Typical Kentucky Jack.

DIFFICULT MATTER TO CARE FOR THE JACK

The care of the jack is not different from the care of the stallion except in the matter of exercise.

The jack cannot be driven or worked with satisfaction as it is a stubborn animal and not easily handled.

The jack should have a large lot connected with his stall in which to run when he pleases; he will not need much exercise and will not take much.

The jack is a vicious beast and a great fighter. Jacks have been known to kill stallions much larger than themselves. The jack should never be allowed a chance to get at another animal, and the caretaker should exercise great care in handling him.

An ordinary stallion bit-curb, the strap running under the chin, will not control a jack. He will require a heavy bit and chain. We have seen jacks handled with a stick attached to one ring of the bit, like a bull stick.

Some people say a jack's bite is deadly poisonous. There may be nothing in that, but once a jack gets hold of a man his life is in great danger.

It must not be understood that a jack is, as a rule, more dangerous than a stallion, except that he has more bulldog in him, is less intelligent, and is utterly without affection.

The jack requires about the same ration as the stallion. He should have corn and oats and plenty of clean timothy hay with a bran mash once or twice a week to keep him in good condition. He should be fed lightly during the closed season.

The jack is the most fastidious animal about his drinking water, and will not drink unclean water, nor will he drink from a trough or vessel that has been used by other animals.

BEST OF CANDIED FRUITS

Many Delicious Varieties That May Be Put Up at This Time of the Year.

Seasonable fruits for preserving just now are sickel pears, sections of oranges, bits of pineapple and grapes. A syrup is made from two cupfuls of sugar, one cupful of water, and one-eighth teaspoonful of cream of tartar. This is boiled until it will make a soft ball when tried in cold water. Then the fruit is dropped in sufficient to cover the surface of the syrup. In about ten minutes this should be skimmed out and more fruit put in until all is cooked. Tender, juicy fruits may not take quite ten minutes while hard pieces like pineapple will probably take longer. Care must be taken not to puncture the outside covering of any sweet, juicy fruit, as this syrup will not candy if the juice becomes mixed with it.

When all the fruit is cooked it should be drained and allowed to lie in granulated sugar till dry.

Amber jelly is another delicacy out of the ordinary that can be made at this time of year. The ingredients are one grapefruit, one orange, one lemon and granulated sugar. The fruit is peeled, being careful not to remove the white pulp with the skin. This must be saved for the pectin (jelly-making substance) it contains.

After peeling, the fruit is cut into lengths, removing the white center of the grapefruit, which is very bitter. The pulp with the skin of the orange cut fine is measured, and to each cupful of pulp a cupful of water is added. This is put over the stove and boiled for five minutes. Then hot water is added equal to one-quarter the amount of water originally added. When this comes to a boil the kettle is removed from the stove and the contents measured. To five cupfuls of the pulp four cupfuls of sugar is the right proportion. This is boiled for 45 minutes, then poured into jars and sealed.

THREE HINTS FOR HOUSEWIFE

Excellent Use for Discarded Feather Bed—Broken-Needle Holder In the Work Basket.

A good use for discarded feather beds is to put a small portion of the feathers into a tick made of muslin the size of the bed. Spread the feathers evenly, tack the case on quilting frames, cover both sides with silkoline, and knot or tie as you would a comforter. A most excellent substitute for a down quilt is the result.

For a broken-needle holder for the work basket use a small, round "bottle" about two inches long, with a plain crochet covering of silk of any desired color, and cover the mouth of the bottle with a piece of silk fastened with narrow ribbon. A medium-sized cork, covered with crocheted silk, in which to insert the point of the scissors, is pretty and useful for the work basket.

Probably you believe that you are practicing all of the economies known to the up-to-date housekeeper, but have you turned inward the out-edge of a half-worn tablecloth? If it does exactly as a wide sheet is rejuvenated and if a very fine seam is carefully felled on the wrong side of the damask, the joining will never show.

Cornmeal and Salt to Clean.

Any light woolen material may be cleaned by this method: Mix cornmeal and salt in equal parts, then spread out the material or garment on a white cloth on the kitchen table and cover it with the cornmeal and salt mixture. When it has been on for a short time, cover your clothes brush or scrub brush with a soft white cloth, and go over the entire surface of the garment. After it has been brushed thoroughly, shake well and hang in the open air. The same process may be used with white doeskin gloves.

Halibut au Gratin.

Take five pounds of fresh chicken halibut, peel off skin and take out bones. Cut into small pieces, put in a roast pan, season well with salt, cayenne pepper, table sauce, one-half pound melted butter and one gill sherry wine. Bake about 15 minutes. When ready, mix the fish well with three pints of cream sauce. Put in baking dishes, around it a border of mashed potatoes, on top some grated cheese and bread, small piece of fresh butter. Bake in a hot oven for ten minutes. Serve very hot.

