PAIGE

The Standard of Value and Quality

Approved—by Thousands of Users

As we remarked several weeks ago—

"The Paige 'Six 46' is a good car—not merely because we say so—but because it's owners have definitely established this goodness in the grueling tests of more than a full year's road work."

If you stop and consider the matter for one minute, you will agree that no automobile can be termed a success until it has been tried and approved by owners.

Factory tests are all right—and very necessary so far as they go.

But a car only proves itself under the strain and stress of day in and day out service.

So, there is one little point that it may be well for you to bear in mind.

This year there are a number of "experimental" six cylinder cars on the market.

These cars, with their new "theories" and new engineering features, may—in time—prove altogether practical in every way.

But until that time comes—until these sixes have been thoroughly "tried out" in the hands of users—the prudent man will be inclined to buy the car with a tangible record of accomplishment behind it.

The Paige "Six 46" is an eminently safe automobile investment.

A World of Love.

Do you ever stop to think how full this world is of things to love, if your heart is just big enough to let them in? We love to live for the beauty of the things surrounding us and the joy we take in being among them. And it is my belief that the way to make folks love us is for us to be able to appreciate what they can do.
