

WOMAN WHO WON'T GIVE UP

Though Sick and Suffering; At Last Found Help in Lydia E. Pinkham's Vegetable Compound.

Richmond, Pa.—"When I started taking Lydia E. Pinkham's Vegetable Compound I was in a dreadfully run-down state of health, had internal troubles, and was so extremely nervous that if I had given in I would have been in bed. As it was I had to really struggle at times to be on my feet and what I did to was by a great effort. I could not sleep at night and of course felt very bad in the morning, and had a steady headache.

"After taking the second bottle I noticed that the headache went so far better, and my nerves were stronger. I continued its use until it made a new woman of me, and now I honestly realize that I am able to do so much as I do. Whenever I know any woman in need of a good medicine I highly praise Lydia E. Pinkham's Vegetable Compound and I."

FRANK CLARK, 3146 N. Tulip St., Richmond, Pa.

Women Have Been Telling Women for forty years how Lydia E. Pinkham's Vegetable Compound has restored their health when suffering with female ills. This accounts for the enormous demand for it from coast to coast. If you are troubled with any ailment peculiar to women why don't you try Lydia E. Pinkham's Vegetable Compound? It will pay you to do so. Lydia E. Pinkham Medicine Co., Lynn, Mass.

GO TO WESTERN CANADA NOW

The opportunity of securing free homesteads of 160 acres in the best of the low priced lands of Manitoba, Saskatchewan and Alberta, will soon have passed.

Canada offers a hearty welcome to the settler, to the man with a family looking for a home, to the farmer, to the renter, to all who wish to live under better conditions.

Canada's grain yields are the talk of the world. Lustrant Grasses give cheap fodder for large herds; cost of raising and fattening for market is a trifle.

The sum realized for Beef, Butter, Milk and Cheese will pay fifty per cent on the investment.

Write for literature and particulars as to reduced railway rates to Superior and to tickets of Immigration, Ottawa, Canada.

M. W. McDermott, 175 Astor St., Detroit, Mich. Canadian Government Agent.

The Army of Constipation

Is Growing Smaller Every Day. CARTER'S LITTLE LIVER PILLS are responsible—they not only give relief, but they permanently cure constipation. Millions use them for Biliousness, Indigestion, Sick Headache, Sallow Skin.

SMALL PILL, SMALL DOSE, SMALL PRICE. Genuine must bear Signature.

Small illustration of a person and a bottle of Carter's Little Liver Pills.

Donald, though college. But that was before old Michael's strength began to fail.

A month later Donald took his place in the mill. Sullenly acquiescent, he took up the burden of supporting the home. The engagement had been announced, and Katherine, who his girl came to the house, took her chin in his hands and looked into his eyes.

"Do you understand what marriage is going to mean to you?" he asked grimly. "The never ceasing toil, the struggle to keep things going? Have you got to meen to you?" he asked grimly. "The never ceasing toil, the struggle to keep things going? Have you got to meen to you?" he asked grimly.

Tears of dismay came into the girl's eyes. With a muttered apology Michael circled his arms about her and she was queer; it was no trying to exhibit an old man's pessimism to youth.

"Michael," exclaimed his wife one morning, when he hurried home for his lunch, "there's a gentleman waiting in the parlor for you."

"For me?" inquired Michael. "Who is he?"

"He says he's a lawyer from Philadelphia," Katherine answered, and Michael, dressed in a vest and tie, came forward and shook hands briskly.

"You are Mr. Michael Peters?" he asked.

"I am, sir," answered Michael.

"What was the name of the brother you let in New York some thirty years ago?"

"My brother's name was Phil, sir. But I haven't heard of him since I came here."

"He is dead," said the lawyer. "And he has left you all his money—five thousand dollars."

Michael sat silent, feebly. "You're sure, sir?" he inquired.

The lawyer smiled and pulled a document out of his pocket. "Sign this," he said, "and the money is in your hands within twenty-four hours. Happily there is no doubt of your identity. By the way, are you entitled to be buried? I shall be happy to offer my advice."

