MAKE FAST TIME ON SKATES

h Engineer's Invention Permits
Speed of Over Thirty Miles
an Hour.

A new form of rofer skate, the inrection of M. Louis Marchand, a
young French engineer, will shortly
be seen on this side, a large quantity
of them having been imported for the
present season, which resemble anothing more than iministure bicycles,
weigh 15 pounds each, and work automatically. They have thick penmatic tires and the wheels, of which
there are two on each skate, are 13
hecks in diameter.

The state of the state of the state
and the state of the state of the

Ladies! Save Money and Keep in Style by Reading McCall's Magazine and Using McCall Patterns

FOLEYS KIDNEY CURE

Any little girl of school age can iron her own apron with a General Electric flat iron. It is as easy as dressing her doll. There is no need of lifting or carry-ing the iron. It needs no changing. It is always hot and clean, at your elbow. Think of its Convenience in the household, and the relief from having hot fires in the summer. For pressing seams in the sewing rout is indepensable. The G.E. iron custs but little and may be used in any household wired for electric light. The cost of electricity is a meet rifle. EASTERN MICHIGAN EDISON CO.
