Heyday of the Goldsmith. The thirteenth and fourteenth centuries were the heyday of the English goldsmith. The crusaders had brought back with them from the Orient tales of jewels and emeralds which they poured into the wondering ears of the fine craftsmen. Money was plentiful and the mighty church was the patron of the art. Then were whole streets turned over to the workshops of the goldsmiths, shops which somewhat resembled the workshop of the armorer in the Riggs collection at the Metropolitan museum. There were the same Gothic doorway, the same oaken panels carved with extravagant floral designs; the shrine of the saint was always present, too, but where the corner patron saint was St. Elmo, St. Dunstan, was the patron saint of all goldsmiths—no shop complete without him.
