STEEL RODS IN THE CONCRETE OF EXPERIENCE.

These are the steel rods that

Hamilton uses to reinforce the concrete of human experience. We have been preaching the milder doctrine of PROVISION, the obligation that every man has to TOLL his earnings that provision may be made for sickprovision may be made for sickness, for dependents, for opportunity! We have been interested in one of our customer
whose deposits have totalled \$50
a year, never more or less, and
with a life insurance check for,
a thousand dollars he volunterered the explanation. Twenty
years ago he figured it out that
with reasonable economy he with reasonable economy he could save \$190a year. He took out endowment insurance that cost a little more than \$50 a year but the return premium (excess payment) brought it down to even money. The other \$50 he deposited in the Savings Department behause he must provide for emergencies and protect his insurance. The emergency did not happen. The \$50 that he put away in the bank each year, some times as little as a dollar at a time but always the total of \$50, had grown to \$1,383,73, ar d with the insurance added he had the nice total of \$2,387.73. Mind you, the bigger sum was started to protect the smaller and the grand total represented his yearly TOLL FROM EARN-INGS! That is the man the ROYALJOAK SAVINGS

BANK

wants to get acquainted with—the man who tolls his earnings—because he is the the man who impresses himself on the community; because he is a live wire morally and financeally.
