THIRTY-FOURTH YEAR, NO. 21.

BIRMINGHAM, OAKLAND COUNTY, MICHIGAN, FRIDAY, SEPTEMBER 22, 1911

WHOLE NUMBER, 1734

More About the Village of Birmingham in re Water for its Citizens and for the G. T. R. R.

We would like to put before the fax-payers a few facts regarding the pro-position of the bullege selling water to the proposition of the basis of 40 gallons per day per family, which we under-stand is the average amount used, each family would use approximately 1000 gallons per year, for household we have the proper of the property of the wear that the property of the property of the wear that the property of the property of the wear that the property of the property of the wear that the property of the property of the property of the wear that the property of the property of the property of the tax of the property of the prope

per day per family, which we inderstand is the average amount used, it is a second to the Grand Trusk of 10e per thousand gallons, the citizen should pay only \$1.50 for the 15,000 gallons for high we have a so tax.

At the rate at which it is being sold to the Grand Trusk of 10e per thousand gallons, the citizen should pay only \$1.50 for the 15,000 gallons for which we are now paxing \$5. Therefore you will see that in order to use \$5 worth of water at the rate it is sold to the railroad it would be necessary in order to use \$5 worth of water at the rate it is sold to the railroad it would be necessary in order to use the second to explain how the waterworks has been only about self-supporting we would like some member of the board to explain how the village is to make an enormous profit at the lower rate at which they are selling water to the Grand Trusk. These, are only a few facts, saying nothing about the searcity of water far lawn purposes, which all have feet the past season, and which is a we searcy in order to make. "Birmingham the Pride of dd Oakhand."
