Fordson TRADE MARK

Farm Tractor

A Fordson on your farm means quicker workbetter work—easier work. You can do more work in a day with the Fordson, and it is easier for you. Get more money from the farm as well.

The Fordson is a product of the genius of Henry Ford. He was born on a farm, and he now lives on a farm, cultivating more than 7,000 acres every year. He knows the farm problems and he built the Fordson to help solve these problems in the easiest way; in a money-making way. Henry Ford & Son build one type of tractor. They have built this one tractor and have built it weel.

The Fordson has more power per pound weight than any other tractor manufactured. It is a universal utility for the farm. Like the Ford car, its uses are many, and it is your serwant during the entire year.

Only a limited number of Fordson tractors are allotted this territory, and the demand is greater than the supply. Orders are being filled in rotation. Order yours now.
