BEST—
For Every Baking
CALUMET
BAKING POWDER

Best—because it's the *purest*. *Best*—because it never fails. *Best*—because it makes every baking light, fluffy and evenly raised. *Best*—because it is moderate in cost—highest in quality.

At your grocers.

RECEIVED HIGHEST AWARDS
World's Pure Food Exposition, Chicago, Ill.
Paris Exposition, France, March, 1912.

You don't save money when you buy cheap or big-can baking powder. Don't be misled. Buy Calumet. It's more economical—more wholesome—gives best results. Calumet is far superior to sour milk and soda.

Henkel's

BREAD FLOUR—Very Best for Bread. You can buy none better, no matter what the name or price.

GRAHAM FLOUR—makes delicious Gems.

CORN MEAL—beautiful golden meal scientifically made from the choicest corn.

SELF RAISING PANCAKE FLOUR—the household favorite.

Flour

Food Screen.

I needed a place that could be thoroughly screened from flies to keep my left-overs. My husband with a few hole saw made two half circles, fourteen inches by six inches, out of a pine box; then nailed these ends with three pieces of quarter round, twenty-seven inches long, bought ten cents' worth of wire screen, tacked it over this frame, and screwed a little handle on top. Three or four dishes at one time can be put under this screen.—Exchange.

God Was Too Busy.

Little Jimmy was out walking with his nurse when he passed a house where the men were carrying out a casket. He asked his nurse what was in the box, and she told him that Mr. Brown's body was in it. That night when Jimmy went to bed he did not say his prayers, and his mother asked him why. He answered, "The Lord will be too busy unpacking Mr. Brown, and he won't be able to listen to me."

When you know how a man prays you know what kind of a God he believes in.

Yes, Alonzo, there's a vast difference between being cordial and drinking one.

PAINFUL, TRYING TIMES

Housework is hard enough for a healthy woman. The wife who has a bad back, who is weak or tired all the time, finds her duties a heavy burden. Thousands of nervous, discouraged, sickly women have traced their troubles to sick kidneys — have found quick and thorough relief through using Doan's Kidney Pills. The painful, trying times of woman's life are much easier to bear if the kidneys are well.

"Plenty Victory Tells a Story"

An Iowa Case

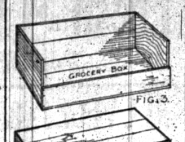
Mrs. J. Hunt, of Mt. Pleasant, Ia., says: "For many years I suffered from kidney trouble. I had severe backaches, headaches and dizzy spells, and my limbs swelled so I couldn't walk. Doan's Kidney Pills cured me and I have since had no return. I cannot praise them too highly." Get Doan's at Any Store. 50c a Box.

DOAN'S KIDNEY PILLS
FOSTER-MILBURN CO., BUFFALO, N. Y.

BOYS' HANDICRAFT

By A. NEELY HALL

Author of "Handicraft for Handy Boys" and "The Boy Craftsman"



A TOOL-CHEST AND A TOOL-RACK

If you received an outfit of tools for Christmas, or a few as the start of an outfit, one of the first things you should do is provide a receptacle for them—unless they came in a chest or cabinet.

A chest is very simply to make. A grocery-box or small packing-case about 28 inches long, 14 inches wide and 10 inches deep may be used, and one may be procured at the grocery or a dry-goods store for 10 or 15 cents. Select a box that is in good condition, and go over it and renail all boards that show signs of loosening; also drive in a few extra nails as additional reinforcement.

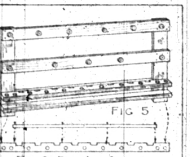
The chest shown in Figs. 1 and 2 has a drop-leaf in front, which makes it a big improvement over the common form of solid front, because you can reach down under the tray and get a tool in the bottom of the chest without having to remove the tray. One of the side boards of the box should be removed for the drop-leaf, and it should be hinged to the remaining portion of the side, as shown.

