A Butcher Who Sells a Lot of Meat Can Sell it for a Smaller per lb. Profit

That profit-sharing idea ours is based on VOLUME OF BUSINESS, or it would be mere talk. If we sell two pounds of meat instead of one, we can thrive on a smaller per pound profit. We want the patronage of all

those who would appreciate being able to save something from usual prices on every meat purchase.

Our Vegetables, and Fruits are strictly fresh.

Our Butter and Eggs ditto. Our prices right-our stock large. We solicit a share of your patronage.

The difference between a card town and a live town, is the difference between dead merchants and five merchants. Some merchants are so dead or free from enterprise that it takes sizeling but invasts to wasken enough life in them to even penetrate the outermost rim of business progress. They will six anyund endeavoring to eath trade that comes to town without offering inducements to draw business. They will six anyund endeavoring to eath trade that comes to town without offering inducements to draw business. They tell the public that they do not advertise in the newspapers but give their trade the benefit of the little money they might given from more for their money that the work of the contractive of the contractive of the contractive of the contractive of the advertiser always gives more and better goods for the money than the merchant who doesn't advertise, for the advertiser's goods are turned quicker and are always new and up-to-date. Besiges the advertiser is the town Boomer, while the non-advertiser is the town Spoomer, while the non-advertiser is the town Spoomer. The advertiser, through the pedium of his ads, is reaching out and bringing, new powlet to town to trade and is thus both directly and indirectly advertising the town. There is a way in which every ferson trading in this town can help the town and that is to encourage enterprises by petronizing the merchant who wants a better business. Our aim is to be of still better service to the centerprising merchant.
