

"DEAF" BEGGAR COULD HEAR
Incident That Struck Householder as Being Along Slightly Humsong Lines.
"Many funny things happen in a day during the course of a few months," said a Milwaukee bar dweller, "but one of the best things I ever saw happened yesterday."
"I was suddenly roused from my slumber by three loud knocks on the door. Jumping to my feet and into a bathrobe, I hastened to see what was wanted. I opened the door in time to see a young fellow half way up the flight to the next floor."
"Hello, there!" I yelled at him.
"He turned around, hastened back and handed out a small envelope, pointing to the inscription. I glanced at it. It was an appeal for aid because the applicant was deaf and dumb."
"Say, I was mad enough to kick him down stairs. Then the jobe struck me and I slammed the door in his face and went back to bed laughing."
The Exception.
"There are a good fish in the sea as there are good men."
Parker—Him? I guess you haven't heard Thompson's latest fish story—Harpo's Deafar.

Do not angry that you cannot make others as you wish them to be, for you cannot make yourself what you wish to be.—Thomas a Kempis.

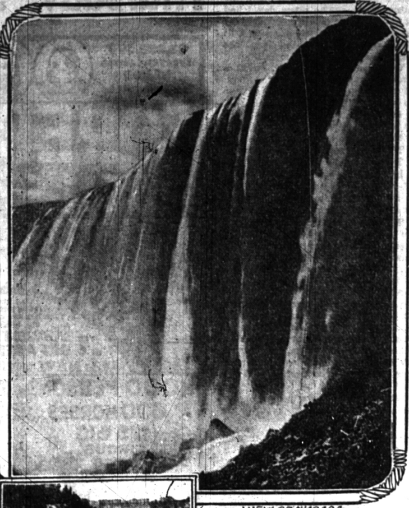

FREE ADVICE TO WOMEN
Women suffering from any form of illness are invited to promptly communicate with Mrs. Pinkham at Lynn, Mass. All letters are read and answered by women. A woman can freely talk to a woman; a husband has been established in confidence between Mrs. Pinkham and the women of America which has never been broken. Never has she published a testimonial or used a letter without the written consent of the writer, and never has the Company allowed these confidential letters to get out of their possession, as the hundreds of thousands of them in their files will attest.
Out of the vast volume of experience which Mrs. Pinkham has drawn from, it is more than possible that she has gained the very knowledge needed in your case. She asks nothing in return except your good will, and her advice has helped thousands of any woman, rich or poor, should be glad to take advantage of this generous offer of assistance. Address Mrs. Pinkham, care of Lydia E. Pinkham Medicine Company, Lynn, Mass.
Every woman ought to have Lydia E. Pinkham's 80-page Text Book. It is not a book for general distribution, as it is too expensive. It is free and only obtainable by mail. Write for it today.

USE A PORTABLE BOSS OVEN
For Roasting, Baking, Boiling, Steaming, etc.
on your stove or range, either oil, gas, or electric.
No more spoiled kettles or wavy-roasted meats. No more smoking or chiling of oven. Housewives can see their kettles boiling and their meats steaming and boiling in their BOSS Ovens. The BOSS Ovens are made of heavy galvanized steel and are lined with a special asbestos material.
Look for BOSS Ovens on every stove.

GLASS IN DOOR
It is guaranteed not to break from heat because the window is protected by a special expansion joint, which permits expansion and contraction of the glass without breaking. The door is made of heavy galvanized steel and is lined with a special asbestos material. The BOSS Ovens are made of heavy galvanized steel and are lined with a special asbestos material. The BOSS Ovens are made of heavy galvanized steel and are lined with a special asbestos material.

The Wretchedness of Constipation
Can quickly be overcome by CARTER'S LITTLE TABLETS.
Purely vegetable—act surely and safely—do not irritate the liver. Cure Biliousness, Headaches, Dizziness, and Indigestion. They do their duty. SMALL PILL. SMALL DOSE. SMALL PRICE.
Genuine must bear Signature
New York

NIAGARA IN REAL PERIL

VIEW OF NIAGARA
The view of the falls by 25 per cent. on the American side, and to double it on the Canadian side, should be made to slip through without check. It is the opinion of experts that a considerable portion of the Horseshoe fall just beyond Terrapin Point, and well within the American boundary line, would be dried up altogether.
Rocks Barely Covered.
Even today with the possible maximum flow not yet being abstracted, keen observers have noticed that hundreds of feet of rock here and there along the break of Horseshoe fall are barely covered with water. The Drietal Veil is considerably lessened in volume, and those who have visited the fall most recently have not been able to avoid commenting on the fact that portions of the rapids have also been dried up altogether.
Those who have calculated that a diversion of 25 per cent. would not materially change the form of the cataract to the eyes have not been able to figure on the erroneous theory so it is asserted, that the falls of Niagara are of high and low, with an even depth and a smooth bottom and sides. Nothing could be further from the truth. The "wild gorge" of the falls results entirely from the enormous amount of water plunging over the great natural dam, but from the uneven character of the bed of the river, set with boulders and also from the jagged edge of the cliff over which the surplus from four great lakes tumbles a hundred and sixty feet into the rugged cauldron below. Fortunately for the power companies, the amount of water so far diverted for manufacturing purposes has not been noticeable, but the fact remains that every further diversion, no matter how slight, will increase the risk of ruin to the power companies.
In connection with their study of the Niagara situation, the government engineers discovered that the water in the great lakes is not a constant quantity, but that it apparently increases and diminishes in recurring cycles of high and low. Between 1874 and 1874, for example, the water of the great lakes was majerially low. It is today. Between 1874 and 1888 it reached its highest recorded points. From 1888 on during the period there was a drop, reaching its minimum in 1896, and since then there has been a gradual rise and a summit point in 1908. It looks, therefore, as if another recession of the waters had just started, and as this cycle of low water develops it will within the bounds of possibility that parts of the American rapids will lose much of their beauty and that parts of the Horseshoe fall may be likewise seriously damaged. The fact that the large power developments have taken place during the period of the upward tendency of the water has led to the results of the drains upon the falls over the disastrous, for the simple reason that there was more water passing over the falls than the average mean.
It is with a full realization of the fact that the American side of the Niagara has taken a campaign which, if successful, should result in the lasting preservation of the "real wonders," the American people.