Batten the cover boards together upon the under face with two battens, as shown in Fig. 2. Then cut a number of strips two inches wide and three-eighths inch thick and make a rim for the cover, nailing the strips to the edges as shown in the drawing. Set the cover upon the top of the box, letting it fit the lower edges of the rim come, and at this point nail a band of the two-inch strips around the box. This will form a ledge for the cover to set upon. Hinge the cover in place as shown in Fig. 4, fasten a hinge-strap to the cover and a staple to the narrow band strip nailed to the drop-leaf; then, by throwing the hasp over the staple and slipping a padlock through the staple, not only the cover will be locked, but the drop-leaf will be also. Procure a pair of trunk-handles, with dowel-rods fits or drawer-pulls for handles, and screw one to each end of the box.

The tray should be made a trifle shorter than the inside length of the box, about one-half of the width of the box, and three or four inches deep, and a small strip should be tacked to each end of the box, inside, for a cleat to support the tray. Hooks and pockets may be fastened to the inside of the cover, to hold tools, and the bottom of the chest may be partitioned off with strips for the planes, saws, etc.

Stain the chest any color you wish to have it, making a stain of oil paint thinned with turpentine, and when this has been allowed to soak in give the wood a coat or two of shellac.

It is very handy to have a tool-rack back of the work-bench, or on the wall within easy reach of the bench, to hold tools between operations, and a simple form for such a rack is shown in Fig. 5. The lower shelf is intended to rest upon the bench-top. If you fasten the rack to the bench and it supports the ends of the shelf and other small tools dropped into the holes in the shelf directly above it. Cut the two shelves of equal proportions. Bore holes through the upper one, spacing them about as shown in Fig. 6, and then with a saw and chisel cut slots in the back edge of the piece and nail a narrow strip such as is shown in Fig. 6 to the shelf, to form a back to the slots (Fig. 5). Spools of various sizes should be screwed or nailed to the upper horizontal pieces of the rack, to hang tools upon.



If you fasten the rack to your bench, screw the lower shelf to the bench-top and the lower ends of the uprights to the back of the bench.

Do not leave your tools in the rack when you are through working. It will be too great a temptation for somebody to borrow a tool now and then, which they may forget to return to its place. Put everything away in your chest, and you will always know where to find it.

(Copyright, 1912, by A. Neely Hall.)

OLD TABLOID RECORDS FOUND

French Government Unearths 45,000 Tablets in Babylon—Show Inventions of Centuries Ago.

"We think we are a great people," said the retired army officer, taking off his glasses, "and we feel that we are progressing at a tremendous pace, but here's a newspaper account saying that the French government has unearthed in Babylonia 45,000 tablets, giving a history in full of the reign of the ancient kings. Here we find for the first time that Babylon, and not Rome, was the real 'Mother of Law.' In those days there was a system of courts and of appeals that even suggested a recall. Sir, this report also states that during the days of Nebuchadnezzar they had a free rural delivery of mail over every highway in the kingdom. And, shades of Grover Cleveland!—it has also been proved beyond a doubt that the Egyptian government in 4,500 B. C. had a perfected system of civil service. There is a record that the first turbine engine was invented by the Egyptians, and that Archimedes devised this mechanical contrivance by which the fields could be watered when the Nile was low. This is the same principle that is used to drive the latest additions to the Cunard fleet."

What shocked the doughty old American most of all was the information that four thousand years ago the phonograph was used in ancient Egypt, and was in reality only perfected by Edison in the nineteenth century. There is evidence also of the use of wireless telegraphy before the Christian era, while the Egyptian alphabet has proven to be a scientific key to organized human speech. It is a hard blow to our self-sufficiency to find that the banjo of the southern plantation with its fascinating "thrum" only echoes the musical instruments used by Egyptians in prehistoric times.—"Affairs at Washington," Joe Mitchell Chapple in National Magazine.

