DEMAND CLEAN MILK
We laugh at the ostrich hiding its head when in danger. Yet that is the human trait in regard to milk. When the danger is visible to the naked eye, we shirk our shoulders, and let the children and invalids suffer. Start an active campaign for clean milk. Make it an incentive for the production of clean, wholesome milk by judging the process by its cleanliness and not by the cream line. The welfare, the health, the lives of children demand that the indifference to its milk supply cease. It is the duty of the community to guarantee to them a clean, wholesome product.
State Board of Health.
The spire of an old church in England has been twisted into an almost spiral form by the unequal contraction and expansion of the lead and wood of which it is constructed.

The Penalty for a Good Reputation
When an article has been on the market for years and has given complete satisfaction when used in thousands of homes it creates for itself a valuable reputation, yet at the same time this good reputation has its penalty.
Foley's Honey and Tar Compound enjoys a splendid reputation for it has been used for three generations. Its fair name and high quality have created a demand for it, and to supply the demand at a maximum profit imitations and substitutes are offered.
Purchasers who know the original cannot be fooled by any "just as good" offering and it is worth the effort of an extra minute to read the enough groups to insist upon the original and genuine Foley's Honey and Tar Compound, which has proven its value by the use of its original, cold, croup and whooping cough.
