

Libby's Hot Weather Meats

Veal Loaf, to serve cold: Cooked Corned Beef, select and appetizing. Chicken Loaf, Ham Loaf and Veal Loaf, delicately seasoned. Vienna Sausages, Canned Deviled Ham and Water Sliced Dried Beef for sandwiches and dainty luncheons.

Libby, McNeill & Libby, Chicago

Business Opportunities

Do you know that one of the most profitable lines of trade in a Bullard is... **BUILT FORTUNE ON THUMB**

German Surgeon the Fortunate Possessor of Digit That Had Remarkable Peculiarities. Not long ago a famous physician in Saxony, Doctor Metzger, celebrated his seventieth birthday. He had been retired from active practice for some years, owing to the fact that he had become immensely wealthy through the use of the wonderful thumb of his right hand. This thumb stands out at a right angle from his hand, and it is said, cannot be bent back automatically. He soon found it of great service in his massage, and when he became a specialist in intestinal disorders he was called as assistant to the greatest surgeon of Europe, bringing relief to many illustrious patients.

The queen of Romania sent for this doctor with the curious thumb when she suffered from neuralgia, while the late king of Sweden once drove a beautiful span of horses over the border of his kingdom to consult the doctor and on returning left the horses as a token of gratitude to his preserver. There was a time, early in his career, when the use of this curious thumb was looked upon as a form of charlatanism, but so well did Doctor Metzger establish his reputation that the medical profession accepted his thumb for what it was worth, without trying to explain the phenomenon.

A Suggestion. Mrs. Scrapp—I've talked to you till I'm weary. Scrapp—Why not shut up for a while?

What a New. "What a new opportunity, pa?" "What diamonds on the right hand?"

The Judge Says

Put a package of these real corn flakes—these **New Post Toasties**

on trial beside a package of any other corn flakes on the market. The jury will bring in a verdict of "guilty" guilty of being the finest corn flakes ever made.

The New Post Toasties are crisp and appetizing, with a true corn flavour, and they don't mush down when milk or cream is added.

But here's the real test. Take a handful, fresh from the package, and eat them without cream or milk. Mighty good, aren't they?

Notice the little "puffs" on each flake—a distinguishing characteristic resulting from the new method of cooking and toasting, which also brings out and enhances the wonderful, true corn flavour.

Your Grocer has the New Post Toasties. Try them and bring in your verdict—

"Delicious"

LETTER FROM THE STATE CAPITOL

BANKS AND TRUST COMPANIES SHOW GOOD GAIN SINCE MAY-REPORT

GOOD SHOWING FOR YEAR

Railroad Statistician Makes Report Showing Number of Persons Killed and Injured on Lines Last Year.

(By Gurd M. Hayes.) **Legislature**—Since the last report made by the state banking commission May 18, Michigan state banks and trust companies show a gain of \$16,812,927.38 in aggregate balance according to statistics compiled by State Banking Commissioner. The total amount of the loans and discounts of the savings and commercial departments amounted to \$169,490,957.27, while the total mortgage and securities amounted to \$1,379,556,737. Commercial bonds and mortgages increased \$1,297,738.65, savings bonds and mortgages increased \$2,164,377.98.

During the last three months commercial loans had increased \$10,574,080.22, while savings deposits have increased \$5,227,607.11, making a total increase in deposits of \$15,801,737.33.

A comparison of the report submitted by the banking department a year ago shows an increase in commercial loans and discounts of \$1,048,000 and mortgages of \$5,653,670.97 and an increase in savings bonds and mortgages of \$2,034,216.94.

During the past year commercial deposits have increased \$20,328,882.41, and savings deposits have increased \$1,853,838,667.27, making a total increase in deposits of \$22,182,720.68. The total reserve maintained by Michigan state banks and trust companies was \$61,114,441.47, or 27.5 per cent. Commercial loans and mortgages were \$13,637,026.65 or 5.61 per cent. Commissioner Merrick says the reserve carried by banks was \$1,118,419.27 over the requirements of the state banking law.

Based on savings deposits of \$22,182,720.68 the law requires mortgage bond investments of at least \$117,632,366.03. Commissioner Merrick's report shows that the gross requirements of the state banking law by \$48,066,577.33. The savings investments, together with the savings reserve, exceeded the savings deposits by \$5,747,837.52.

