Watches Are Sympathetic.

Superstition or not, I am sure the watch is alive and knows its owner; that it has some sort of sympathy with the person who carries it. Do you not know the bitterness of sending your own watch to hospital and harboring another—a patient—in your pocket? It lies—always. The scientific man reduces the whole matter to rhythmic motion. To put it roughly, the watch likes—or does not like—your particular skip, jump, stump or decent walk. Really the accident has nothing much more to say about it as a conclusion, but, that—rhythmic—motion. The touch of the watch on the heart.—London Chronicle.
