Tuberculosis in Japan. Japan is not lagging behind in the fight against tuberculosis. The Japanese health association has over 200,000 local members, and carries on a campaign of lectures in the cities and towns of the country. Tuberculosis is increasing in Japan, due chiefly, Prof. S. Kitasato of Tokyo says, to the rapid development of the factory system of industry, the introduction of modern methods and manners of civilization and the increasing acuteness of the struggle for existence.

IS EPILEPSY CONQUERED? New York Physicians Have Many Cures to Their Credit. New York, April 4.—Doctors from every direction follow the reports that the remarkable treatment for epilepsy being administered by the consulting physicians at the Epilepsy Institute is achieving wonderful results. Old and stubborn cases have been greatly benefited and many patients claim to have been entirely cured.

Persons suffering from epilepsy should write at once to Dr. Waterman, 125 East 25th Street, New York, for a supply of the remedy, which is being distributed gratuitously.

A Cold Lamentation. "So you are going to give up poetry?" "I am," replied the earnest youth. "I'm going to study medicine. I've a prescription commands enormously more respect than a poem."

MARVEL OF CINEMATOGRAPHY

Wonderful Apparatus Invented by Dr. Franz of the Military Academy of Berlin.

A cinematograph apparatus which takes pictures with intervals of one five-thousandth of a second has been invented by Dr. Franz of the Military Academy of Berlin. A striking example of the power of the apparatus shows a bullet fired at a bladder of water in a tank.

The eye only sees a little smoke from the pistol and a couple of holes in the bladder, from which the water is being ejected in a cinematograph and the film is shown slowly a very interesting series of operations can be watched.

The bullet is seen approaching it, traveling 1,000 feet a second, but it seems to move quite delicately in front of the eye and extending a long bar, sharply immediately before the bullet. A bullet can no more pass through air than a vessel can through water without making a wave; and this is the air wave. It is made visible on account of its different density.

Behind the bullet come scattered grains of the powder that have not passed through the barrel, but are still coming from the muzzle. The bullet enters the bladder and disappears in a split second. The water is ejected on both sides, but it reaches the other side, as it is not so much disturbed as one, as it is not so much disturbed as one, as it is not so much disturbed as one.

Walking Safe and Sound. Taking it for granted that your heart is sound and normal, eight or ten miles' walk a day can only do a young man good, but for an old man it is a strain, especially if the walker uses his powers of observation and thought on the way to cheer up his feet.

Grand Rapids.—The intersection of a monster petition signed and circulated by the business men of the city, demanding that the Furniture Manufacturers' association arbitrate the demands of the 20,000 furniture workers, was the feature of the important article appearing here.

Refrigerators.—Do I intend to resign? Why I haven't thought of resigning. No one has suggested that I should resign and I know no one who would advise me to resign except a few enemies.

Where Lord Byron Lived. The late Lord Glenesk's house in Piccadilly, which he bought for \$1,000,000 for sale, has had several notable occupants, but none more notable than Lord Byron.