From Son to Father.
"Since I got chummy with the tailor in our block I have come to the conclusion that I don't want my son to grow up to be a tailor. He's a big boy, said the little man. Wrong is it? And selfish? Maybe. But it's natural, knowing what I know from the tailor."
"He says—and I've looked around and found out that it's true—that it is a common thing for poverty-stricken little men like me to have their big boys' clothes cut down to fit. That is the modern big boy's way of taking care of his father. He's a big boy, said the little man. Wrong is it? And selfish? Maybe. But it's natural, knowing what I know from the tailor."
"He says—and I've looked around and found out that it's true—that it is a common thing for poverty-stricken little men like me to have their big boys' clothes cut down to fit. That is the modern big boy's way of taking care of his father. He's a big boy, said the little man. Wrong is it? And selfish? Maybe. But it's natural, knowing what I know from the tailor."

What Might Happen.
Fortunately the gauges, tests and measurements made by the United States army engineers, under the direction of the late survey, have furnished facts which show beyond the shadow of a doubt what will happen if Niagara is cut to the extent forced to contribute more water for any purpose whatsoever. In the report of the chief of engineers, published a little over two years ago, his final statement is made, referring to the total power diversions on both sides of the river:
"The combined lowering tends to uncover shallow portions of the crest line of the American fall. It is further aggravated by the greater extent, or sequently more harmful effects, both in the American rapids and at the eastery, or Terrapin point, end of the Horseshoe fall. It is to be noted that the Canadian side of the boundary that the impairment of the falls is most serious."
As a whole, the falls have unquestionably been seriously injured by the diversions already made. Additional diversions now under way will add to the damage, and these were at the time of this report, and if the hold attempt to increase the skin-

ing of the falls by 25 per cent. on the American side, and to double it on the Canadian side, should be made to slip through without check. It is the opinion of experts that a considerable portion of the Horseshoe fall just beyond Terrapin Point, and well within the American boundary line, would be dried up altogether.

STAGE NEWS

Sturgis—George Hearst and James Hogan, aged shaven, and seventeen, of Montreal, Canada, were caught in a box car, which they had broken into, in the Lake Street yards. They were sorting over six boxes which the car contained when the officers surprised them. While they were going through the station on their way to the sheriff's. Two revolver shots failed to stop him, but he was found a couple of hours later in the street.
Lonia.—Two young sons of Rev. Nelson Tuttle of Lonia township went to the potato patch to Paris green the potatoes. At noon they went to dinner, leaving the Paris green near the wire fence dividing the place from Frank Taft's pasture lot. While they were gone Taft's spanking span of young horses pulled their heads through the wire fence and ate sparingly of the Paris green. While they were gone Taft's spanking span of young horses pulled their heads through the wire fence and ate sparingly of the Paris green. While they were gone Taft's spanking span of young horses pulled their heads through the wire fence and ate sparingly of the Paris green.

Extenuating.
Parson—Boys, don't you know that you shouldn't pull me off my feet? Jimmy—Oh that's all right, Parson. We ain't playing; we're practicing fer tomorrow's game.
A Heartless Father.
"I need some help with my household duties," announced a woman when her husband came home the other night.
"What's the matter with our daughter?" the husband wanted to know.
"Our daughter? The ideal? Why Jim, you know she's awfully delicate, and she would die if she had to do any household work. She has her school, and—"
"And what?" Her teacher's report shows that she isn't doing a bit of school work."
"But she is the star member of her basketball team, and you know she is eager to take the prize at the gymnasium contest. But that's just like a man—wanting a delicate girl to engage in rough and hard work. He abandoned of yourself, Jim Jenkins! You have no feeling."

Marquette—Charles Kelsey of this city, one of the upper peninsula's best known citizens, was stabbed to death in the case of the inventor of the Nestor clock. The elevator was started in motion before Mr. Kelsey had fully entered it, and he was caught in such a manner that his skull was fractured. Death was instantaneous. The deceased was deputy clerk of the United States court for upper Michigan.
Saginaw—Rev. L. M. Prudhomme, who for the last six years has been pastor of the Holy Trinity church here, has resigned, and will, on July 1, take up his duties at Manistee in charge of St. Mary's church. Rev. J. Suprenant, present pastor of St. Mary's, will come to Saginaw. For the last few years Fr. Prudhomme's health has been very poor and on advice of his physicians he made the change.

Dr. Pierce's Favorite Prescription
It Makes Weak Women Strong, Sick Women Well.
It acts directly on the organs affected and it is at the same time a general restorative tonic, which cures female complaint in the privacy of home. It makes unnecessary the disagreeable questioning, examinations and operations so universally insisted upon by doctors, and so obnoxious to every modest woman.
We shall not particularize here as to the symptoms of disease, but we will state that those means of positive cure are referred to the People's Companion, a weekly journal, published by Dr. Pierce, and up-to-date Edition, sent free on receipt of 21 cent stamp to cover cost of mailing only, or, in cloth binding, 50 cents.