New Laundry Bag.

An ordinary wooden coat hanger forms the top of this cretonne laundry bag. The top is curved to fit nicely over the hanger. A slit from the top half way down the center of the front is bound with ribbon and forms the opening. The hook of the hanger is bound with ribbon and finished with a bow. This style of bag is much superior to the drawstring laundry bag.

Smoked Salmon Canapes.

Cut the salmon to fit small rounds of buttered toast, season with pepper and heat thoroughly. Serve with a garnish of watercress. It is well to cover the canapes while heating them, otherwise the salmon may become too brown. They are good appetizers.

Ginger Puffs.

Beat one egg well, add one-half cupful sugar, one-half cupful molasses, one-fourth cupful melted butter, one-half cupful warm water, two cupfuls of flour sifted with one teaspoonful each of cassia, ginger and soda and one-half teaspoonful salt. Bake in individual tins.

Lemon Pie.

Cupful of sugar, two tablespoonfuls flour, small piece of butter (melted), grated rind and juice of one lemon, yolks of two eggs, one cupful milk, whites of two eggs beaten stiff; bake in one crust for 45 minutes in a very slow oven.

Ginger Cookies.

Two cupfuls of molasses, one cupful sugar, one cupful shortening, one cupful water, two teaspoonfuls soda, salt, teaspoonful ginger, flour to make dough. Will make six dozen cookies.

DANGEROUS VARICOSE VEINS CAN BE REDUCED

If you or any relative or friend is worried because of varicose veins, or bunches, the best advice that anyone in this world can give is to get a prescription that many physicians are now prescribing.

Ask your druggist for an original two-ounce bottle of Emerald Oil (full strength) and apply night and morning to the swollen, enlarged veins. Soon you will notice that they are growing smaller and the treatment should be continued until the veins are of normal size. So penetrating and powerful is Emerald Oil that it dissolves goitre and wens and causes them to disappear.

Hazarding a Guess.

Howe—Don't you know anything about golf?

Wise—Not much. Why?

Howe—What's a bunker? Do you know?

Wise—I suppose it's one of those cranks that simply live on the links.

SAVED MINISTER'S LIFE.

Rev. W. H. Warner, Frederick, Md., writes: "My trouble was Sciatica. My back was affected and took the form of Lumbago. I also had Neuralgia, cramps in my muscles, pressure or sharp pain on the top of my head and nervous dizzy spells. I had other symptoms showing that my Kidneys were at fault, so I took Doan's Kidney Pills. They were the means of saving my life."

Doan's Kidney Pills, 50c per box at your dealer, or Doan's Medicine Co., Buffalo, N. Y. Doan's Dyspepsia Tablets for Indigestion have been proved, 50c per box. Write for Household Hints, also music of National Anthem (English and German words) and recipes for dainty dishes. All 3 sent free.—Adv.

The bewhiskered old humbug is more popular than the barefaced lie.

That Camping Trip.

"Have good weather on your camping trip?"

"You bet!"

"There were enough sunny days to dry out all the bed clothes before the next rain came."

To Cure a Cold in One Day

Take LAXATIVE BROMO QUININE Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

Youthful Diplomat.

"My last office boy was a wonder. I'm sorry I lost him."

"Very efficient, I suppose?"

"Oh, he couldn't lick a stamp without making a mess of it, but when it came to explaining things to my wife over the telephone I have never seen his equal."

RECIPE FOR GRAY HAIR.

To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and ¼ oz. of glycerine. Apply to the hair twice a week until it becomes the desired shade. Any druggist can put this up or you can mix it at home at very little cost. It will gradually darken streaked, faded gray hair, and remove dandruff. It is excellent for falling hair and will make harsh hair soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off.—Adv.

It's a poor rule that won't work both ways. Some people don't believe half they hear, and some don't hear half they believe.

"Holier Than Thou."

"There are some forms of melancholy with which I have no sympathy."

"For instance?"

"Well, there's the sort of person who finds it impossible to smile because his neighbors are so wicked."

IS CHILD CROSS, FEVERISH, SICK

Look, Mother! If tongue is coated, give "California Syrup of Figs."

Children love this "fruit laxative," and nothing else cleanses the tender stomach, liver and bowels so nicely.

