In Its Larger Aspects.
Another favorite way which the small, round-headed man who can't see the author of any given opinion any more than if it weren't there at all has of introducing his remarks is to say something about viewing the matter in its larger aspects. Ohio State Journal.

How's This?
We offer \$1000 reward for any case of catarrh that cannot be cured by Hall's Catarrh Cure.
F. J. CASEY & Co., Toledo, Ohio.

We, the undersigned, have known F. J. Casey for the past 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

NATIONAL BANK OF COMMERCE, Toledo, Ohio.
Hall's Catarrh Cure is taken internally, acting directly upon the mucous surface of the system. Testimonials sent free. Price 75c per bottle. Sold by all druggists.
Take Hall's Family Pills for constipation.—Advertisement.

Mystery!
How is it that a man could ever escape unhurt by leaping from a train running at the rate of 30 miles an hour, when every time the average citizen slips in alighting from a car he injures himself so severely that the railway company must pay him big damages?

Worms Make Children Fretful.
If your child cries out in pain, is nervous, puffy and listless, he may be a victim of worms. Begin treatment at once with Kickapoo Worm Killer. This candy laxative in candy form kills the worm and removes it quickly and easily. Don't permit your child's development to be retarded by the continued draining of his vitality by worms. Get Kickapoo Worm Killer at your druggist's, 25c.—Adv.

Why Will You Buy a Talking Machine When You Can Get a New Edison?

1. A talking machine simply reproduces something that has already been said. It is like the original, but with a lot of harsh, strident, tiresome sounds added. The Edison re-creates the music exactly as the original, with no foreign sounds to detract from its enjoyment.

2. As the Edison re-creates music exactly, many public tests are given where an artist accompanies her own voice on the Edison, so that all can see for themselves that the Edison re-creation of the voice cannot be told from the original. Talking machines are never given this test, for the difference is too great between the reproduction and the original.

3. The music re-created on the Edison is sweet and pure, with no foreign noises to jar on the sensitive ear. On a talking machine you can hear a lot of unpleasant mechanical and foreign sounds and noises.

4. The Edison has no tone—it simply re-creates what it "hears," with nothing added or taken away from. Different makers advertise the "tone" of their talking machines. Do you think their machines can add to the beauty of tone of a great Prima Donna? It don't. It can easily detract from it, and does very much.

5. You will never tire of an Edison more than you would of an opera. The "tone" of a talking machine, with its noises and strident sounds, soon becomes very tiresome.

6. The Edison is a laboratory product—a secret known to but few of Edison's associates in his great laboratories. It is patented. A talking machine is simply a mechanical contrivance that anyone is at liberty to assemble.

7. There are no needles to change on an Edison. Its diamond point is good for 40 to 50 years. With a talking machine you have to keep changing needles, with the chance of being out of needles when you want them most.

8. An Edison Record is practically unbreakable. Talking-machine records are brittle and easily broken.

9. An Edison Record has 150 lines to the inch, and talking-machine records have only 78; therefore a 10-inch Edison Record plays about twice as long as a talking-machine record of the same length.

10. An Edison Record can be played 1,000 times. A talking-machine record is practically done for after 60 or 70 playings.

We will be glad to have you call at our Ford Market Booths or Royal Oak Store to hear Mr. Edison's wonderful new invention. We sell them on very easy terms of payment, will deliver to your door, and will give you the best of service.

In Woman's Realm

Especially Display of Trimmings of Gowns for Every Occasion Is a Marked Feature of the Season's Modes—Some of the Latest Ideas in Camisoles and Hosiery That Are Popular Just Now.

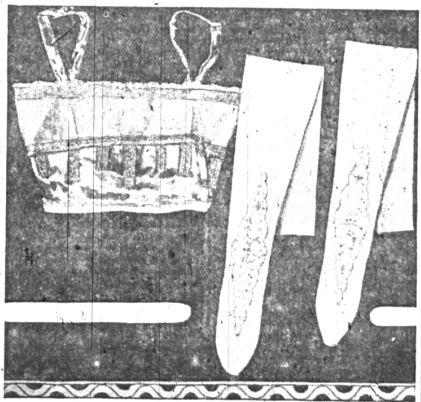

All that glitters is not gold or there wouldn't be enough glitter to go round this season. An array of things that sparkle and gleam has invaded the realm of fashion and is established everywhere—except on morning gowns. In company with fur bands and hand embroidery it came and saw and conquered, and now even bonnet gowns are lavishly ornamented with all things. Spangles of gold and silver and in colors, glass and metal beads and jet

CLASSIC LINES IN AFTERNOON GOWN

are used with metallic lines of the enrichment of afternoon and evening gowns.

Beads and a far of fabric, including brooches, have been wonderfully well managed in ornamenting the lovely afternoon gown pictured here. The classic Greek robe which have inspired the fashioning of this model for it hangs in long lines from shoulder to hem. It is made of black georgette crepe with six bands of the broadest fabric about the skirt. The long, narrow circle is covered with beads and weighted with tassels at the ends. It encircles the waist, is crossed at the back, and brought back to the front where one end is looped over the other. This

GLIMPING CAMISOLES AND HOSE

management of the waistline is centuries old, but has never been improved upon. The sleeve is especially graceful, fitting the arm at the shoulder and gradually widening to the wrist. It is split on the outer side and its edges are defined with two rows of beads. The graceful neck is finished in the same way and has a satin piece of white georgette at the point, which may be more or less high. Black and steel beads are introduced in the embroidered figures on the bodice. Fine artistry is written in every detail of this gown.

Wonders in camisoles are brought to the fascinated eyes of mortals by these days of diaphanous gowns and filmy blouses. Long gossamer slips are defined with two rows of beads. The graceful neck is finished in the same way and has a satin piece of white georgette at the point, which may be more or less high. Black and steel beads are introduced in the embroidered figures on the bodice. Fine artistry is written in every detail of this gown.

Trunk Cover.
It is always to be regretted when a trunk must of necessity be kept in any room. But if it is impossible to stow it in a closet, it is better to make it look like something else. But there is no harm in trying to make it more beautiful. This can be done by making a cretonne or a plain color cover to slip over it. The cover is made with a top exactly fitting the top of the trunk and on which a dounce is attached. The dounce should reach to the floor,

and it may be either gathered or box-plated.
New Suiting Material.
A new fabric just put out by an American factory is woven to imitate jersey cloth, but the back is finished like broadcloth and colored to contrast with the face side so that suits and coats can be made up with reversed daps and bindings. This material will probably be very popular for sport clothes, as it has some of the disadvantages of jersey cloth.
