PROF. JOHN WILLARD BOLTE

Interesting Pointers on Gardening for the City Man or Suburbanite.

WHAT TO PLANT AND WHEN

Advice by an Expert on Agricultural Matters—Care of the Garden—Raising Sweet Peas—Hot Weather Pointers.

By PROF. JOHN WILLARD BOLTE. Every man with available land should make some kind of a garden out of it. About one man in three who could have a nice little garden plot in the city has one. Almost every plot in the suburbs has both lawns, flowers and a vegetable garden.

The fascination of this delightful pastime is so much deplored by the fact that so many people make gardens every year and yet the majority of them are failures. They start out beautifully, with the warm, fresh mellow earth turned over from the winter's rest, and the little delicate seedlings following the warm rains.

The first crop, small things like radishes and lettuce, develop fairly well and the gardener is fairly satisfied with the results. He then plants late crops with great expectations. When the hot, dry weather of late June and early July arrives the plants begin to shrivel and wither. They turn brown and enter into a kind of dormant state, neither advancing nor retreating, worthless as food providers and certainly unattractive to the eye.

This untimely summer condition, known as the "summer drought," is the result of the same thing that happens to the same garden, year after year, and the best of it is that it need not happen at all. The gardener will be surprised to hear as much as his back, and use both of them a good deal.

The two great causes of garden failures are lack of proper irrigation and lack of available plant food. In a humid climate it should never be necessary to water the garden if the soil in proper condition and the soil is the usual rainfall. It needs to be plowed deeply, cultivated finely, firmed down well to make capillary connection between the soil water below and the plant roots above, and then the surface must be hoed and hoed and hoed. The water will evaporate. A single weed will evaporate many times its own weight in valuable soil water every day. If you permit the weeds to grow, the evaporation is direct, instead of being established for the soil water to evaporate and it will leave the soil as rapidly as it would if you had the weeds cut out.

Next, fertility: A garden must contain plant food and the best plant food is the soil. The soil must be a compost heap in some out-of-the-way corner by in a large box. Here throw your stable manure, grass clippings, and other things that you can get in fact, anything that will rot. Keep it moist and keep flies away from it. Grass sod is an excellent fertilizer. It furnishes nitrogen and it is extensively used by florists. Use plenty of the compost on your garden, plow it under, and be careful not to put it on the plants that will dry out the soil. The compost will increase the water-holding capacity of the soil. It will permit of better ventilation, it furnishes a plant food of all kinds, it lightens a heavy soil and stiffens a sandy one.

If you wish to brace up weak plants and force them to grow, fill a barrel half full of manure and cover with water. The liquid resulting is the best kind of quick acting fertilizer. Pour it about the plants to be forced, and the effect will be immediately perceptible.

Sweet Peas.

No flower is more generally beloved than the old-fashioned Sweet Pea. It was dear to the hearts of our great grandmothers and their great-grandmothers as well, and for no telling how many generations to come. It belongs to a large family whose scientific name is taken from the peculiar butterfly-like form of the blossom. The garden variety consists of green, blue, purple, yellow, orange, red, crimson, alba, and white clover, and first cousins. Some of our most valuable field crops, notably alfalfa, red clover, and white clover, are first cousins once removed, and every wild flower that has the butterfly blossom is more or less distantly related.

Really, we have immense cause to be thankful for many members of the numerous plant family of the Sweet Pea. They form the finest kind of hay and pasturage, and they are the only cultivated plants that possess the power of transferring nitrogen from the soil to the plant. Without them it would be practically impossible to keep our soil productive.

In the floral field, this family is not so numerously prominent as some other groups, but the Sweet Pea makes up for any deficiencies in numbers by its size. No flower will grow better under as many varying conditions as this one. Light soil or heavy, fertilizer or no fertilizer, deep, trench or shallow, much care or little, it will do its very best to bloom early and often, and will succeed most remarkably well.

Did you know that persons who did not get like the perfume of the Sweet Pea? We do not, and we are sorry for them if there be any such.

In variety of tints the most fastidious can be satisfied. There are 40 to 50 different shades and mixtures to choose from. They range from a deep, many purple through all shades and mixtures of blue and red to the purest, bright yellow. The colors are not merely surface colors. They are deep colors that actually show.

When the weather is hot and the air is still, the garden needs our attention. The plants are in a dormant state, neither advancing nor retreating, worthless as food providers and certainly unattractive to the eye.

Get up half an hour earlier than usual and do your garden work then, instead of waiting until the tired evening or trying to lump it all into a single day's work. The plants will be in the cool of the early morning and will send you your regular bread-baking job feeling many times better than that little extra effort.

