whole is closely bound up in each others interests.

If you have a house to rent, goods to sell, labor to sell, your success in getting a good price for each serving depends on the praperity of your neighbors. If they are doing well, they will pay fair prices, and as times go, these prices tend to rise!

On the other hand, if your neighbors are not succeeding, they will hargie out the last cant for your house, your goods, your labor. The 'prices for the last cant for your house, your good, your labor. The 'prices for these services will tend to fall.

When you buy goods away from home, you work to reduce the prosperity of your neighbors. Thereby they, become less able to do any thing to help you, and you have failed to build up business ties with them so that they feel no personal interest in you. When you buy goods at home, you 'increase the prosperity of your neighbors. They are not merely better able thereby to help you along in return, but you have created business friendships that make them want to help you. Buying af home pays!
