

Village Commission Votes On Purchase Of 300,000 Gallon Steel Reservoir Tank

Tank Will Cost \$6,480.00 and Fittings About \$2,500.00; Will Be Erected Within Nine Weeks; Will Ask Bond Issue

INSURES WATER SUPPLY At a special meeting of the Village Commission, held Wednesday night, it was voted upon by them to purchase a 300,000 gallon steel reservoir tank, to be erected at the present waterworks station.

A good deal of thought has been given to this subject by the Commission since the purchase of a half-million gallon concrete reservoir was effected. Due to the great cost of this, however, and to the fact that Birmingham could not furnish the water capacity, the Commission finally decided on the 300,000 gallon steel tank.

When completed the new tank will be 38 feet in diameter and 35 feet in height. It will hold close to 300,000 gallons of water, which will be pumped out of the wells. The tank will allow Birmingham to have a working supply of over 700,000 gallons daily.

Council Proceedings The regular afternoon meeting of the Village Commission was held Wednesday night at 7:30 o'clock.