Figures just compiled by the state railroad commission show that 59 persons were killed and 751 were injured by the electric railroads operating in Michigan last year.

Accidents at crossings and fatal injury to persons caused as trespassers resulted in 43 deaths. The total number of persons killed by accidents and 576 employees of the electric lines were killed. However 474 passengers were injured and 88 employees were hurt. The injuries to persons classified as trespassers resulted in 179 additional cases being reported to the state railroad commission.

The steam roads showed a rather heavy toll last year as 74 employees were killed and 1216 sustained injuries. Eight passengers were killed while travelling on the steam roads and 281 were injured. The report also shows that 147 trespassers were killed and 101 sustained injuries. The reports made by the steam road accidents at crossings are not incorporated in the list known as trespassers and the report of killed and 181 deaths, etc. shows 42 killed and 181 injured.

Four passengers were killed on Michigan Central trains, while the Ann Arbor Grand Trunk, the Penonquinette and the Minneapolis, St. Paul and Sault Ste. Marie each report one passenger killed. The Michigan Central reported 25 employees killed and 259 injured last year, while the figures submitted by the other principal roads are as follows: Penonquinette 17 employees killed and 178 injured; Wabash three employees killed and 49 injured; Lake Shore three employees killed and 59 injured; Grand Trunk four killed and 98 injured; Detroit Grand Haven and Milwaukee one employee killed and 161 injured; Chicago and North Western four employees killed and 83 injured; Ann Arbor one killed and 21 injured Grand Rapids and Indiana one employee killed and 10 injured. Detroit and Mackinac now killed and 7 injured.

State Labor Commissioner Cunningham says that he has received a number of inquiries from manufacturers.

Some idea may be gained by the people of Michigan of the immense sums paid to beneficiaries in Michigan on life insurance policies during 1914, when it is stated that the total paid on policies of more than ten thousand dollars was \$8,987,748.47 or nearly ten million dollars.

This does not include any amount of less than ten thousand dollars, nor are the sums paid by fraternal societies taken into consideration. Of the larger policies, the largest

throughout the state relative to the amendments to the labor laws incorporated in the Cullen bill, as to whether certain machines in factories may be operated by boys between the ages of 16 and 18 years.

Cunningham says that power punch presses, automatically operated, and properly guarded, where the operator is not required to come in contact with the die, are considered safe for boys between the ages of 16 and 18. Under no circumstances, however, should the boy be permitted to adjust or set the die, says the labor commissioner.

"Time checking, assembling, operating a mechanical table, propeller grinding, primary brass work and sheet metal work is automatic, and is considered dangerous," Wood, working or wood turning lathes are dangerous on account of speed and edged tools. Gang drill presses are also considered dangerous.

According to a ruling by the attorney general's department it is neither illegal nor unethical for a prosecuting attorney of a county to represent a railroad during his tenure of office.

However, this ruling is qualified by the assertion that "relations with corporations with respect to the same basis as any private client and the fact that a prosecutor represents a railroad company in civil matters cannot permit him to avoid the prohibition of instituting a prosecution against such a company if his duties require such action."

It also is the opinion of the attorney general that a prosecuting attorney who uses a railroad pass to travel on official business for the county cannot charge mileage to the county. The attorney general says also that a prosecuting attorney should not, acting as an agent for a utility company, file bonds for any other county officer.

"There is a strong question in my mind as to the guilt of Dr. Hottel MacGregor," said Governor Ferris when asked where there was any possibility that he would pardon the former utility operator who on November 19, 1914, was sentenced to life in the Michigan State Prison for the alleged murder of Cyril Sparling a few years ago.

Ever since the conviction his wife has been urging in her efforts to produce new evidence that would tend to establish her husband's innocence and has induced Governor Ferris to make a thorough investigation of the case.

The governor has placed all the information available in the hands of the attorney general and has asked for the opinion of the attorney general on all the legal questions involved in the case. "I have not been able to find out why the attorney general Mrs. Sparling has not been prosecuted," said the governor. "I have asked the prosecuting attorney to write up the facts and he has replied that he would come to Lansing and talk it over, but he has never put in an appearance. I want the prosecuting attorney to put himself on record."

Governor Ferris is of the opinion that Dr. Robert MacGregor was convicted by the other physicians who appeared in the case. The trial which was held in Huron county and attracted considerable attention throughout the state.

