

Lighten the Housework

A plain iron sink returns very little for the effort spent upon it. A few minutes spent in cleaning a "Standard" white enameled sink and you have a veritable beauty spot of radiance.

Our catalogue of sinks is very interesting with its wall hanging, corner and recess patterns. It is free to all interested in good plumbing and good fixtures.

Royal Sheet Metal and Heating Co.

OFFICE AND WORKS
ROYAL OAK, MICH.

TROY

Ray Butting is working near Birmingham.

John Shearman is the new clerk at the Cutting store.

Maxwell Carter leaves for the U. of M., September 20.

Mr. and Mrs. William Schweld have commenced to build an addition on their barn.

Mrs. Chapman of Toledo and her son Elmer is the guest of Mr. and Mrs. Joseph Croft, who are visiting their many friends around Southfieldburg.

SMART FALL GOWN.

Not Hard to Put Some Dainty Hand work on the Front of Husband's or Brother's Silk Shirt.

A man doesn't like "fussy" things but he'll appreciate a bit of handwork on the front of his silk shirt. Ask him! No "Noon-surprise" hits!

If you are afraid that you can't make the shirt outfit, buy one from his haberdashery. The material best suited for the purpose is striped-colored stripes about an inch apart on a white ground—so be sure that you get his favorite color. Most men are fond of lavender. Now stamp in the center of the white ground between the colored stripes, about two inches apart. This design not large than a ten-cent piece down the front. There is a tiny round five-petaled flower with-out foliage or stem and with a solid dot to fill the center space where the petals meet that is neatly drawn or stamped by even the novice, and looks well. If preferred, one can use the most difficult downward or four-dot-line for the design well and work them in white silk floss. Floss the color of the stripes may be used, but it is rather conspicuous. There is a quiet elegance about the white on a white ground that most men would prefer. It is necessary to embroider only that part which shows when the coat is unfastened. Of course, a hand-embroidered monogram upon the left sleeve pleases the wearer still more—Philadelphia North American.

PLEASE HIM WITHOUT FUSS

Not Hard to Put Some Dainty Hand work on the Front of Husband's or Brother's Silk Shirt.

A man doesn't like "fussy" things but he'll appreciate a bit of handwork on the front of his silk shirt. Ask him! No "Noon-surprise" hits!

NEW Sashes.

To the invention of new sashes there seems no end. These long lengths of supply material are an absolute rage in Paris, and they are worn by women and girls of all ages. Some of the newest sashes are tied directly in front, in a large, full, low, deep bow, and they are tied at the ends; others, again, are wound round the hips in Fatima fashion and simply knotted at the back.

All the art shades of blue are in demand for these sashes, especially the blue known as Madonna.

For wearing with pure white dresses we find smart sashes of printed gauze which exploit various shades of red in terminated with touches of black and deep blue. These are the sashes of this season are fringed in order that they may fall heavily.

Model of brown and white striped wool cloth with collar, vest and belt of brown poplin.

Chiffon Motor Bonnet.

Among the attractive new automobile caps is one of two thicknesses of chiffon, made like a sunbonnet. The chiffon is green and blue and is striped over a wire frame which fits closely about the head and flares out over the face. The inside of the bonnet is blue and the outside is green.

Radia is also used for automobile bonnets. A prettily patterned cap is woven of colored straw and is mounted over a shirred foundation of colored silk. A trim of the silk about the face and neck softens the effect of the radia. A wire frame which fits closely about the head and flares out over the face. The inside of the bonnet is blue and the outside is green.
