Mr. and Mrs. Edward Nayland, of Detroit, were weekend guests of Mr. and Mrs. H. L. Schultz.

Leonard Thompson and small son, Milton, who spent the past few weeks in Florida, have returned home.

Mr. Elliot, went you please ask Mr. Volney Miller to go back down South, that we may look forward to more of his wonderful experiences, which we so much appreciated through the columns of your paper?

Mrs. LaVerne Blumberg, west of Parker's school, is very ill.

Two makes the whole, at home. If they like well together.—Codnor.

Mrs. Frank Warner, of Troy, is better and is sitting up after a long illness.

There is a slump in real estate as speculative modes have passed away.—Codnor.

Jerry Farmer says moves from the Perry Farmstead, in Troy, to Rochester, Michigan.

John Levy, of Troy, has had a trying, sickly spell, and has been in Harper hospital, but is better now.

Charles Evans Hughes, of New York, is a noble man and just the right man for president of the United States.

Several weeks ago, W. H. Codnor lost his account book between Stephen Hill and Clawson. The finder will be rewarded with 50 cents when it is returned.

The St. Patrick party, under the auspices of the Epworth League, given at the home of E. B. Davis, was great success, socially and financially. Mr. Davis set the ball rolling for subscriptions and about 100 was subscribed, much of which was paid for an addition to be built to the church, to be used as church parlors. Work will be started as soon as the weather permits and when finished, the congregation will surely appreciate this long felt want.

When a man has a will fail foundation, and a true and helpful helpmate, he grasps every bit of life, life's chances, and with good principles and good resolutions, he is sure of good success in all his undertakings.—Codnor.

Never strive long to help one, who is needless, when there is one who will help another, who is helpful, with gratitude to reward you, and in the end of time, you may accomplish great things instead of being all your time wasted upon the wicked, heedless person.—Codnor.

## How a Machine Does Our Book-keeping

A short time ago we installed a remarkable machine in our Accounting Department—a machine which adds and subtracts, tells the date, keeps our books and gets out monthly statements. It does all this work much faster than any book-keeper could, and has never been known to make a mistake.

The installation of this Burroughs Book-keeping Machine means that our accounts will be handled just as rapidly and accurately as those of the largest and most up-to-date banks in the country.

Even if you are not at all familiar with book-keeping, you can save at once the great advantage of a printed ledger page over the old-fashioned hard-written sheet.

**Better Service to You**

The Burroughs will handle our figure work about half the time formerly needed. This gives us more time for the other things—time to improve the service in every department of the Bank.

Come in and see our machine book-keeping system in operation. We will be glad to show you how the machine makes entries for you—how it automatically adds all your accounts in another, and so on, and how it makes mistakes impossible. You will be welcome any time.

We don't want you to think of the First National Bank just as a place to put your money, although of course we are glad to have you keep as large a balance with us as possible. It is our desire to render our patrons every service and accommodation that can be reasonably expected from us.

Talk over our business problems with us. It is part of our work to study business and financial conditions, and it may be that we can suggest some ideas that you will find worth while. Please feel free to consult with us as any time.

**Insures Accuracy**

The fact that your figure work is done on an absolute accuracy is a guarantee to our customers of the accuracy in the handling of their accounts. The machine method of ledger posting makes it impossible for a mistake to get past unnoticed. This accuracy insurance alone is important enough to you and to us, to justify the use of the machine method, but there are many other advantages.