A child simply will not stop playing if empty the bowels, and the result is they become tightly clogged with waste, liver gets sluggish, stomach sours, then your little one becomes cross, half-sick, feverish, don't eat, sleep or act naturally, breath is bad, system full of cold, has sore throat, stomach-ache or diarrhoea. Listen, Mother! See if tongue is coated, then give a teaspoonful of "California Syrup of Figs," and in a few hours all the constipated waste, sour bile and undigested food passes out of the system, and you have a well child again.

Millions of mothers give "California Syrup of Figs" because it is perfectly harmless; children love it, and it never fails to act on the stomach, liver and bowels.

Ask at the store for a 50-cent bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly printed on the bottle. Adv.

Their Effort

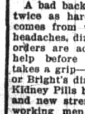
"The Bulgarians are trying culinary tactics."

"They are trying to cook the allies' goose in Greece."

Makes Hard Work Harder

A bad back makes a day's work twice as hard. Backache usually comes from weak kidneys, and if headaches, dizziness or urinary disorders are added, don't wait—get help before the kidney disease takes a grip—before dropsy, gravel or Bright's disease sets in. Doan's Kidney Pills have brought new life and new strength to thousands of working men and women. Used and recommended the world over.

A Michigan Case



James Greenman, 142 E. Adam St., Ionia, Mich., says: "I was laid up for three months with terrible pains in my back. I had headaches and dizzy spells, was nervous and lost forty-five pounds in weight. After an operation, as the specialist suggested, I used Doan's Kidney Pills and permanently cured me."

The Wheat Yield Tells the Story

of Western Canada's Rapid Progress

The heavy crop in Western Canada have caused new records to be made in the handling of grains by railroads. For, while the movement of these heavy shipments has been wonderfully rapid, the resources of the different roads, despite enlarged equipments and increased facilities, have been strained as never before, and previous records have thus been broken in all directions.

The largest Canadian wheat shipments through New York ever known are reported for the period up to October 15th, upwards of four and a quarter million bushels being exported in less than six weeks, and this was but the overflow of shipments to Montreal, through which point shipments were much larger than to New York.

Yields as high as 60 bushels of wheat per acre are reported from all parts of the country; while yields of 45 bushels per acre are common.

Thousands of American farmers have taken part in this wonderful production. Land prices are still low and free homesteads may easily be secured in good localities, convenient to churches, schools, markets, railways, etc.

There is no war tax on land and no conscription.

GENERAL CARE AND FEEDING OF HORSES

Farmers Often Give Animals Too Much Attention—Spring Is Busiest Time of Year.

(By J. B. ANDREWS, Illinois Experiment Station.)

Much attention should be given to the general care and feeding of work horses. However, these factors are the least in need of remedying than any of the others that enter into the cost of horse labor. Farmers oftimes give their horses too much feed and care, which increases the expense and does not add to their comfort or efficiency.

The number of horses kept and the amount of work per horse are the direct cause of the varying costs of horse labor and they in turn depend directly upon the system of farming.

All farm labor is divided into two principal kinds. They are the fixed, which must be done at a certain time, and the nonfixed, which may be done at odd times. For example, the final preparation of the seed beds, planting and cultivating are operations upon the corn crop for which the time is fixed, while plowing, hauling manure and fertilizer are nonfixed as to time. Husking corn is semifixed, as it must be done any time before the snow falls. Cutting corn for fodder or for the silo is fixed labor. The farmer should have his work planned ahead so that he will not have any of his non or semi-fixed operations to do when he must be doing something that is absolutely necessary. Plowing is a good example of nonfixed labor. Many discussions have been held to settle the relative value of spring and fall plowing from the standpoint of fertility, but few have considered either as to the utilization of farm labor.

In the fall there are times when there is not much fixed labor to be done. Other conditions being favorable, this is the time to plow. The spring is the busiest time of the year for horses and all work possible should be done at other times. Every farmer keeps a few extra horses for a whole year for a few weeks of extra work in spring. All of these extra horses cannot be eliminated, but if the work was so arranged the number could be reduced and a great saving result.

AVERAGE NUMBER OF PIGS FROM LITTERS

Result of Experiments Carried On at North Platte Station With Old and Young Sows.

The average number of pigs per litter raised from old sows during a period of four years was 6.58, at a cost of $2.11 per pig weighing 50 pounds, according to experiments carried on at the North Platte experiment station. The average number of pigs raised by young sows during a like period at North Platte was 6.2 at a cost of $1.68 per pig weighing 50 pounds.

The fall pig was grown to the weight of 50 pounds as cheaply as the spring pig.

Haul Manure Now.

Hauling out the manure and spreading when the ground is hard makes it an easy job instead of a disagreeable one, if it is allowed to accumulate. When the ground thaws in the spring the manure is all ready to work in.

Humus for Soil.

