HAVE AGREED ON MANY TERMS

It is Thought That Huerta Has Given Consent to the Program So Far Outlined by the Niagara Conference.

An early agreement is now looked for.

The situation was summed up in the following announcement by Justice Lamar, on the authority of the mediators: "We have begun to discuss the actual terms and details of a plan of pacification. On a number of them, we found ourselves in substantial agreement. Others are still under discussion and as to them there has been no disagreement. It would, of course, be improper for us to specify the particular points we have discussed or those we will consider further."

From the mediators themselves it was learned that some of the vital points involved in the mediation are understood to include the manner in which the present regime in Mexico City would give way to a new provisional government. That Gen. Huerta had given consent to the program thus far outlined was one of the reports, from reliable sources, on which some of the optimism displayed was believed to be based.

No matter how plain the taste of a successful dresser, 50 matter how unobtrusive (not to mention unobtrusive) her gown, just get a glimpse of her feet, and the chances are that you will wonder at the amount of style and beauty she has managed to accomplish in her shoes.

In the matter of footwear there is a demand for fine finish, elaboration in design, and general elegance of appearance that is spreading like news of war or the dancing craze. It keeps the designers and manufacturers of shoes on the anxious seat, ever alert to keep up with it. Many of leisure and midday of busy days are asking for a few little things in this particular article of apparel. Her shoes must be shaped, substantial, becoming, well-made, of the extraordinary, exquisitely finished, elaborated with contrasting materials and ornaments, and of all things, comfortable. For who could tango in an ill-fitting shoe? Perhaps it is the craze for dancing that has brought about this fastidiousness; if so, there is one thing in its favor, at least.
