

What Well Dressed Women Will Wear

WITHIN HER OWN FOUR WALLS.

Next to the tailored suit the afternoon dress takes its place as the most important element of success in the wardrobe, to be assumed in the fall, it has been made in such variety that a selection merits a great deal of attention. It appears in satin and in wool, with satin preponderating, and is more or less elaborate (if one can call any of the women's styles elaborate) according to the uses it is to be put to.

Many of the new models are entirely of satin, with even the lovely and beloved crepe georgette in sleeves and bodice replaced by satin. But crepe is not entirely banished and is not likely to be. It is too valuable an asset to the designers of gowns and too becoming to their wearers to lose favor.

A satin gown appears in the picture made with a tunic party of satin and party of embroidery, which has the appearance of handwork, made by applying a tiny silk cord wound with a

printed above are representative types among velvet hats for girls. The picturesque model at the left is much like the familiar old favorites, in both horn and other straws, with broad, floppy brims that have always belonged to it. But the crown and brim are both softer than those of its prototypes. It is of black velvet with a grosgrain ribbon and has a small fur ornament at the front.

The hat at the right is merely a large puff of velvet over a narrow drooping brim, bound with ribbon. It has a collar, and long ends at the back of grosgrain ribbon. The small hat at the center has a collapsible crown, mounted on a narrow, upturned brim. The head supports the crown, which is weighted at one side with a silk cord and tassel. The edge of the brim is bound with narrow grosgrain ribbon.

These hats represent the ideas of people who specialize in this particular kind of millinery. They seem very

SOFT VELVET HATS FOR MISSES.

minute silver band in a pattern to fabrics of any kind. It is particularly good on gray, taupe, black and dark blue.

A trace of the tonneau idea remains in the skirt of this gown, which is cut to flare out at the hips. The long narrow neck of black crepe and the bodice and upper part of the tunic of satin and of crepe with the new embroidery. The lines are almost straight, with an inconspicuous and soft girlish of satin, playing hide and seek with the embroidered crepe on the bodice. Measured by present standards, this gown may be called elaborate.

A cluster of silk and chambray flowers on the bodice do more toward brightening its dignified color, which is sage, but might be dark blue or gray or black with equally good effect.

Even this little mass of eleven (or more) years may be happy in the possession of a velvet hat this winter, for those who make it their business to look after best heads in headwear have gone in for velvet. The new shapes and soft brims of the new shawls make just the kind of headwear for little girls; clinging brims and big puffed crowns that belong to youth.

Velvets in black, dark brown and other dark colors make up a large part of winter millinery for misses. For trimming, heavy ribbons, silk cord and tassels, for ornaments and bandings, are featured with ribbon in the lead and used in many ways.

The three hats shown in the group

simple, but the hand and eye of it experienced designer is evident in all of them.

The national headquarters of the Socialist party in Chicago also were raided and books and papers seized.

"Big Bip" in Kait, his first opponent—William Hale Thompson, the mayor of Chicago—came a copper and neck, in the face of the orders of Governor Lowden, he compelled the police of Chicago to give protection to a meeting of the pacifists who had been invited to address the city.

Regular managers appear on some stuffs—one in particular shows a leopard springing upon a defenseless lamb. But others carry out powerful scenes and depict botanical gardens and butterflies.

Oil for Chamis Gloves. To wash chamis gloves, put them on your hands and scrub them clean with a mild soap and warm water. Take them off and rinse. Into the last rinse water add a liberal tablespoonful of olive oil—it is a table-spoonful to a basin of water. Dry in the shade.

Greek Influence in Evening Gown. A number of evening models show Greek inspiration, the two sides of the gown made in contrasting style. In some instances, draperies are caught up with embroidery.

Her First Party Dress. For the very little girl's party dress fine lawn or muslin is likely to be used with elaboration of infinitesimal narrow hand ticks and the narrowest of Valenciennes set in by hand, and edgings as narrow, and perhaps some very delicate bits of hand embroidery; but there are adorable little party dresses of the cream net, too, made over palest pink, trimmed in pink, ribbons and a very little of infinitesimal narrow lace. Many fastidious women think these net dresses, like silk

dresses, in poor taste for small girls' wear, and no matter how much money they may spend for fine materials and handwork, cough themselves to tubercles and coughs; but that is a matter of taste.

Lithuan. "Some women," said the borderer who puts tobacco smoke on his entire, "don't believe they like beer, unless it is scalded, and then they believe in it, and more, too."—Brown's Magazine.

Hoyle cheering the parade of New York's draft army. 3—French hand grenade thrown in a first line trench setting the fuses in their grenades.

NEWS REVIEW OF THE PAST WEEK

Government Finally Closes Down on Industrial Workers of the World.

MANY RAIDS AND ARRESTS

Italiana Continue Victorious Progress Toward Trieste—Germans Take Riga and Great Naval Battle in the Gulf of Finland Is Expected.