Does your soil need more humus? Perhaps you can engage manure at town stables which may be hauled during the winter. Fertility can often be bought cheaper in this form than in fertilizer bags.

NEED FOR WINDOWS FOR LIGHT AND AIR

Keeping Stables Tightly Closed During Cold Weather to Save Feed Breeds Disease.

The windows in the horse and cow stables should be so arranged as to give an abundance of light and air. Most old-style barns are dark and often damp, this is particularly true of the bank barn, the front stalls having plenty of light and air and the back stalls dark and the air impure.

If the barn faces the south, the windows should be of fair size. The average stable window is too small. Windows of the size ordinarily used in dwelling houses are the most convenient size. The windows should be at least four feet from the floor. The windows should be hung on iron pivots so they can be opened to admit just the amount of air needed. By having ventilators arranged to take in pure air from the outside of the stable and carry the foul air out through the barn roofs the stock will have an abundance of pure air at all times and will have better health.

The old way of keeping the stables tightly closed during the winter to save feed is sure to cause lung fever in horses and consumption in cows. No fermented manure should be allowed in the stables. Clean the stables every morning and dust with land plaster; the plaster will prevent loss of ammonia and keep the air pure. Barns built on level ground should have the windows set opposite each other at each end and large windows on the south and north sides. In summer the windows should be screened to keep out flies. The stables should be so arranged that the air will blow above the backs of the cattle and not directly on the body. Horses should not face the full sunshine. This is the proper time to make needed repairs to the stables and feeding sheds. Ordinary six-light sash may be had for 90 cents each. A stable for ten head of cattle would need two sash.

ONLY KIND OF COW THAT IS PROFITABLE

Animal Must Produce 200 Pounds of Butterfat Annually if She Is to Pay Her Way.

(By FRANCIS W. PECK.)

From several years' records of milk production and cost of maintenance it has been found that a cow must produce at least 200 pounds of butterfat or about 5 600 pounds of milk annually if she is to pay her way. This means 19 pounds of milk daily for 300 days.

The annual cost of maintaining a cow is close to $65, if a man values his labor at 15 cents an hour. If a man wants more than a market price for feed and this bare wage, he must put his time on cows giving more than 200 pounds of fat. The larger the increase over this amount the larger his pay will be.

Furnish Fowls Grit.

There will be many days yet when the fowls cannot get out to hunt for grit, even though there be plenty of it on the grounds; and this article must be supplied them. Set a dish of suitable grit in a convenient place and notice how soon the birds will eat it up.

Excellent Winter Feed.

A hopperful of bran, placed where the hens can get it at all times, is an excellent addition to the food in winter.

Don't Worry

about your digestive troubles, sick headache, tired feeling or constipation. The depression that induces worry is probably due to a disordered liver, anyway. Correct stomach ailments at once by promptly taking

"I see."

"But I'll be out of the race if she ever gets acquainted with a fellow who owns a high-power aeroplane."

SWAMP-ROOT FOR KIDNEY DISEASES

There is only one medicine that really stands out pre-eminent as a remedy for diseases of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of even the most distressing cases. Swamp-Root, a physician's prescription for special diseases, makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes—fifty cents and one dollar.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Some men don't have to fly very high to live up to their ideals.

WHY "ANURIC" IS AN INSURANCE AGAINST SUDDEN DEATH!

Sufferers from Backache, Rheumatism and Kidney Trouble

Before an Insurance Company will take a risk on your life the examining physician will test the urine and report whether you are a safe risk. When your kidneys get sluggish and clog, you suffer from backache, sick-headache, dizzy spells, or the twinges and pains of lumbago, rheumatism and gout. The urine is often cloudy, full of sediment; channels often get irritated and sleep is disturbed two or three times a night. This is the time you should consult some physician of wide experience—such as Dr. Pierce, of the Invalids' Hotel and Surgical Institute, Buffalo, N. Y. Send him 10 cents for sample package of his new discovery—"Anuric." Write him your symptoms and send a sample of urine for test.

Experience has taught Dr. Pierce that "Anuric" is the most powerful agent in dissolving uric acid, as hot water melts sugar; besides being absolutely harmless it is endorsed with other properties, for it preserves the kidneys in a healthy condition by thoroughly cleansing them. Checks the degeneration of the blood-vessels, as well as regulating blood pressure. "Anuric" is a regular insurance and life-saver for all big meat eaters and those who deposit lime-salts in their joints. Ask the druggist for "Anuric" put up by Dr. Pierce, in 50-cent packages.

Dr. Pierce's Favorite Prescription makes weak women strong, sick women well. No alcohol. Sold in tablets or liquid.