"I'll take it first, to see what it looks like," said Michael. "Then maybe I'll buy a little medicine."

"Well, you must suit yourself," the lawyer answered.

AS WHISTLE BLEW

By HAROLD CARTER. Five in a circle, the whistle had blown old Peters arrived home from the mill. He came softly into the cottage and flung himself down on the large imitation leather instanter chair. From the kitchen came the smell of cooking. Presently his wife looked into the room and she asked: "That was the invariable greeting. For nearly forty years Michael Peters had worked in the mill. He had been the best of his life and strength, and though he held a position as foreman there, and earned fair wages, he had been a convict on an unalterable loathing for the place.

His life was regulated by the whistle. It called him from his bed, called him to his lunch, called him to work, and dismissed him with a blast at five o'clock in the evening. There had been a time, many years before, when he had been languid, but there had long ago been ground out of him in the remorseless machinery of that consumer of men.

At six o'clock next morning Michael leaped out of bed when the whistle blew, as gaily as a boy.

"I guess you're right, my dear," old Michael answered. "I can make an old leg lead moving for a few years longer yet."

At six o'clock next morning Michael leaped out of bed when the whistle blew, as gaily as a boy.

"I guess you're right, my dear," old Michael answered. "I can make an old leg lead moving for a few years longer yet."

At six o'clock next morning Michael leaped out of bed when the whistle blew, as gaily as a boy.

"I guess you're right, my dear," old Michael answered. "I can make an old leg lead moving for a few years longer yet."

WORKED HARD ALL YOUR LIFE, AND I GUESS YOU'D BE ABLE TO TAKE LIFE EASIER NOW. A LITTLE FARM DOWN SOUTH WITH A GIRL TO HELP YOU.

Katherine wept. "What's the matter, woman?" inquired old Michael irritably. "You always said you wished to go to the country in your old age, and here we are with the chance to do so out of nowhere. Why don't you laugh?"

"Katherine was looking at him with a tender smile upon her lips; but he had not seen in many a year.

"Michael, dear," she said, going over to him and placing her arms around him, "I know what's in your mind."

"What is it, then?" he growled.

"It's giving a chance to Donald," she answered, "but he's a young man, two old people and not likely to live long. It wouldn't be right to keep the money, dear. That's what you're thinking of."

"Well, what if it is, woman?" cried Michael.

"It's a college course for the boy, and maybe enough to get him to start a home for him and his wife. O, Michael, doesn't it give you happier to think that we can give Donald his chance to live?"

"I guess you're right, my dear," old Michael answered. "I can make an old leg lead moving for a few years longer yet."

At six o'clock next morning Michael leaped out of bed when the whistle blew, as gaily as a boy.

WHEN LAMBS BEGIN TO COME IN SPRING

The young lambs will begin to come along pretty fast now and if you have kept a record of the service you should know exactly when each lamb should drop her lamb. From 145 to 152 days from the time of service the lambs should be dropped. If you have taken good care of your ewes by feeding them on a light ration of corn, stover, bran, fine clover hay and a little oil meal toward the finish, you may reasonably expect a good crop of lambs.

The good shepherd will see to it that his lambs are entirely free from ticks at least six weeks before lambing time the ewes should be very carefully examined and if there is any sign of ticks they should at once be dipped. Place the ewe on its back, put the wool along the belly, and pour on the dip solution so that it will run down and cover the entire back. Do not keep the ewe on her back too long, but place her on her feet, part the wool along the back and pour some of the solution on so that it will run down and meet that from the belly. It is a bad plan to allow lambs to come when the mother is covered with ticks.

There is no such thing as raising lambs, or rather, of bringing them into the world in good condition. When the mother makes good care of her lambs she is likely to have a good crop of lambs. When he does not he will likely have a poor crop of lambs.

The breeding ewes should always be separated from fat sheep and wethers, and in no case should the lambs be allowed with them previous to lambing time. Hurdles four and five feet long should always be in readiness so that the ewe and her lamb can be kept in the hurdles for the rest of the flock. This is especially important with twins, because if one of the lambs should become separated from the ewe she will not claim it again.

