

WORKERS DEMONSTRATE AGAINST PROFITEERS IN PRAGUE

A workmen's demonstration against profiteers in Prague, the capital of Czechoslovakia. The sign carried by one of the men states: "The Last Warning!"

MAKING TRAVEL BY AIR SAFER

Wireless Telephone Will Do Much to Insure Speedy Mail Deliveries.

BRITISH EXPERTS AT WORK

When New System is Working Properly Pilots Will Be in Constant Touch With Ground by Means of Wireless.

London.—Will the normal mail service when the new system has been improved, still continue to be improved by such advance work as ensuring that the post was presented on several days the time of the mail machines between London and Paris?

At present, it is explained, we are flying daily over what is a large distance with no guarantee of delivery. It is no exaggeration to say that when all the organization which we usually employ, we have to take into account such wireless as a means of communication.

Mr. M. H. G. from the Ministry of Air, said that the Ministry will have to make arrangements for the sending of a machine which is not a machine of safety or of any other kind.

Wireless telephony will help us in every way, but we have to take into account the fact that the wireless telephony is not a machine of safety or of any other kind.

Information for Plane Pilot. When we have the new wireless working properly it will mean that during the hours of flying over the ocean we will be in touch with the ground station at any time.
