Social and Personal

For the pleasure of their two small daughters, Lucille Lowman and Betty Erwin, Mrs. Maurice Lowman and Mrs. Louis Erwin entertained at a double birthday party last week. The affair was honoring their respective birthday anniversaries, which occurred last week and was given at the home of Mrs. Lowman. About twenty-seven little guests were present and enjoyed games and music until the dining room was opened at 5:30 and dainty refreshments were served. The decorations were selected to carry out the Thanksgiving scheme, turkeys and pumpkins being used about the table. The flowers and favors further emphasized the Thanksgiving atmosphere and the party proved to be exceptionally pretty one. The little guests took leave of their hostesses at 6 o'clock.

Get your Demijohn Paper Supplies early. Our stock will shortly be gone. Nothing like it before in Birmingham. "The Builder's Shop," adv 31

Mr. and Mrs. Eugene Staebler of Livonia avenue, spent the weekend at Ann Arbor and attended the Minnesota-Michigan game.

Buy him a pair of Kuno-Bart Knit Buttons for Xmas. MIX THE JEWELER, Cuba's Drug Store, 4311 Ave. of the Builders' Shop, 34

Mrs. Madeline Hutchinson, Howard Hobling, Hopson and Paris attended the L. O. T. O. County Association in Pontiac, Friday, Nov. 18.

An EVERSHARD Pond makes a beautiful XMAS gift. MIX THE JEWELER, adv 31

DURAND CIGARS, very mild, adv

HEELS to be straightened? Yes, Madam. While you wait, we'll clean your shoes. We do your work quickly, not because we're cheap, but because we know how to do it. Shoe repairing means long-lived foot-wear!

Save 349 Steps on Breakfast Alone with a Napanee Dutch Kitchenet

NOW we know how housewives exhaust themselves each day in getting three simple meals every day in the average kitchen. Scientific tests prove three-fourths of the wear and tear can be saved. The physical effort is reduced to one-quarter. The vast importance of these discoveries and to appreciate the fact that we are saving ourselves from exhaustion.

They are the result of scientific time and motion studies of the preparation of meals under the direction of Mr. Harrington Emerson, foremost efficiency engineer.

Mr. Emerson scientifically compared the work of getting meals with and without a Napanee Dutch Kitchenet. Thousands were spent on these studies. Each motion was timed and each step was recorded by stop-watches and pedometers. Two foremost domestic scientists were consultants in the preparation of countless dishes under this scientific observation. Amazing discoveries resulted.

Save 1,592 Steps Every Day
Mr. Emerson found that 465 steps were necessary in an average kitchen to get a simple meal without the Napanee! That 349 of these were saved by the use of the Napanee!

He found that 500 steps were saved in getting luncheon. 734 steps in getting dinner. His discoveries mean the end of the most distressing hardship his wives suffer—coastant fatigue.

These astonishing savings are possible because the Napanee is scientifically designed to make every motion and every minute count. Its superior construction, its new and greater conveniences are the reasons for its amazing value to women. Come and let us show you these superlatives today. Let the long strain of kitchen work end now. Come and learn with all the women of America of the new kitchen era.

A Statement by Mr. Harrington Emerson
It is clear from our scientific studies that the striking savings of the Napanee Dutch Kitchenet are among these distinct lines:

- 1. Saving of effort, fatigue elimination;
2. Saving of time;
3. Standardization of work.

The saving of energy, shown by the large reduction in the number of steps is very striking. By accurate quantitative measurement, three-quarters of this physical exertion is saved. It is reduced to one-quarter.

Mr. Emerson is a member of the Committee on Elimination of Waste in Industry, founded by Mr. Herbert Hoover.

Let the People Know

That indifference to the welfare of the public utility is in reality indifference to their own welfare as individuals and as a community.

That is true because a public utility is essential to the community, to all of its industries and to all the people in the community, and can best serve and satisfy them only when it is fairly and intelligently treated by them.

Purely as a matter of selfish interest, everybody in this city should do what he or she can to understand the character, function and purpose of the public utility, and having understood them, co-operate with the utility so it can do the best service at all times.

The city has come to its present growth and development with the aid of its public utilities. It could not have reached its present status without them. It could not maintain its present status, to say nothing of making greater progress, unless its public utilities were kept in a strong, healthy condition. There is only one way to keep them in such condition and that is to co-operate with them at all times, to see to it that they are given fair play and fair pay. That is all they ask and it is what every business must have to succeed.

No city can succeed without successful public utilities. Coming out of this present period of business depression, this city and every other city in industrial Michigan is bound to need larger and larger supplies of gas, and this Company must be prepared to meet these increased demands. We shall be prepared with the people's help—with their cooperation—to do this. We will have this cooperation in larger and larger measure as the people come to understand their need of us and our need of them, and to appreciate the fact that we are bound together in a ball of mutual interest.
