BREAKING OUT ON LEG

BREAKING OUT ON LEG

Hilliop, Kan.—"About two years ago
I began to notice a breaking out on my
leg." At first it was very small but
soon it began to no spread until it formed
large blotches. The itenhig was tery
tible and almost constant. Many
nights I could not sleep at all. After
reached in the one of the county
to the county of the county
to year I trid all kinds of salves
and ointment, but found no relief.
Some salves seemed to make it worse
until there were unty sores, which

Hens that moult late seldom lay

If you find an extra good pumpking squash be sure to save the seeds.

Equal parts of corn and oats are hard to excel as a grain feed for theen.

Every farmer should have a small heel seeder and a small wheel gar-

Sheep are almost essential in main taining the fertility and cleaniluca of the land.

Selling all the hay and grain raised on the farm is a sure method of selling the farm. Ewes that are broad and long will make good mothers and produce vig-prous offspring.

Creamery butter has an advantage ver all the other kinds because of its reater uniformity.

The value of corn silage to the beet roducer is not limited to its use in vinter feeding alone.

To secure a good brood sow, an even development is required from pig brood to maturity.

Do you return your saw and ham-ner to any particular place when you re through with them?

No land is so rich that its owner can afford to waste the manure that is made by his farm stock.

The development of the young horse requires the exercise of the best judgment in handling him.

Water thoroughly when the soil is dry to touch, but never "sprinkle" roses when they need watering.

Crops must be gathered in proper condition and sent to the market fresh and clean. Careful grading is essential.

This is the month when most of the cilos in the corn belt are filled. It osts money to do this now, but next winter the dividends will surely be collected

Alfalfa growers of Kansas consider the best antidote for grasshoppers to be a turkey or two to the acre to range over their alfalfa fields.

The time to lay in plenty of winter feed is when you can get it. This month is the one to cut corn and while you are cutting, cut enough so you will then be likely to have about enough.

The cry is for hogs, Use only pure-bred sires.

Get a dle and stamp your in on the cream or milk cans. Paint rub off in time.

If you want a lasting cement nelted alum. It hardens at once water does not affect it.

The pigs will eat up slick and clea he corn and stalks of that field whice s soft and not fit to crib.

Oil meal is greatly relished lambs, and helps greatly in obtains a fine finish for the market.

The work of lice is often mistaken for disease. When a fowl seems to be ailing look for lice first.

The development of the young horse requires the exercise of the best judgment in handling him.

One advantage in keeping feed al-ways before poultry is that they do not have to hurry to get their means.

Fruit growing and poultry raising go well together. Anyone following either will do well to consider the other. Got a harness punch? It costs only a quarter and with a package of copper rivets breaks can be mended in a jiffy.

The silo today furnishes the most economical, the safest and the best means of storing the corn crop for feeding purpose.

Wheat bran is an excellent feed or dairy cows and calves, but at \$30 er ton or more, it is a little rich or most feeders.

Although certain pessimists claim that the dairy market will soon be overstocked, present prices give no in-dication of the sign.

As a result of the activities of the reclamation bureau, 14,000 farms are now being watered and a million acres are being put in crops.

Cabbage will sometimes cure slob-ber in horses caused by eating white clover; but it is better to keep the clover away from the horses.

Try putting a pinch of copperas in the watering trough once or twice a month. Better still, scrub out the trough and spray thoroughly with a copperas solution.

The lowa experiment station has discovered that feeding mangles and sugar beets to cows is dangerous, and if continued for any considerable period will prove fatal. Keeping the boar away from the herd is more trouble than letting him run, but it is the only way to know just what you are about in hog rais-ing.

Will you feed the hogs in the mud this winter, or build a feeding floor which may cost \$10 or \$100, accord-ing to the size of your herd, but it will pay for itself every time.

Red raspberries do not thrive in the west as well as we could wish. They seem to like a moister, cooler climate better. They are also more likely to winter-kill in the west than the black varieties. The man with a clear conscience and patches on his trousers gets more out of this world than the man who goes beyond his means to be fashion able.

The dairyman may have pienty of chores to do, but he is getting an inmin the section of the se

Select a breed and stick to it. Con-siderable time is required to build up a good flock and nothing is made by continual changing. Always keep pure blooded stock.

Repair the poultry bouses now, its eggs are desired in winter. The first cold weather should find all in good condition. New fowls should be purchased. New blood is necessary for each should be purchased. New blood is necessary for applied eggs to the case. Some of this its, and their garythmic should not be storage of eggs near onlone, olis or eddayed.

From Forty-Five to Fifty Are Much Benefited

Lydia E. Pinkham's Vegetable Compound.

The "change of life" is a most critical period in a woman's ex-istence, and the anxiety felt by women as it draws near is not without reason.

When her system is in a deranged condition, she may be predisposed to apoplexy, or con-gestion of some organ. At this time, also, cancers and tumors are more liable to form and begin their destructive work.

their destructive work.

Such warning symptoms as sense of sufficcation, hot flashes, headaches, backaches, dread or impending eyil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and inquietude, and dizziness, are supported beautiful productions. promptly heeded by intelligent women who are approaching the period in life when woman's great change may be expected.

These symptoms are calls from nature for help. The nerves are crying out for assistance and the cry should be heeded in time.

Lydia E. Pinkham's Vegetable Compound is prepared to meet the needs of women's system at the needs of women's system at this trying period of her life. It invigorates and strengthens the female organism and builds up the weakened nervous system. It has carried many women safely through this crisis

it is generally conceded that the best time to sell chickens is from the first of January to the first of November. "I hear your sen's at college learn in' to be a author. Do you expect he'll soon learn to write for money?"
"Humph! He don't do nothin' else The bright eye, red comb, smooth, bright, well-kept plumage, activity and a keen appetite, indicate the healthy fowl.

PIT SILOS ARE TROUBLESOME there is no record of anyone being in jured lawer on.

a pauper the rest of the time.

Although summer will soon be over there still remain 30 days in which summer heat will at times prevail.

While this weather continues remem ber that the hotfer the water the cleaner the milk things can be kept.

cleaner the milk things can be kept,

The feed now in sight will gire you
a pretty good idea as to how much
stock you can carry over winter. It is
the best policy to have a little too
much feed that to be a little short; it
means all the difference between thin
stock and those in good condition.

Rats are an enemy to squabs. The pigeon loft should be made proof against them. Rid the premises of them by the aid of traps as fast as possible.

To insure the highest per cent, of fertility in the eggs, stock ducks need bathing water, but this does not necessarily mean that they must have a stream or lake on which to disport themselves.
