Work more— Produce more— Save more— But we can't continue increasing our production unless we continue increasing our railroad facilities.

The farms, mines and factories cannot increase their output if you cut the capacity of the railroads to haul their products.

Railroads are now near the peak of their carrying capacity. Without railroad expansion—more engines, more cars, more tracks, more terminals—there can be little increase in production.

But this country of ours is going to keep right on growing—and the railroads must grow with it.

To command in the investment markets the flow of new capital to expand railroad facilities—and so increase production—there must be public confidence in the future earning power of railroads.

The nation's business can grow only as fast as the railroads grow.

This advertisement is published by the Association of Railway Executives.

PHONOGRAMS ON TRIAL

If you have a talking machine that you want you will want to hear the New Edison, or we will be glad to put one in your home to see if you like it.

The Reason. Many other phonographs are sold because people have not heard the New Edison and do not realize what Edison's Phonograph is.

Just a postal or a phone call and we will put one in your home for an absolutely free trial anywhere in Detroit or Suburb.

The buying of a phonograph is an important matter to run the risk of not getting the best.

Don't buy if you do not really need it, but if you must have furniture this spring you better buy now.

We do not have special sales but we have a large stock of furniture.

We have the largest amount of daylight furniture in the city.

We are after the trade of people who are more interested in getting good values rather than a lot of the old but usually connected with the selling of furniture.

Most Elephants Are Cowards. Only about twenty-five out of every 1,000 elephants in India can pass the tests for courage which are put before them.