Always arrange your pen so that a ewe will never have to jump over a high board or run against sharp corners. She should always have plenty of exercise and access to water and salt.

In order to give exercise it is a good plan to place feed and salt some distance from the fold in order that they will go to it.

If you have not already provided your lambing quarters divide one of the horse stalls on some other warm place in the barn which you can be kept warm and cared for.

The wise shepherd will never leave his flock day or night during the actual lambing season, and he will have a hired man or pig after them in the day time and attend to them at night yourself.

Do not attempt to assist the ewe too much in lambing. Let nature take

WORMEN OBSERVE THE RULE

regulations of Farmers, However, Do Not Prevent Them Getting Their Accustomed Beverage.

In the lower section of Manhattan a new office building is in the course of erection. Hundreds of men, ironworkers, carpenters, plasterers, etc., are employed. The majority of these men are from the city of New York, and the women of the different gangs combined and agreed to issue the following order:

"Ewe will be allowed only once a day, and that is at noon time, and one man is to go for it."

Now, persons who happen to be in the vicinity of the building around 11:45 o'clock see a very curious sight. It is this: A man emerges from the newly finished building with about four beer cans on one arm and a large butter tub embraced in the other. He starts in the direction of Church street and in two minutes he can be seen on his return trip with the beer cans overflowing on one arm and the butter tub still firmly embraced and filled to the top.

Wrong Sign.—I've tried my best to attract the women to this place and they simply won't come. Salesman—No wonder! Your sign queer the trade.

Manager (heavily)—What's wrong with the sign?

Salesman—I reads: "The Big Shoe Store."—Lippincott's.

Raw Fur. We pay highest market prices for raw fur. We pay highest market prices for raw fur. We pay highest market prices for raw fur.

Do not try to kill time. Time can stand the racket longer than you can.

One can land a double life on a single salary, but it is a lot of trouble.

Good lambs cannot be produced without heavy feeding. Of course, care must be taken to keep their bowels in good condition and everything that suggests itself to the intelligent feeder must be done.

Examine the lambs carefully and if they show any signs of ticks they should be dipped thoroughly. It does not pay to waste good food on fat ten ticks.

FERTILITY MEANS VALUABLE ASSET

Qualifying Conditions of the Soil Are in Great Measure Under Control of Farmer.

The fertility of the soil is not like a bank account which can be drawn out at one or more times or at will of the depositor, says the American Cultivator.

The soil is an investment which can only be charged against the crop just as much as that added in way of manure or chemicals.

Our experience in footing the cost of production we have charged the loss of plant food against the crop grown in proportion to the yield in the legumes which we charged to the control of the farmer, inasmuch as no plant has the ability to make something out of nothing, each crop grows of necessity must take available plant food out of the soil which never come back in most cases.

In figuring the cost of production, the value of the plant food which is charged against the crop just as much as that added in way of manure or chemicals.

FEEDING TEST AT KANSAS STATION

Found That Colts That Had No Oats Are in Better Condition Than Others With Grain.

Strong, healthy draft horses can be produced without oats. After more than nine months, in a feeding test at the Kansas station, colts that have had no oats are in better condition than those which ate this feed, and have made a little better gain.

The saving in cost of feed is 20 per cent. The actual weight of 400 cubic feet of roughage—straw, corn fodder and pasture.

One lot has been fed oats every day and the other had a combination ration, 70 per cent corn, 25 per cent bran and five per cent oil meal. One pound of this mixture contains the same digestive elements as one pound of oats. Also, from the standpoint of energy value, the two feeds are equal, pound for pound.

The test shows a farmer can better afford to feed the mixed ration, with corn at 85 cents a bushel, bran at 30 a ton, oil meal at 15 a ton, than oats at 50 cents a bushel.

Rules for Estimating Hay. When a cow is so fond of ensilage that she must be watched or she will find her way into the silo it looks as though this food was a good ration for her.

Remove the Roosters. There are a few old male birds should be removed from the flock.

Give Milk More Readily. Cows give down the milk much more readily if kept in a good humor.
