Big Span Collapses; Many Lives Are Lost

(Daily Press Dispatch, Sept. 12, 1916)

Coatty Press Disputed Sept. 18, 1899

Quebec — The second attempt bridge the St. Lawrence river here resulted in another, failure when the massive center span, weighing over 5,000 tons suddenly collapsed and fell into the river yesterday causing a less of 27 lives. The span was being raised from pontoons and was about 15 feet above the water when, from some unknown cause, it collapsed and sank into the river, which is 200 men were caught on the span when it began to sway and all of them went down into the water with the structure. The bridge is the largest in the world, its coatemplated length from shore to shore ing 3,239 feet, with a distance of 1,800 feet between sucher buttresses. The central span is 640 feet long. The fint collapse occured Aug. 29,1907 when the first of the contral span is 640 feet long. The first collapse occured Aug. 29,1907 when the first of the contral span is 640 feet long. Stoves, Etc.

Not naving to pay rent I can still continue to sell here at prices below all competition. Here is where you must come if you really wish to buy for the lowest prices anywhere, and save an amount worth saving. On a complete outfit you will save an amount that will surprise you. Many Ford men have their wives meet them here after work and make their selections together. It pays. We deliver everywhere in Detroit and suburbs. If you wish to pay in monthly installiments, it's very convenient to do it here.
