Visitors from Pontiac, Royal Oak and Clarkston were present. After the program, Lady Garric Knowles, in behalf of the hive, presented Lady Parks, the retiring officer. She also presented Lady Sheldon the hive organist with a crystal censer, and sugar bowl. The ladies were then called to the dining room where all did justice to the refreshments.

R. J. P. Ravel & Son, Morgan W. are very busy men. Dropped into their office one day this week and were surprised at their office layout. They are busy men indeed. Morgan as architect, with Mr. Arthur Payne as draughtsman, find all their time occupied. All bungalows built on this subdivision are of Morgan's own ideas. Two bungalows are now being rushed to completion under the watchful competent eye of Mr. Lee Campbell, of Royal Oak. Mr. David Hovey of Detroit, owns one of the unfinished bungalows, and we found carpenters, plumbers, painters, plasterers etc. Mr. Hovey's new home finishing fast as possible. Both bungalows are modern and very home-like. Mr. Ravel is inventor of a bed, a bed designed especially "Ostafels," a bed designed especially for apartment houses and small beds that is sure to bring the inventor fame and fortune. We don't know much about beds, but this one looks like it is a good one, and we predict for its designer a fortune for his bed.

Last week the largest exhibit of poultry that was ever held in Michigan took place. There were a large number of birds coming from all directions and there surely was One Grand Week of crowing in Detroit. Every one who is a lover of poultry availed themselves of the opportunity of attending this show in Detroit, to see the best people from all over the country, who have spent any amount of time and money in trying to produce the finest fowls of the land. There was something for us all to learn and the only way that we can get in contact with others who are superiors in the industries that we ourselves are interested in. Today there is more money to be made in poultry raising than any other industry, they are raising chickens. They profit from the sale of a bird in the market at the year's end. It is estimated that there are 200,000,000 chickens in the United States, and nearly every family living in it in all cities is well as in our large cities, they are raising chickens.
