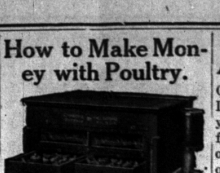
How to Make Money with Poultry.



USE CYPHERS INCUBATORS.

3 Facts Showing their Success.

Fact 1.—Cyphers Incubators are in successful use on more Government Experiment Stations in the United States, Canada and other English speaking countries **than all other makes of Incubators combined.**

Fact 2.—Cyphers Incubators are in use on more large and successful practical poultry plants **than all other makes of Incubators combined.**

Fact 3.—Cyphers Incubators are used by a larger number of Poultrymen of national reputation **than all other makes of Incubators combined.**

U. S. Government indorses Incubators

Read what the Department of Agriculture says:

From Farmers Bulletin No. 236. THE CYPHERS GUARANTY.

That each and every incubator we send out will do satisfactory work in the hands of the purchaser who will give it a fair trial, or it can be returned to us in 90 days, in good repair, less reasonable wear, and the purchase price will be refunded.

"The incubator is an important factor in poultry raising. It is a success; it has come to stay; and the time is not far distant when it will be as necessary on every farm as the plow, the mower or the separator. The purchaser of an **inferior** machine, failing to secure good results, sets aside his in ubator and informs his neighbors that artificial incubation is a failure. The purchaser of a **good** machine—one properly made and adapted to its work—is so apt to be pleased with his success that he encourages his friends and neighbors to undertake raising chickens with incubators."
