THERE ARETHREE
GOOD REASONS why
you should have your car
overhauled now
parts replaced.

parts replaced.

FIRST: The garage man can give you better service — and, you can ispare the car better now than later. No matter whether you are going to keep the car, or sell or trade it in on a new one—it will pay you well to have it thoroughly overhauled, worn parts replaced hauled, worn parts replaced by new ones and body re-painted.

SECOND: We are able to ECOND: We are able to furnish replacement parts for all models of above makes of cars within 48 hours from receipt of order. Have concentrated this branch of the business at Newcastle, Ind. (center of population of the U. S.) Here we have a \$1,7500 investment in plant and stock, 45,000 separate bins of parts.

THIRD: And perhaps the best reason why you should secure your requirements now—we must increase prices 20% January 1st, when the new parts price lists will be off the presses.

NOW NOTE THIS-Never FIGW NOTE THIS—Never before in the history of this industry has a new concern, having bought the plants and assets of a bankrupt one, taken upon itself the obligation of furnishing replacement parts for the cars it never made.

Write for our booklet. "How to Make Your Car Live Twice he Long." In which we set ferth the Maxwell policy to-ward owners of the above mentioned cars. Address

THE MAXWELL MOTOR COMPANY DID. We considered it good business, even if not a moral or legal obligation.

WE FOUND 122,000 owners out in the cold, as it were pleading for parts, Their cars laid up and useless in most cases.

WE'VE INVESTED about one and three-quarters millions (\$1,750,000) dollars in a plant and steck of parts, for over 150 different models, made by the concerns that comprised the United States Motor Company, whose assets we plurchased whose assets we purchased from the Receiver thru the U. S. Courts.

WE TOOK THE NAME MAXWELL solely for the protection of 60,000 persons who had bought cars under that name.

that name.

HAD WE CHOSEN ANOTHER NAME those 60,000 cars would have had almost no value in the second-hand market. As it is, they have a definite value. And by the replacement of the worn parts your carwill be good for a long time to come.

Landing. Mich.—County treasurers will be required by auditor-General Fulier to pai up more than \$3.00,000 more bodds this year to the state than last yeef. This action is due to the hight tay rate, making state taxes far more whan last year. In 1912 county treasurers filed bonds with the state amounting to \$4.478.000 and this year they will have to increase it to more than \$8.00,000 as the state of the state amounting to the state of the state amounting to the state of the state of

Wayne county, will not be asked to file a larger boad than last year as in that country the board of auditors, check the freasurer every day and the present/bond of the county treas-urer is amplie. Other countries do not have a similar system of the countries of the culted by the state is not for the protection of the state as some might imagine, but rather a protection to, the countries themselves. The coun-tries are held responsible for the state taxes and if a county treasurer should alshoond with large amounts the coun-ty-would still be finale to the state. The state demanding a bond, however, protects the county itself.

Government to Own Railroad.

Washington-Government ownership and operation of a public utility is at last in sight. With the senate and house is territorial committees agreed that in federal railway must be constructed in Alaska it is believed it will soon be authorized. The experiment will be closely watched, as it is admitted it will likely prove the entering wedge toward government pende public utilities everywhere, should it be successful. While a bitter fight on the part of opponents of government ownership is locked by. Senater Pitman in charge of the bill, says the majority of the senals favor the snearure.

what Appeyed at the Small Girls Remark.

The teacher in one of the public schools shecurage her pupils to offer suggestions when one of them is at the blackboard and needs help. She believes that this is better than appealing to the teacher.

The class was studying the division of decimals. The teacher had taught her pupils that when they had a sum in division it is sometimes necessary to add ciphers on the right of the decital pint in courry the gift at the board wished to divide 20 by 5.5 and she did not know how to proceed.

"The teacher says to put some nothings after the twenty," spoke up one of the class.

"Where does the teacher get the nothings," kaked the girl who was doing the dividing.

"Out of her head," spoke up the Informant, with no thought of the hidden meaning in the works.

In a short time they would inflamed and the burning and litching were so intense that she would scratch and rub till it would leave ugly sores. The sores also appeared on her hody, and her clothing irritated them so that I had to put real soft cloth next to her body. She would lie awake of nights and was very worrisome. At times she was tortured with litching and burning.
