CAN'T ALL BE COLLEGE MEN

Pithy Remark Credited by Andrew Carnegie to Self-Made Man With Limited Education.

Andrew Carnegie, commented one day at his Scottish castle on his gifts to the cause of education, said to a young lady: "There's nothing so pathetic as the self-made man who is conscious of his lack of education. These poor fellows seem to think that everybody is educated but themselves."

"Once, in a smart New York restaurant, I heard a man with a diamond horseshoe pin say hoarsely to a waiter: "Shove over there chandler!" "It isn't a chandler, sir," said the waiter, as he obeyed, "it's a cruet." "The man with the diamonds blushed brick red."

"Well, never mind what she is; shove her over," he said. "We ain't all been to college."

Packers' Profits—Large or Small

Packers' profits look big—when the Federal Trade Commission reports that four of them earned \$140,000,000 during the three war years.

Packers' profits look small—When it is explained that this profit was earned on total sales of four and a half billion dollars—or only about three cents on each dollar of sales.

This is the relation between profits and sales: Profits Sales

If no packer profits had been earned, you could have bought your meat at only a fraction of a cent per pound cheaper?

Packers' profits on meats and animal products have been limited by the Food Administration, since November 1, 1917.

THESE FLYING FIELDS OF U. S. AVIATION SERVICE ARE LOCATED

Twenty-Nine Tracts Scattered Over the Country Are Named, With Few Exceptions, for Airmen Who Lost Their Lives—Camp Borden, at Toronto, Canada, Is Also Used by United States.

The aviation section of the signal corps of the army now has twenty-nine flying fields. Most of them are regular service fields, where the graduates of the schools of military aeronautics, or "ground schools," receive their aerial instruction, but some of them are reserved for advanced flying, experimental testing and special training in bombing and artillery observation. Camp Borden, at Toronto, Canada, is also used by the United States in conjunction with the British air force.

With the exception of McCook Field, all the American fields have been named after American officers and men who lost their lives while on aeronautical duty. Most of them were pioneers in aeronautics—Langley, Chanute, and Wilbur Wright. Following is a list of the aviation fields with a brief statement of how they received their names:

A Gov. Method. "There's nobody," said a government official, "who can get rid of an impostor as quickly and in as many times so smoothly as the president."

"Once, at a reception, a man held up the long line of guests waiting to shake the president's hand while he recounted at great length some tedious rant or other."

"The president stood about four minutes of this. Then he smiled and gave a start: "Just say dear sir, I am not recognizing you," he said."