Get up half an hour earlier than usual and do your garden work then, instead of waiting until the tired evening or trying to lump it all into a single day's work. The plants will be in the cool of the early morning and will send you your regular bread-baking job feeling many times better than that little extra effort.

The plants will be in the cool of the early morning and will send you your regular bread-baking job feeling many times better than that little extra effort.

THE PROPER WAY TO GROW SWEET PEAS

The proper way to grow sweet peas to their greatest perfection is to dig a trench six inches wide and a foot deep, as early as possible in the spring. Fill it with six inches of rich, loose loam and plant the seed three inches apart and one-half inch deep after soaking them in water. As soon as the seedlings are six inches high fill in with earth around them until only two inches of the plant shows. This treatment will insure more constant root development and more resistance to drought. Fill in from time to time until the bottom of the trench is level with the land. Pursh a support for the vines, either woven wire, branches, or a fence, and they will run up several feet.

Be sure that you pick all of the blossoms as soon as they are perfect and the plants will bloom from early summer until frost. If allowed to go to seed the plants will promptly cease blooming.

The Sweet Pea might well be our national flower. May it bloom for ever.

Garden in Hot Weather.

When hot weather visits us the fate of most gardens hangs in the balance. At this time, the garden needs our attention. The plants are in a dormant state, neither advancing nor retreating, worthless as food providers and certainly unattractive to the eye.

Get up half an hour earlier than usual and do your garden work then, instead of waiting until the tired evening or trying to lump it all into a single day's work. The plants will be in the cool of the early morning and will send you your regular bread-baking job feeling many times better than that little extra effort.

ARMY ROOPS GUARD AT INAUGURAL

MARIO MENCALI BECOMES THE PRESIDENT OF THE CUBAN REPUBLIC.

PRECAUTIONS ARE TAKEN TO PREVENT OUTBREAKS.

Chief Feature of Event is Receipt of Message From President Wilson—A New Era Is Promised.

Rigid military precautions were taken to prevent any revolutionary outbreaks on the inauguration of Mario G. Menocal, who succeeds Senator Jose Marti as president of Cuba. All guns were placed at strategic points.

Gen. Menocal is a conservative and his election caused grave fears because of the bitterness manifested by the liberals. An attempt was made to have the election declared unconstitutional, but it failed.

The ceremonies took an unusual interest because of the part played by the United States. A special mission came from Washington, representing President Wilson, and Dudley Field Malone, assistant secretary of state, brought a special message from the big republic.

In addition to those from the old countries, the United States still keeps up its military aid. The United States is sending its thousands into that new country of the north. They take up the free homesteads of 160 acres on the frontier for six months of each year for three years, and then get a deed or patent for a farm that is worth anywhere from \$15 to \$20 per acre. The purchase land is at from \$15 to \$18 per acre that will yield with proper care in cultivation, excellent returns for the time, work and money expended.—Adventurer.

Commercial Netting. It gives an interesting idea of the immensity of the international trade carried on in vessels to read that 55,000 tons of coal are consumed in a year in the furnaces of ships employed in international commerce.

And there are certain modern freighters that carry a cargo of cargo a mile by burning half an ounce of fuel, which means moving ten barrels of four a mile with a piece of coal the size of a hickory nut.

JUDGE CURED HEART TROUBLE.

I took about 6 boxes of Dods Kidney Pills for Heart Trouble from which I had suffered for 5 years. I had dizzy spells, my eyes puffed, my breaths were short and I had chills and back-aches. I took the pills about a year ago and have had no return of the trouble since. I am now 63 years old.

Judge Miller, able to do lots of manual labor, am well and hearty and weigh about 200 pounds. I feel very grateful that I found Dods Kidney Pills and I may publish this letter if you wish. I am serving my third term as Probate Judge of Gray Co. You truly, PHILIP MILLER, Cimarron, Kan. (Correspond with Judge Miller about this wonderful remedy.)

Dods Kidney Pills, 50c per box at your dealer or Dods Medicine Co., Buffalo, N. Y. Write for literature and hints, also music of National Anthem (English and German words) and recipes for dainty dishes. All 2 sent free.

Time Is Sometimes Kind. Father Time is not always a hard parent, and though he carries off none of his children, often lays his hand lightly upon those who have used him well, making them old men and women inordinately young, and leaving their hearts and spirits young and in full vigor. With such people the gray hairs do not bring the impressions of the old fellow's hand in giving them his blessing, and every wrinkle but a notch in the "time calendar" is a well-kept life.—From Barnaby Rudge.

