MANCHU DYNASTY COMES TO AN END AFTER CENTURIES OF RULE IN CHINA.

REBELS AND ROYALISTS REACH AN AGREEMENT.

Trouble Expected to Terminate Quickly and Chinese Will Once More Govern China.

After three centuries of absolute rule the Manchu dynasty yielded up its power and the throne of China in favor of a representative form of government.

This was proclaimed in three simultaneous edicts, the first announcing abdication, the second declaring that the throne accepted the offer of the public, while the third approved all the conditions agreed upon by Premier Yuan-shih-kai and the republicans.

This edict approving of all the conditions agreed upon between Yuan-shih-kai and the republican representatives created even such anomalies as that the emperor should be the Manchus would demand conditions which would safeguard many of their articles and continue to the proclamation, the surrender is unconditional.

The third edict informed the viceroys and provincial governors of the retirement of the throne from political power and exhorted them to continue doing their duty and to preserve peace throughout the land.

It was also stated that the emperor was to take the oath of office as president of the republic and that he was to be assisted by a cabinet of ministers.

He was also to be assisted by a cabinet of ministers and to be assisted by a cabinet of ministers.

COST OF GRAIN GROWING IN CENTRAL CANADA

A careful canvass made of a number of men farming in a large way indicates that even with the extreme expense of harvesting the crop, which has been caused by the bad weather and difficulty in raising wheat, has been produced and put on the market for less than 50 cents a bushel.

The average freight rate is not over 13 cents per bushel. This would make the cost of production and freight 68 cents and would leave the farmer an average margin on his low-grade wheat of 37 cents and for his high-grade wheat of 19 cents; and though this is not as large a profit as the farmer has every right to expect, it is a profit and should not be despised.

The following table has been prepared after careful investigation:

Table with 2 columns: Item and Value. Includes interest on 320 acres, cost of seed, and various agricultural expenses.

By wheat crop farm 320 acres for 3 years, average 20 bushels per acre per year for 3 years, a total of 60 bushels per acre, or 12,000 bushels.

SURELY HARD MAN TO PLEASE

Artist did his best, but General Managing Editor Would Not Be Satisfied.

An artist was drawing a cartoon wherein the flag of our nation played a large part. He drew the flag, first with five stars as the blue field and took it to the managing editor.

"What's the trouble?" asked the artist. "Trouble," belted the managing editor, "we need more stars, stars, stars!"

So the artist brought the picture back and this time he had 117 stars in it by the usual count.

"What do you think you're drawing?" asked the managing editor. "The hardest man to please I ever met in my life," said the artist indignantly. "First it's too few and then it's too many. How many stars do you want, anyway?"
