Forever, and then Some, Swat the Dangerous Pest! Eternal Vigilance will Win the Fight.

If you see a fly walking over the food and dishes, remember that he is a messenger of disease and death, says the July Woman's Home Companion.

Keep the flies away from the sick, especially those ill with contagious diseases. Kill every fly that strays into the sick room.

Do not allow decaying material of any sort to accumulate on or near your premises. All refuse which tends in any way to ferment, such as bedding, straw, paper, waste and vegetable matter should be disposed of or covered with lime or kerosene.

Screen all windows and doors, especially the kitchen and dining room. Burn pyrethrum powder in the house to kill flies.

Don't forget, if you see flies, that their breeding place is in near vicinity. It may be behind the door, under the table, or in the cuspidor.

Kill More than Wild Beasts. The number of people killed every year by wild beasts don't approach the vast number killed by disease germs.
