FOR IMPROVEMENT IN

Them That a "Clearing.
"Might Help to Smooth
Away Difficulties.

The subject of car shortage has for rears laterested railway officials, but as yet ino general policy has been adopted. Every harvest season, and every season for the shipping of great quantities of winter fuel, finds the rail-roads more or less unprepared because of a scarcity of cars. This condition has led to many investigations and numerous recommendations. The erral years ago, endeavored to correct the demurrage rules, but some rail-road men felt that thereby the situation was made more difficult.

J. R. Cavanugh, an Indianapolis

road men felt that thereby the situation was made more difficult.

J. R. Cavanaugh, an Indianapolis railroad man, recommends, in the Trans. World, the pooling of relations of the state over all the freight cars in the courty. Ownership would remain the same, but management would be centralized. The clearing association would operate under the rules of the American Railway association, would American Railway association, would country and would be enabled to act country and would be enabled to act country and would be enabled to act antionally instead of locally. The idea is to equalize car intercharge. There are many thousands of cars idle in one place when they are needed in another. It would be the new association's purpose to remedy this condition.

polish was used as food slong byth the rice the disease was lessysted in the rice halfs contained mourtaining to Meyers. Kiter Hardie and Williams Crooks, admitted that in the day the rice halfs contained mourtaining to Meyers. Kiter Hardie and Williams Crooks, admitted that in the day the rice halfs contained mourtaining to Meyers, there had three meals a day, he found them bright and intelligent and being developed physically and mentally in a satisfactory way." Although, the children lived at home the regular and wholesome supply of food was so potentially alles actively way. The commissioners noted this contrast between the Illicourished elements and wall-dren of respectable parents and well-dren of those who has a "active to the same and was a proposition of the same and the same and the same and the same and the sam

Titanium-Steel Ralis.

Titanium-teel ralis for railways were first made experimentally seven years ago. The results then shown led to their manufacture by several steel companies, and about five years ago their manufacture was undertaken upon a commercial scale.

Experiments on the New York Central have confirmed those made elsewhere in showing that these ralis weary ordinary Bessener steel. Titanium has a great affinity for nitrogen and this property makes it desirable for railway purposes.—Popular Electricity.

Railroad Porters' Complaint.

"Mister Porter' must be the form of address used by passengers on the Great Western and the London and Northwestern companies in the Warwick and Learnington district, when they address the railroad porters. The men are of opinion that they are not treated with proper respect by the officials of the company, and consequently have passed a resolution saking the union to agitate that they should be afdressed as "Mister," similarly to the clerks, and not merely by their surnames.

illions Poured Into Trans-Siberia Railroad Have Had a Very Definite Object.

Object.

There is a railroad from the North sea to the Japan sea. It was built by a nation to capture nations. It has failed of its purpose so far. The Transfalled of its purpose so far. The Transmet grant of the sea of

\$150,000,000.

If that were only a railroad, it would be the greatest railroad mystery of the siges; but it is not only a railroad. It is like the army and the nayy of Russia. It is a national expenditure. It is like the army and the naxy of Russia. It is a national expenditure for the conquest of Asia. Some day, no doubt, when the coffers of Russia are filled again with gold, the rest of the story of the Trans-Siberian will be written, Probably the men who are doing the dreaming will not live to see the writing.—C. M. Keys in the World's Works.

London—Emperor Nicholas has con-ferred the Order of St. George, third class, ong Grand Dukes Nicholas, com-mander-in-chief of the Russian forces, and the same order, fourth class, on Captain Martinoff.

Captain Martinoff.

London—Captain John Jacob Astor,
First Life Guards, son of William
Waldorf Astor, has been wounded in a
battle in France. His name appears
in the list of casualties made public
Tuesday night.

London—To frustrate the attempts of hostile craft to reach London, sov-eral additional channels in the Thannes were closed Tuesday by grider of the British admiralty. Some of this channels were closed last week. Within cer-tain limits vessels at anchor in the river must not show lights at night.

London—In a British casualty list issued Friday but dated October 18 shows 10 officers killed, including Lieutenant Sir R. G. V. Puff, of the Second Life guards and 29 wounded.

London—The American mission for Belgian relief Friday received from the Belgian minister in London, Count De La Laing \$500,000 taken from the Belgian relief funds entrusted to the minister. The commission is now pur-chasing food and supplies with this

Memoirs of Napoleon In Three Volumes

The personal reminiscences of Baron de Ménoral, for thirteen years private secretary to Napoleon Bonynarte, bring out, as no history can, many enlightening and interesting side lights on the character of that gratater of leaders. De Ménoral's descriptions have the higuancy and interest possible only because he way an actual eye-witness of the scenes and unicidents of which he writes. Their reliability and historical interest can be judged by the fact that the very conservative French Academy publicly recommends them.
