BREEDING HORSES SUITABLE FOR GENERAL WORK ON FARM

English Clydesdales and Crosses Resulting From Use of French or German Coach Animals Make Excellent All-Round Team For Almost Any Load Within Reason.

Clydesdale Filly "Nelma Second."

Farmers in the south still cling to the light breeds of horses, mainly because there is more horseback riding done, and the average farmer wants a horse for all-around purposes.

The wise farmer will raise the type of horse best adapted to his needs. Generally speaking, where only one team can be kept on the farm, the horse should be able enough to pull a plow or draw a heavy wagon load with comparative ease, and at the same time light enough to get along over the road with a surry or light rig at a fairly good gait.

Success in beef production is due, as it is in any other branch of farming, to close attention to the business details, chief among which is careful selection of a well-bred and mature sire from one of the best breeds, preferably from that breed most commonly represented in the neighborhood.

Raising Early Lambs. The sole object in raising early lambs is to produce a fine animal of good size and flesh and get him to market at the earliest possible moment.

Slugs Needs a Balance. Cows should never be fed exclusively on slugs. They need some dry forage to go with it; besides, slugs are a carbonaceous food, and needs some more nitrogenous food to go with it to make a well-balanced ration.

English Clydesdales and crosses resulting from the use of French or German coach animals make excellent all-round teams for almost any load within reason.

FEW HINTS ON SKUNK FARMING

Many attempts have been made to raise skunks for their fur, but the enterprises have usually been given up as unprofitable. According to the biological survey of the United States department of agriculture, the chief causes of failure have been cost of fencing inclosures, cost of maintenance or lack of experience, leading to overcrowding and loss of the animals.

MAKING FRIENDS WITH THE COLTS

By Doing So Farmer Will Not Have So Much Trouble in Breaking in the Young Animals.

Many good horses are spoiled when colts by improper training. They may have been teased by children, whereupon they developed a mean disposition.

teaches the colt to lead, but also shows it its place. When the harness is to be put on it should be done very gently, letting the colt become used to it. Then drive it, using no lines.

Hens Pulling Feathers. Hens pulling their feathers? Three things are the cause of it: 1. Too much sulphur in the feed. 2. Too much sulphur in the water. 3. Too much sulphur in the soil.

Galvanite. You will get full value for every penny you spend on Galvanite roofing. Although it is 25 percent heavier than the ordinary roofing, every ounce of its weight serves to make it more durable and serviceable.

BACKACHE IS DISCOURAGING

Until You Get After The Cause Nothing more discouraging than a constant backache. Lame when you wake, pain when you get up, or lift. It's hard to work, or to rest.
