poudence with the U. S. government. Today that same token presented to the village by such loyal hands lies in six finches of grass on the front (eastern) grounds of our high school, a broken, shameful sight, even the cement base is cracked.

It is said this is the third time this evalues detaction of evaluations.

It is said this is the third time this careless destruction of government property has been dond. Go and have a look at it. If you do not blush with shame for the heedlessness of our board of education for the lack of care of our histororieal gun, for the village council to whom the gun was given then you should surely be in the extreme farther corner of the Mexican country.
