JOHN WEIER OF ELMER E. COWAN

How Can One Man Milk 25 Cows Per Hour?

By Using the

reduces the cost of the operation very decidedly It is very economical, costing from \$1.00 to \$1.50 every year—and that is for rubber mouth-pieces and pump valves.

The average man can handle three machines to best

advantage, milking three cows at a time and from 20 to 25 cows per hour, by using the extra pail.

There are exceptions to this, as we have some cus-tomers using five and six machines, milking from 40 to 50

Cows.

If you are interested (and anyone having a cow to milk should be, and the more cows he has to milk the more he should be interested), should call on us for full information.