By EDWARD W. PICKARD.

Its war industries hampered, its dignity outraged and its patience exhausted, the government of the United States arose in its might last week and began the process of squashing the disreputable and distasteful Industrial Workers of the World. In more than a score of cities, mostly in the middle and far West, their headquarters and printing offices were raided and great quantities of material seized. The department of justice prepared for this action secretly and carried it out swiftly and skillfully, and is now ready to have the leaders of the organization indicted if the documents taken warrant this. In some cities many arrests were made. Prosecutions may be started under the new espionage law, or any one of several other laws.

Two of the things that caused Uncle Sam to get after the I. W. W. were the preaching of sabotage—the willful destruction of property—and the use of "stickettes" designed to obstruct existing, which were plastered all over the country. They are also accused of misusing the mails to send out matter advocating treason, insurrection and forcible resistance to the laws concerning the carrying on of the war.

The documents seized show that the I. W. W. was planning a nationwide strike which, it hoped, would up the nation plants, railroads and lumber mills, and the sabotage advocated was to be practiced in connection with this strike.

It is a well grounded belief that the leaders of the I. W. W. are constantly supplied with funds from German sources, but the great mass of its members do not seem to be merely ignorant and misled creatures.

Another "prominent" opponent of the Socialist party in Chicago also were raided and books and papers seized.

"Big Bip" in Kait, his first opponent—William Hale Thompson, the mayor of Chicago—came a copper and neck, in the face of the orders of Governor Lowden, he compelled the police of Chicago to give protection to a meeting of the pacifists who had been invited to address the city.

READY FOR WAR'S HANDSHIPS

Boys of 1917 as Responsive as When Duty Called the Youth of Both Sides to the Civil War.

minio by Cadorna's forces. In fact, a general retirement of the Austrians at that front was predicted. In the battles on the Banatza plain the Italians captured immense quantities of arms and munitions, for the enemy fled in haste and disorder. Nearer the front, the fiercest of the fighting still held out against furious attacks, keeping the Italians from advancing on Trieste by that route.

Riga Taken by Germans.

Riga has fallen, the Kaiser rejoices at the war-toritory party in Germany has a new argument. But this, like the Gallian affair, is rather a cheap victory over a disorganized army, and was expected. The Russians have retired beyond the River Au, fighting bravely as they went, and the fierce bravery of the Battalion of Death enabled them to prepare a new line of resistance.

Organized Labor Lost.

Organized labor in the United States, determined to assert its loyalty, met last week in Minneapolis, together with many radicals and Socialists, and formed the American Alliance for Labor and Democracy. Under the leadership of the American Federation of Labor, John Spargo and others, the delegates declared the new organization firmly back of the armed forces of the government in their fight for "a victory which will mean the coming of the greatest world democracy ever dreamed of."

Definite reports have been circulated that the Allies are planning to cripple various industries by strikes, especially the fuel industry. These reports, Mr. Gompers declares, do not relate to the American Federation of Labor. They are, however, too well substantiated to be ignored.

The British trades union congress by a vote of 2,800,000 to 10,000 declared itself opposed to participation in the Stockholm congress, and this, taken with the refusal of many countries to grant passports to delegates, probably will result in the entire failure of the gathering in the Swedish city.

Pope Preparing Second Note.

Not wholly discouraged by the failure of his first note, Pope Benedict is preparing a second proposal for the ending of the war. Premier Ribot, speaking on the March 14th, declared that a requisite in any peace treaty acceptable to France was the restoration of Alsace-Lorraine.

The German press continues to heap abuse and ridicule on President Wilson for his reply to the pope's note, declining loudly against his demands that the government of Germany be democratized before peace can be made with it. But the recheck made by the president is instantly demanding just as the president's reply is being considered essential.

Dispatches from Switzerland say the central powers have determined on the partition of Poland. According to the press, Germany is to take one-third of Russian Poland to re-try her frontier, and Austria will annex the remainder, unite it to Galicia and include the territory she united with Poland, with Emperor Charles as its king. It is to have its own parliament, but its foreign policy, finances and about a third of its territory.

This plan does not please Hungary, because that country thinks its influence will be lessened if the empire of Austria is to be united with Poland. Led by President Wilson and members of the senate and house, and escorted by thousands of soldiers and increased American forces, the first of Columbus selected for service, the National army paraded the streets of Washington on Tuesday, and similar exercises were held in other cities and towns. Next day these members of the National army began streaming from all points of the compass into the city for their training and instruction. They are the first 5 per cent of the 687,000 men selected by the draft.

The long wrangle in the senate over a profit taxation ended in the defeat of the high tax group and the adoption of the finance committee's provisions for a total levy of \$1,288,000,000 or about a third of this year's war and normal excess profits. This would make the bill total, \$2,522,000,000.

