Michigan held fine. Discovered the Michigan held fine. Discovered the
production of Minnesoth has been
much greater than that of Michigan.
The main centers of trom mining are
ishpening and Negaunee on the Marquette range. Norway, Iron Mountain,
Crystal Palis and Iron River on the
Mendimner range, and Bessemer and
Ironwood on the Goegobic frange.

As old mines fare abanded discovertes of ore and pithough Michigan has
been mining iron ore for nearly seventy years there still remains in the
ground ready for mining aimost, if
not quite, as much iron ore as has
been produced in all preceding years.

In other words more over is developed
and discovered each year on the average than is mined that year, and

age than is mined that year and s' the present time the outlook is ec-ceedingly encouraging for an indefi-itery long and prosperous period of iron mining. Michigan produce normally from 10,000,000 to 13,000,000 tons of iron ore annually and it is e-pected that this production will mu-terially increase in subsequen-vears."

The M. A. C. faculty and state board of agriculture has passed favorably upon the plan for a summer school at the college and the courses, which consist of an undergraduate and grad

Auditor General Fuller received \$970 in specific taxes from the Arcadia & Betsy River railroad company today. The Arcadia & Betsy River railroad is the first public service corporation assessed by the state tax commission to pay its 1912 tax.
