

N the earlier days of the automobile industry, wealth and social position traveled almost exclusively in the car which bore a foreign maker's name.

But times have changed - standards of value have changed personal view points have changed.

People of wealth and social position still insist upon luxury and elegance in their motor cars. But, now, they also demand at least a fair return upon their motor car investment.

It is for this reason that the Paige, Fairfield "Six-46" has been so universally adopted by well-to-do people in all sections of the nation.

beauty of line and design, this car rivals the most artistic productions of Europe. It is refreshingly dis-tinctive, and embodies every convenience and luxury that a critical motorist could desire.

It is a big car, a powerful car, a comfortable car—and, withal, an economical car. It is literally and actually "the standard of Value and Quality."

The price complete is \$1295.
