the good Dr. Pierce's. It is either mistaken or trying to deceive you for his own selfish benefit. Such a man is not to be trusted. He is trifling with your most precious possessions—your health and may be your life itself. See that you get what you ask for.

For DISTEMPER Pink Eye, Erysipelas, Catarrh of the Eye, and all other eye troubles. It is a safe medicine in any condition of the system. THE ONE REMEDY which contains no alcohol and no injurious habit-forming drugs and creates no craving for such stimulants.
THE ONE REMEDY so good that its makers are not afraid to print its every ingredient on each outside bottle wrapper and affix to the truthfulness of the same under oath.