Still Unexplored.

All the opportunities for adventure are not over, though the north and south poles have both been conquered. In Africa there are 20,000,000 square miles of land as yet unexplored. In Liberia a tract of 20,000 square miles which is unknown.

Why He Did It.

"So your oldest boy has joined the glee club?" "Yes." "What caused him to take that step?" "I don't know, but, judging by sound, I guess it must have been melancholia."

For Cutting Noodles.

A shaft carrying a number of parallel wheels and provided with a suitable handle has been patented by an Italian man for cutting noodles evenly.

KEEPING THE CHILDREN COOL

Back Yard Shower Bath Which Freshens Them and Helps to Pass the Hot Days Pleasantly.

In Pasadena, a "bunch" of little children have the most delightful kind of a shower bath each afternoon and the suggestion may appeal to other mothers. Their back yard is completely surrounded by a luxuriant hedge of pomegranite covered in turn by the beautiful morning glories. About three o'clock the children undress in the house, putting on a regular bathing suit. Then each child grasps her own tin bathtub and with her slippers and pretty flowered Japanese kimono rolled under her arm makes a grand rush for the garden. The tubs are set down in any place desired, the slippers and kimono and bath towels hung up behind the garden door and the fun begins. Each child in turn gets the hose and plays it in the tubs and on each other until the tubs are filled and all the children soaking wet. Then each child makes for its own tub which is full of overflowing. Down they sit until just the curly heads and shoulders rise above the rim. Then father or mother come on the scene, the tubs splashing over are refilled and then the children, one by one, stand up and inflate their chests while the hose is turned directly on them. Brown as berries are these children, bright of eye and firm of muscle. A little longer splashing and out they jump one by one to strip rub down, and don slippers and kimonos for a little run about the yard before going in to dress for dinner.

How Tailors Sew on Buttons.

Tailors double their thread used to sew on buttons and make a knot and hold the knot in the teeth while they twist the thread, then they wax it and that keeps it twisted. Then they put a pin across the button, and after the buttons are sewed on they remove the pin and wind the thread around several times, making a kind of a stem. This makes it more easy to button the garment. The buttons on children's waists should be sewed on this way so more than one garment can be buttoned on the same waist.—Home Department, National Magazine.

London's Fog Expensive.

It is said the London taxpayer is put to an extra expense of $60,000 annually by reason of the prevalence of fog. One gas company alone furnishes gas to the value of $15,000 over and above the normal figure on a single day of fog. The suspension of traffic is another serious item.

Great Leaves of Palms.

There are palm trees growing on the banks of the Amazon whose leaves are from ten to twelve feet broad and from thirty to fifty feet long.

WOLVERINE NEWS BREVITIES

Manistee.—Nine Cadillac men were caught spearing trout at Wellston dam and brought before Justice Erb here, where they were each fined $10 and costs. Seven spears and 150 pounds trout were confiscated, and the trout sent to the county farm, being sufficient to furnish the inmates three good meals. The seizure was made by Wardens W. C. Kidder, R. S. Babbitt and W. M. Gaines. The men arrested were Leonard Singer, William East, Raymond Brown, Frank Bonner, James Rosalle, Frank Dolan, Edward Quackenbush, Frank Mellner and John Olson.

Jackson.—James J. Corbett, a well known farmer residing seven miles west of Jackson, committed suicide by shooting himself, members of his family finding his body. Corbett had been despondent for some time. He was well known in Jackson having at one time been a member of the police force. Last year he acted as superintendent of one of the Jackson prison farms. Mrs. Edwin Smith, Greenwood avenue, and Wm. Corbett, Fourth street, are children of the deceased.

Allegan.—The thirtieth annual convention of the Allegan County Sunday School association opened a two days' session at the Congregational church in Hopkins. E. K. Mohr, of New Buffalo, international purity superintendent; Mrs. Edith Washburn, of Benton Harbor, member state elementary committee, and George S. Shackleton, president of the Kent County association, were the principal speakers.

