Have You Ever Stopped to Consider Your Significance On This Earth?

Considering the hundreds of generations past and those to come, and the millions of people in each generation, do you not owe yourself the best during your short, stay on earth?

Life is too short to waste time on any operation, be it in the home or factory, if it isn't accomplished quickly and efficiently.

Electricity has worked, and is working wonders for those who are availing themselves of all that it offers. You too can enjoy its many applications and comforts at a very small cost.

The Detroit Edison Co.

Fordson Farm Tractor

A Fordson on your farm means quicker work—better work—easier work. You can do more work in a day with the Fordson, and it is easier for you. Get more money from the farm as well.

The Fordson is a product of the genius of Henry Ford. He was born on a farm, and he now lives on a farm, editivating more than 7,000 acres every year. He knows the farm problems and he built the Fordson to help solve these problems in the cysicst way; in a money-making way. Henry Ford & Son build one type of tractor. They have built this one tractor and have built it weel.

The Fordson has more power per pound weight than any other tractor manufactured. It is a universal utility for the farm. Like the Ford car, its uses are many, and it is your servant during the entire year.

Only a limited number of Fordson tractors are allot-ed this territory, and the demand is greater than the supply. Orders are being filled in rotation. Order yours now.