Scientific Point Cleared Up. A German astronomer has published a series of tables which seem to show a connection between the appearance of sun spots and the wobbling motion of the earth on its axis, due, perhaps, to a variation in the sun's magnetism.

Literal Nomenclature. "Why do you call your sketch 'Wrinkles'?" "Because it is a head liner."

IN GIRLHOOD OR MOTHERHOOD. The women who have used Dr. Pierce's Favorite Prescription will tell you that it freed them from pain—often over painful periods in their life—and saved them many a day of anguish and misery. This tonic, in liquid form, was devised over 40 years ago for the womanly system, by R. V. Pierce, M. D., and has been sold ever since by dealers in medicine to the benefit of many thousand women.

Paralysis, Locomotor Ataxia and Nervous Diseases successfully treated. DR. F. HOLLINGSWORTH, 1615 Shaw Ave., Grand Rapids, Mich.

DAISY FILLER. Special attention given to the treatment of all cases of Nervous, Rheumatic, and other ailments. DR. F. HOLLINGSWORTH, 1615 Shaw Ave., Grand Rapids, Mich.

READERS. If you prefer, you can obtain Dr. Pierce's Favorite Prescription at your drug store at \$1 per box, also in 50c and 25c packages. Write for full particulars.

W. N. U. DETROIT, NO. 21-913.

1,000 SETTLERS A DAY

WESTERN CANADA MAKING REMARKABLE PROGRESS.

Settlers from the United Kingdom and other countries of Europe landed in Winnipeg last week at the rate of one settler a day. The predicted boom in the populating of the prairie provinces this spring has materialized, as it did last year, and today the busiest city in America is probably the Manitoba metropolis.

The great nations of Europe are all contributing to the rapid growth of Canada West. Two of the largest contingents reaching Winnipeg last week were from Germany and Scandinavia.

The British Isles are sending out larger contingents than ever before. The old newspapers are filled with accounts of send-offs and farewells being given to popular town-folk on the eve of departure for Canada.

Numerous editorials record the sentiments, bordering on despair, of the British who see their towns and villages desolated by the desertion of favorite sons and daughters. We can sympathize with those left behind while welcoming the young people who have their own way to make in the world, on their new opportunities in the country of a mammoth crop.

Women Are Constantly Being Restored to Health by Lydia E. Pinkham's Vegetable Compound.

"Worth mountains of gold," says one woman. Another says, "I would not give Lydia E. Pinkham's Vegetable Compound for all the other medicines for women in the world." Still another writes, "I should like to have the merits of Lydia E. Pinkham's Vegetable Compound thrown on the sky with a searchlight so that all suffering women could read and be convinced that there is a remedy for their ills."

We could fill a newspaper for the time the size of this with quotations taken from the letters we have received and sent you whose health has been restored and suffering banished by Lydia E. Pinkham's Vegetable Compound.

Why has Lydia E. Pinkham's Vegetable Compound accomplished such a universal success? Why has it lived and thrived and kept on doing its glorious work among the sick women of the world for more than 30 years?

Simply and surely because of its sterling worth. The reason no other medicine has ever approached its success is plainly and simply because there is no other medicine so good for women's ills.

Here are two letters that just came to the writer's desk—only two of thousands, but both tell a comforting story to every suffering woman who will read them—and be guided by them.

FROM MRS. D. H. BROWN. Iola, Kansas. "During the change of life I was sick for two years. Before I took your medicine I could not bear the weight of my clothes and was bloated very badly. I doctored with three doctors but they did me no good. They said nature must have its way. My sister suggested me to take Lydia E. Pinkham's Vegetable Compound and I purchased a bottle. Before it was gone the bloating left me and I was not so sore. I continued taking it until I had taken 12 bottles. Now I am stronger than I have been for years and can do all my work, even my house washing. Your medicine is worth its weight in gold. I cannot praise it enough. If more women would take your medicine there would be more healthy women. You may use this letter for the good of others." Mrs. D. H. Brown, 809 North Walnut Street, Iola, Kan.

Write to LYDIA E. PINKHAM MEDICINE CO. (CONFIDENTIAL) LYNN, MASS., for yours. Your letter will be opened, read and answered by a woman and held in strict confidence.

For DISTEMPER. Pink Eye, Epistaxis, Shipping Fever, and Catarrhal Fever. The most reliable remedy for these ailments. SPOHN MEDICAL CO., Sanktgerhausen, GOSSEN, IND., U. S. A.

W. L. DOUGLAS SHOES