Albion.—The two young men students in Albion college who were recently called upon the carpet by President Dickie for playing tennis upon one of the college courts on Sunday are to be punished in a manner most peculiar. The case was given into the hands of the student senate by Doctor Dickie and the senate has agreed that for the remainder of the school year they are to attend both church and Sunday school every Sabbath.

Cadillac.—After deliberating 12 hours a jury returned a verdict of guilty against Dr. R. Brodeur, of this city, who was charged with furnishing an illegal liquor prescription to M. Wolfe. Evidence was introduced to show that Doctor Brodeur diagnosed Wolfe's case only by observation. He has not been sentenced. The case is said to have been the first of its kind in Michigan.

Benton Harbor.—Trying out a hydroplane of his own invention, Jack Hale nearly lost his life in the ship canal. The craft was speeding at 20 miles an hour, with the inventor at the wheel, when a chain suddenly broke and tore a hole in the bottom of the boat. It immediately began to fill, but Hale piloted it ashore in time to keep from drowning.

Bessemer.—Fire destroyed the boiler room at shaft house No. 9 of the Tilden mine. Hundreds of men were put to work to keep the fire from getting down the shaft into the mine. Machinery and building loss amounts to over $50,000. Had the fire got into the mine the loss would be several hundred thousand dollars. Friction on the hoisting cable caused the blaze.

Bay City.—George Herbolsheimer, aged thirty-one, and unmarried, committed suicide by hanging himself to a tree in a clump of woods near his home. His father, John Herbolsheimer, discovered the body and removed it to his home. Herbolsheimer was recently the victim of a runaway, in which he sustained an injury to his head.

Iron Mountain.—Isador Pancheir was shot and killed near Norway, by Richard Bacos. The shooting was the result of a quarrel over a woman, it is alleged both men had been paying attentions to. Bacos attempted suicide immediately after he had killed Pancheir, but none of the three bullets which he fired into his body were serious. Bacos was immediately removed to a hospital, later being taken to the county jail at Iron Mountain.

Saginaw.—T. Dalley Moore, for more than fifty years a resident of Saginaw, is dead at the age of seventy-five years. He was a Civil war veteran. He was wounded in the battle of Gettysburg. For 20 years he was chief of police, retiring at consolidation 29 years ago.

Allegan.—Mildred, the nine-year-old daughter of Mr. and Mrs. John Kraft, of Watson township, was shot by her brother Joseph, the ball dying instantly. He had a rifle out shooting rats and it was purely accidental.

Lansing.—Governor Ferris has paroled Charles Miller, sentenced from Calhoun county, September 29, 1909, to serve from one to five years at Jackson for larceny. Miller recently saved the life of a guard during trouble at the prison and his parole comes as a reward.

Corunna.—A. M. Walsworth, superintendent of the Corunna schools for the last two years, has resigned to accept the superintendency of the Mt. Pleasant schools. He will finish the present school year in Corunna.

Battle Creek.—Word has been reached in this city of the successful arrival of Dr. and Mrs. H. L. Canright, former resident of Battle Creek, at Cheng Tu, China, where they will take up medical missionary work under the direction of the American Methodist church.

Port Huron.—Medical inspection of school children will be instituted in Port Huron at once. Final action towards the end was taken at a meeting of teachers and physicians.

CONSTANTINE MAN OF ACTION

New Grecian Monarch Has Proved Himself Worthy of the Crown He Has Inherited.

Constantine, the new king of Greece, is of Danish and Russian blood, his father having been a son of Christian IX. of Denmark, and his mother being the eldest daughter of Grand Duke Constantine, a brother of Alexander II. King Constantine was born in Athens and brought up under an English governess and German and Greek tutors. Later on he went to Berlin, where he received his education as a soldier, being attached to the Second regiment of Prussian foot guards. In 1897 he took command of the Greek troops in the war with Turkey, but his army was crushed in Thessaly. In April last he was appointed inspector general of the forces, and has since shown himself a soldier of merit. At the moment of his accession he was in Epirus, conducting the military operations for sweeping the Turks out of that province.

