Quality does tell! Measured by covering capacity and length of wear, one gallon of Hanna's Green Seal Paint proves itself equal to two gallons of so-called "cheap" paint. And there's a reason: viz.—no paint can be better than the ingredients that go into it.

HANNA'S GREEN SEAL PAINT contains only highest grade ingredients, universally recognized as necessary in making good paint. If a paint is sold at a ridiculously low price itsimply means that it is lacking in these necessary ingredients and contains cheap adulterants. The exact formula is printed on every package of Green Seal.