The board of control of the state public school at Colwell had a stormy session with Governor Ferris Friday afternoon. Dr. D. L. Treat, resigned at the governor's request, after the executive found that absolute refusal to obey the instructions of the 1913 and 1915 legislatures and to build a home for crippled children at the Colwell grounds.

Both resolutions were cheerfully signed and the matter parted with the governor as good friends. Dr. Treat said early in the conference that he would rather resign than vote to build the home.

The trouble lay in the fact that Treat and Jarvis were of the opinion that the legislature was not doing what it voted an appropriation of \$26,000 for the crippled home. They insisted that Colwell was not doing what it voted such a home and Dr. Treat characterized it as a "badly wrong" which, he said, he "refused to participate in."

The dissenters argued that there were too few crippled children who would voluntarily be sent to Colwell. They wanted the home for the crippled put at Ann Arbor as a sort of a state hospital.

While Governor Ferris agreed somewhat with the dissenters of Treat and Jarvis, he could not agree that the board should defy the legislature. After Mr. Jarvis' resignation the board had decided that the bill should go up at Colwell; under the legislative appropriation, he said there was nothing else to do but to build it.

Speed of Bullets.
The speed of bullets is measured in several different ways and with the most accurate accuracy, even to the millionth of a second. A cylinder having a circumference of 1,000 millimeters revolves ten times in a second. Each space of one millimeter is divided into one-hundredths, which can be read by a Vernier scale. A tube 100 meters long is fixed with an explosive and at every ten meters of its length is fixed an insulated clock that sets in motion a sign of a tracing line on the cylinder, the surface of which has been coated with lamp black. When the charge is exploded, the breaking of the air, the speed of the circuit, fixes exactly the time that elapses between the breaking of the explosive and the indicator, and this gives us the speed of the explosion.

HAIR OR NO HAIR?
It is Certainly Up to You and Your Cura. Trial Free.

Hot shampoos with Cuticura Soap, followed by light dressings of the scalp ointment rubbed into the scalp daily tend to clear the scalp of dandruff, soothe itching and irritation and promote healthy hairgrowing conditions. Nothing better, cleaner, purer and safer than Cuticura. Sample each free by mail. Address: Postcard Cuticura, Dept. XV, Boston. Sold everywhere—Adv.

Landlord Lites Chess Players.
"Are you a chess player?" a landlord asked a prospective tenant. "Yes, I am," answered Mrs. Sparling. "No, I am not a chess player and can't account for such a singular proposal," replied the landlord. "It is simple enough," said the landlord. "Chess players move so seldom and rarely without great deliberation."—New York Globe.

ON NARROW GAUGE TRACKS
Railroads Used for Warfare in Europe Have Equipment That is Especially Built.

Among the adaptations of devices of domestic convenience to the requirements of military warfare is the employment of narrow gauge railways in the supply of trenches on the battle line at the front in Europe. More than 100 such tracks have been reported, are now in construction at works in Pennsylvania.

These trains, as described, will run upon track not less than 18 inches wide, the trussing being light, the trucks, unbraked, unbraked, carrying ammunition, strapped hand grenades and arms. By so much it is expected the resources of the trench fighters will be supplied. The use of such miniature trains is an incident of the evolution of the system of underground close-hand fighting adopted in this war—Boston Post.

How to Win Her Heart. We know a boy who knows girls all right. He's only six years old, but he knows them. We heard his mother calling him down for rudeness at play the other day, and our ever-compassionate father, with this in mind, called the mother. "I want you to quit teaching that little brat. Aren't you ashamed of yourself?" "What? I got to teach somebody?"

You've got to teach somebody that's a fine idea. I want you to teach that little boy. "I want to be a doctor."

Sure Sign. Curious—It's as easy to hear you whisper as it is to see you wink. I don't see how you can wink without me, Mrs. Stiggins.

Hopeful Wife—Ah, yes, my dear, you're so much better. "Why don't you get a new pair of eyes?" "I might as well—Paxton Show."

A Fine Point. "Is your husband sick on his boy?" "Hardly. He makes barber's shaves."

Canada is Calling You to her Rich Wheat Lands
She extends to Americans a hearty invitation to see her FREE HOME-STEAD LANDS of 160 acres each or secure some of the low priced lands in Manitoba, Saskatchewan and Alberta.