Exquisite Agony.

"It was, to say the least of it," a London letter remarks, "just a little bit awkward that the electric light went out the other evening at the town house of a presumably wealthy widow who had been doing a good deal of political entertaining. The guests, to the number of a dozen, had just finished their soup when the unfortunate incident occurred. The scramble to find a sufficient number of candles so that the dinner might proceed was attended with a great deal of difficulty and no little amusement. The butler, who is by discretion as being a bit new to his job, was immediately told to telephone to the electric company, report the catastrophe and demand attention to the matter. It was a trying moment for the guests when he returned to the dining room and announced in real Cockney accent: 'Please, my lady, the gentleman what's on the telephone says they sent several warning letters unless the account was paid active steps would have to be taken.'"

DANDRUFF COVERED SCALP

3002 Cass St., St. Louis, Mo.—"For five years I suffered with itching of my body and scalp. My trouble began with a rash on my lower limbs which was very annoying, and my scalp was literally covered with dandruff. My hair used to come out by the handfuls and the itching of my body and scalp was terrible. I had used almost all the skin remedies on the market with no avail, when I wrote for a little Cuticura Soap and Ointment and it gave me instant relief. Within one month's use of the Cuticura Soap and Ointment parting, gently rubbing Cuticura Ointone strand of my hair coming out and I have not lost a minute's sleep since using the Cuticura Soap and Ointment, which entirely cured me of itching of my body and scalp in its worst form. I also find the Cuticura Soap a benefit in shaving." (Signed) Charles Judith, Dec. 8, 1911.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. L, Boston." Adv.

Ignorance Disgusted Waitress.

Assistant District Attorney Clark was conducting a case in the criminal court. A large, rough-shouldered negro was in the witness chair. "An' then," said the witness, "we all went down in the alley, an' shot a few crap." "Ah," said Mr. Clark, swinging his eyeglass impressively. "Now, sir, I want you to address the jury and tell them just how you deal craps." "Was that?" asked the witness, rolling his eyes. "Address the jury, sir," thundered Mr. Clark, "and tell them just how you deal craps." "Lemme outen heah," said the witness, uneasily. "Firs' thing I know this gemman gwine ask me how to drink a sandwich."

Church on Historic Site.

St. Alban's church, London, which occupies the site in Brook street of the thieves' kitchen described in "Oliver Twist," is to celebrate its fiftieth year of existence on June 22. From the date of its foundation it has had the faithful "Father" Stanton watching over its destinies.

CANADA'S OFFERING TO THE SETTLER

THE AMERICAN RUSH TO WESTERN CANADA IS INCREASING

Free Homesteads in the new Districts of Manitoba, Saskatchewan and Alberta there are still millions of acres of Homesteads to be had free by settlers who must be more than 18 years of age, and can get within 9 years title to 160 acres each. Entry must be made personally at the Government Agency for the district. Certain duties must be performed as to residence, cultivation, etc., but these are easily carried out.

EXCELLENT RAILWAY FACILITIES

In many cases the railways in Canada have given special reductions to settlers, and in a short time the settler will be a settler who must be more than glad to pay the full rate of railway. Railway Rates are given in Government publications.

Social Conditions

The American Settler is at home in Canada. Many of the best farmers in Canada are Americans. A stranger in a strange land, having settled in a district full of his own people is shortly settled there. If you desire to learn more about the Canadian Settler in Canada, write for literature, Railway Rates, etc., to

M. V. McInnes,
176 Jefferson Ave., Detroit, Mich.
Canadian Government Agent, or
W. H. Rogers, Supt. of Immigration, Ottawa, Canada.
