A PROFESSOR OF CHEMISTRY SAYS HYPO-COD IS O. K.

Best Reconstructive Tonic Ever Produced, Says This Authority.

"I have been in the medical profession for quite a number of years as Pharmacist and Professor of Chemistry (Clemson Medical College) and the truly wonderful results obtained by many people through the use of Earle's Hypo-Cod caused me to decide to make an exhaustive research and find out if one of the most truly well balanced combinations of tonic, alternative and nutritive principles ever produced.

"It can be used with impunity without the least digestive disturbance owing to the complete elimination of the fishy taste of Cod Liver oil, while it still retains all the most attractive elements so useful as a tonic and tissue builder.

"The extract of fish, containing carbohydrates and Nitrogenous matter, cannot be surpassed as a nutrient and fat producing agent; Wild Cherry Bark, an evergreen tonic, has an extremely beneficial effect upon the mucous membranes, and with the small amount of strychnine present, acts as a stomach stimulating element.

"The Hypo-Cod contains Iron, Soda, Potassium, Manganese, Quinine and Strychnine are too well known for the powerful influence they exert upon the weakly nervous system and upon the lungs for me to dwell upon their effectiveness. The iron so necessary to enrich the blood is also present in soluble form readily assimilated and the Sherry not only acts as a base to hold it in solution, but acts as a mild stimulant and appetizer.

"I consider Earle's Hypo-Cod a most valuable preparation and can readily understand why so many people are obtaining beneficial results from its use. It is a most nutritious preparation." Signed: E. E. Early, Ph. D.

Read what another expert says next week about this tonic. Drop in at the drug store tonight and read the formula on a bottle. Ask your doctor or druggist about it. Take home a bottle. It has genuine Earle's Chemical Co., Washington, W. Va., on bottle, which is your assurance of quality in medicine. A large bottle costs \$1.25 plus six war tax—Adv.

It is Concentrated Food and Therefore Should Be Eaten in Quite Moderate Quantities.

Sugar is so full and palatable food. It must, however, be remembered that it is a concentrated food, and therefore should be eaten in moderate quantities.

Persons of active habits and good digestion will find sugar to their good almost at pleasure without in any way interfering with their ordinary life of delicate digestion, or with a tendency to corpulence would do better to use sugar very moderately.
