

FIND VOLCANO IN MINDANAO

Recent Eruption Was Apparent, Lieutenant Donnelly Says of the Discovery.

Mindanao has a new volcano, according to the Mindanao Herald. Lieutenant Donnelly, while on a hike in the interior of Lanao province, discovered an active volcano in the Piguayan range of mountains, which heretofore was not known to exist. Heretofore Donnelly kept his discovery in the following report:

June 5, 1915. The undersigned, in command of the combined detachment of the First Cavalry company, and the First General Service company, on reconnaissance patrol from Kapaad (northwest) through the Piguayan mountain range, came in sight of an active volcano which from all indications had recently erupted a discharge of volcanic ash and either smoke or flame.