Thursday night the house passed unanimously the big war credits bill authorizing \$1,538,945,400 in bonds and certificates. Every effort of a group of Republicans to limit Secretary McAdoo's control over these issues was defeated, but an amendment by Congressman Cannon was adopted, which would not be operative if bonds not in excess of \$5,000,000.

There were no alarm clocks in the barracks where 280 Chicago boys and 222 from northern Illinois and southern Wisconsin, counties passed their first night at camp and the huge blasts had none of the terrors for these young Americans that the ordinary sleepers had for the city sleeper.

Officers had to rout out several who had turned over to their accustomed "strong wine winks," but it did not take long to get them into their clothes, dressed and washed ready for breakfast. Young America generally has an

appetite and as physicians have passed upon these first arrivals in camp and pronounced them physically fit, the most officers were prepared to satisfy the know-nothing for food.

Each man had a black iron cot with woven wire springs to himself. Over this was a bed of straw. It was new straw, and it does not take a far stretch of the imagination to realize that there would be sharp ends that would not be sensitive to the kind of comfort to which a lot of these boys have been accustomed.

PIGS EATING GARBAGE FROM A TROUGH.

Prepared by the United States Department of Agriculture.

Use of city garbage for feeding hogs will add materially to pork production and also substitute a more economical garbage-disposal system for the wasteful practice of burying or burning city waste. To make city waste most available for feeding to pigs, every householder must be required and trained to separate its household wastes carefully so that dangerous material, like broken glass or bits of metal, burnt matches and wood, and other inedible material, will not be mixed with food scraps, vegetable parings and bones available for feeding. Cities should enforce existing ordinances requiring every household to separate wastes carefully and to put all feeding material in one container and all inedible

trash into the ash can or the receiver. Utilization of garbage for feeding animals will save the people in the cities an important sum of money annually and contribute materially to the local food supply.

Dwellers in small towns, and even in the suburbs and on the outskirts of the large cities, in many instances also could help pork production. Many vacant lots provide a suitable site for a hog pen which will annoy no one, and some of these lots are large enough to grow green feed to aid in fattening pigs. While the average family will not have enough garbage to fatten a pig, several families who jointly fatten a pen and purchase one or two pigs can fatten them co-operatively at little or no additional expense.

PIG'S BUSINESS TO DEVELOP BIG FRAME

Good Pasture, Feed, Exercise and Sanitation Are Important Factors.

(From the United States Department of Agriculture.)

Keep the spring pigs growing all through the summer. It is the pig's business during this time to develop a good frame to grow bone, muscle and vital organs, and to lay on fat. Plenty of pasture, some grain, exercise, and good sanitary quarters are all necessary to the spring pig to be thrifty and profitable, say specialists of the United States department of agriculture.

Give the spring pigs plenty of good pasture. They should be kept on pasture as long as possible and gain the benefit of its cheap nutrients, especially the heavy grain ration that is so toxic and digestive qualities. But pigs on pasture alone, even alfalfa, need some grain supplement. The amount of grain or other concentrated feed used will depend on how much pasture is available, on the cost factor of grain or other feeds, on the size and condition of the pigs, and the time at which the farmer expects to market them. To be ready for the early fall markets, spring pigs must be given a heavy grain ration than pigs intended for the winter market.

Less protein supplement is needed when pigs are run on leguminous pastures. Under normal farm conditions pigs will do well on a 1 or 2 per cent grain ration. The self-feeding method makes for cheap and rapid gain. If the grain ration is limited, the hand-feeding is best. By feeding once a day in the early evening, pigs take great advantage of the pasture and graze hungrily during the day. The grain ration is best after noon. Plenty of fresh, clean drinking water always should be available.

Pigs on pasture usually get enough exercise to keep them in good condition. They should have a clean, dry, well-ventilated shelter to guard against exposure to storms, and to supply shade. A concrete wallow will add to the water will keep down lice, as will an oiled sack on a rubbing post, or sprinkling the pigs with crude oil every two weeks.

To supply mineral matter and a tonic, the following mineral mixture is good. It always should be accessible. Dissolve in one gallon of water and sprinkle over the mixture: Copperas, 2 pounds; sulphur, 4 pounds; slaked lime, 4 pounds; salt, 8 pounds; wood ashes, 1 bushel; fine charcoal, 1 bushel.

Disinfectants to CONTROL DISEASES

Explicit Directions Given by Department of Agriculture—Well to File for Reference.

(From the United States Department of Agriculture.)

Farmers are constantly advised to disinfect their stables, henhouses, calf pens, etc., but do not know how to do it or do it effectively in all cases. The following explicit directions by the United States department of agriculture will be found useful and might well be filed for future reference. Chemical disinfectants are used to

Timothy Hay for Calf.

Give the young calf timothy hay until it is two or three months old, because it gets plenty of protein in skim milk. Afterwards alfalfa or clover hay is better.

Careful Handling of Trees.

Trees are delicate structures and require careful handling.

No Fruit Without Bees.

Without the honey bee there would be little fruit.
